CONNECTED WITH THEIR SEED STORE AND AGRICULTURAL WAREHOUSE, EST. 1822.

Do You Wish to BUY OR SELL?

Our catalogue of farms and country places contains over 250 descriptions and 50 illustrations, sent free on application

LIST YOUR PROPERTIES
NOW FOR QUICK SALES.

Breck's Horticultural and Agricultural Registry

Employers and Employees in these lines will be served at 51 and 52 North Market Street, as formerly, where competent assistants will use every endeavor to give satisfaction to all who favor us. Approved GARDENERS, FLORISTS, FARM MANAGERS, COACHMEN, SUPERINTENDENTS OF COUNTRY ESTATES, PUBLIC AND OTHER INSTITUTIONS, MEN FOR GENERAL WORK ON COUNTRY PLACES, etc., will here find prompt, efficient and courteous service, while employers of such help can rest assured that *only persons who have been deemed worthy of entry in our register will be recommended to them.*

As no charge is made to either employer or employee for the services of Breck's Horticultural and Agricultural Registry, our desire being to improve the service in the general interest of our business, we solicit your hearty co-operation, and it can not be better expressed than through a liberal use of the facilities we offer.

Breck's Bureau of Registry and Information

LOCATED AT 406 WASHINGTON ST., BOSTON

Supplies through its MERCANTILE DEPARTMENT approved Bookkeepers, Cashiers, Stenographers, Salesmen, Clerks, Shippers, Entry Clerks, Boys, Porters, Janitors, Watchmen, Hotel Help, Engineers, Firemen, etc., Help for Institutions and Hospitals, and through its WOMEN'S MERCANTILE DEPARTMENT approved Women Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Women for Office Work, Matrons, Nurses, etc.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining. Rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

Through our large clientage we can serve both employer and employee more promptly and satisfactorily than can any house not having our resources. *The knowledge gained through experience is at the service of employers who desire our aid or advice in the selection of suitable persons for the places they wish to fill.*

On application we will mail circulars descriptive of our Bureau, and blank forms whereon employers and employees can state particulars necessary to guide us in supplying their wants.

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we recently secured commodious quarters at No. 406 Washington Street, which we fitted up in an appropriate and attractive manner. Here our manager, Mr. Wm. E. McGerigle, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons desiring employees or employment in mercantile lines.

Bear in mind that no person is sent out from our Bureau whose previous record for character and habits has not been carefully investigated and approved.

Yours respectfully,

Telephone, Richmond 1660

HIGH GRADE SEEDS

TO OUR CUSTOMERS

THE fact that for ALMOST A CENTURY we have carried on a successful and continually growing business, both in the line of Seeds and Agricultural Implements, proves conclusively the genuineness of our claim that WE DEAL ONLY IN HIGH GRADE GOODS. We take this opportunity to thank our friends for their many generous favors during the past year and to solicit their continued patronage in the future.

Free Delivery Anywhere in the United States where Orders are Accompanied by Cash. We deliver free to any Post-office, Railroad, Express Office or Freight Station at our expense where orders are accompanied by cash, except where otherwise noted. Vegetable and flower seeds at the pkg., oz., $\frac{1}{2}$ lb., $\frac{1}{4}$ lb., and 1 lb. prices; bulbs at the single and dozen rates; books and other publications. If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to price, at the rate of 8c. per pt. and 15c. per qt.

Orders. We would impress on our friends the importance of sending us their orders early. Please do not wait until Spring, when we are so busy that there is sometimes unavoidable delay in filling orders.

Register Your Name for Next Year's Catalogue. We request all interested persons who visit our store to register their name and address on the books provided for that purpose. This kindness will be appreciated and will be an advantage to our patrons as well as to ourselves.

Notice. While we exercise the greatest care to have all Seeds, Plants, Bulbs and Nursery Stock of the best kind, we do not give, and our agents and employees are forbidden to give, any warranty, express or implied. If you do not accept the goods on these terms, you must return them at once, and all payments therefor will be refunded.

JOSEPH BRECK & SONS (Corporation).

We Issue the Following Publications and will gladly mail any of them free on application: Annual Catalogue and Gardener's Guide, published in January; **Holland Bulbs and Plants**, published in September; **The Lawn, The Garden** (Sixth edition); **New Method Sweet Pea Culture**, **Success with House Plants**, **Points for Poultry Raisers**, **Catalogue of Agricultural Hardware, Implements, Machines and Woodenware**, **Illustrated Catalogue of Farms and Country Places**.

Our customers who grew BRECK'S KING SEED OATS last year were well pleased with the results. Give them a trial, and we believe you will be satisfied.

See page 42 for description and price.

GOLDEN ROLL OF HONOR

"A continuous business relationship of 40 years or more is certainly a fair test of integrity and honorable dealing."

THE continued growth of our Golden Roll of Honor is very gratifying to us. It is one of the sources of strength which enables us to maintain the standard that satisfies so many thousands of customers. It indicates the mutual confidence that exists between our patrons and ourselves. It shows that our methods are right, and that we supply our trade with "the best goods at fair prices."

Our business, established over eighty-eight years ago by the grandfather of the Brecks now in control, is still conducted under the same roof, but with its growth it has spread on all sides, so that we now occupy the entire block bounded by North Market Street, Merchant's Row, North Street, and Bendall's Lane. Five floors of 10,000 square feet each constitute our salesrooms, offices and accommodations for a working stock for our retail business.

Our great storehouse of seven floors, 93 to 103 Cross Street, affords facilities for carrying and handling goods for our wholesale trade.

For this growth we are in a great measure indebted to the friends who constitute our Golden Roll of Honor, and to the many new customers they have made for us through their recommendations. We take this opportunity to thank all our friends for their many favors, and we beg to assure them that no effort will be spared to maintain the high standard of goods and service.

This year we are privileged to add to our list the names of nine more valued customers whose photographs we reproduce on the opposite page.

We print below recent additions to our already large list of Golden Roll of Honor friends who have traded with us for forty years or more.

PLEASE NOTICE. We will esteem it a special favor if parties who have traded with us for forty years and upwards will advise us of the fact, with particulars as to length of time of their dealing with us, and of any features of interest that may be connected with the same during these long periods of years. One cannot but agree that when a silvery haired customer remarks to us, as is not infrequently the case, "I have traded with this house, father, son and grandsons," 40, 50 or even 60 years, as the case may be, the relation between us is a little more than that of mere buyer and seller, and that it is not surprising we feel it to be so.

Turnip	April to August	$\frac{1}{2}$	Thin to 4x18	60 to 75 "

1911

Novelties and Vegetable Seeds of Special Merit

New Rust-Proof Giant Asparagus Roots

Have been thoroughly tested, and proved to be perfectly *immune from rust*. It produces a large yield, and in quality it is second to none. It was this past season in big demand in the Boston market, where it sold for \$7.00 per bushel, when other varieties sold for \$3.50 to \$5.00 per bushel.

We offer this season strong 2-year old roots.

Price: Doz., 50 cts; 100, \$2.00; 1000, \$15.00.

Rust-proof Giant Asparagus

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—

Vegetable and Flower Seeds at the package, ounce, $\frac{1}{4}$ pound, $\frac{1}{2}$ pound and 1 pound prices:

Bulbs at the single and dozen rates.

Books and other publications.

If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

BRECK'S HYBRID DWARF CRANBERRY BEAN

This fine variety of shell bean is a cross between "Low's Champion" and the "Mountain Cranberry." It is vigorous and hardy, yields well, and is practically free from rust. It can be shelled more easily than any bean in the market.

The pods, which are green at first, change, when ripening, to a clear white. The bean is dark red and long. It is an excellent all-round shell bean and should have a place in every garden. Pkt. 10 cts.; pt. 30 cts.; qt. 50 cts.; half pk. \$1.75; pk. \$3.00.

Breck's Hybrid
Dwarf
Cranberry Bean

I wish to tell you that I have had great success with all your vegetable seeds this year; they are indeed high grade, and I am very much pleased with them. Felt I could not let it go by without writing you.

Yours truly,

Gardener for Mrs. Winston Churchill, Windsor, Vt.

Stephen Duly.

See Special Offers on third page of cover.

Breck's "Tewksbury Dwarf Horticultural Bean."

Bright crimson-podded bean, enormously productive, will not rust nor spot. The pods are long and inclined to curve.

One of the characteristics of this bean is the growth of shooting tendrils on the vine, which gives it the appearance of a pole bean. Another is the presence, in its dry state, of an occasional yellow-tinted bean in the same pod with the striped beans.

This bean is a great favorite with market gardeners, because it is more prolific than most beans, and commands a higher price in the market.

Pkt. 10 cts.; pt. 25 cts.; qt. 45 cts.

Dwarf Horticultural Wax Beans, Rust Proof.

A splendid bean and very prolific. The vine is of strong and vigorous habit, bearing the pods well up from the ground, and thus being protected by the foliage, they will not rust. Pods about six inches long, of a beautiful waxy yellow, delicious in flavor and stringless. Pkt. 10 cts.; pt. 20 cts.; qt. 35 cts.

JOSEPH BRECK & SONS,
Boston, Mass.

Gentlemen:

In spring, 1910, I planted six acres of your King Oats, and threshed out 300 bushels of first class oats; and those who harvested the oats say there were 60 bushels lost by not harvesting at proper time, waiting for binder to arrive. The straw left after threshing was of excellent quality, and we are now feeding it to the cattle who relish it very much. Will plant a larger quantity another season.

Yours truly,

W. A. DAGGETT,
Danville Jct., Me.

Breck's "Tewksbury Dwarf Horticultural Bean."

Breck's Market Garden Danvers Half-Long Carrot.

The seed we offer of this popular variety is of superior quality and carefully selected from the choicest stock. The carrot is of a rich dark orange color, very smooth and handsome, and from its length is easier to dig than the longer varieties. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 75 cts., 1 lb. \$2.50.

See Special Offers on third page of cover.

***Arlington Grown Crosby's
Egyptian Beet.***

A very special strain of this well known variety, selected with great care as to shape and color; very desirable for market gardeners owing to its extreme earliness. Pkt. 10 cts., oz. 20 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

***Barker's Strain Edmands
Blood Beet.***

A superior strain of Edmands Blood Beet, of splendid shape, uniform in size and of a dark red color. Its flesh is of exquisite tenderness and is free from any stringy or woody characteristics. The color is very deep crimson and is ringed or marked in a beautiful manner, making it very attractive when sliced for the table. Can be sown as late as July 20th with good results.

Customers wishing an early and finely flavored beet should include some of this seed in their order. Pkt. 10 cts., oz. 15 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.50.

Arlington Grown Crosby's Egyptian Beet.

Breck's Special Strain of Danish Ball-Head Cabbage.

This famous Denmark variety is absolutely unequalled for its great solidity and fine keeping qualities. The heads are nearly round in shape, very hard and firm, and keep in finest condition when buried through the winter. The seed we offer is imported by us from a leading grower in Denmark. Pkt. 10 cts., oz. 30 cts., $\frac{1}{4}$ lb. \$1.00, lb. \$3.50.

A Pit of Breck's Danish Ball-Head Cabbage, Being stored for the Cultivation of Seed.

See Special Offers on third page of cover.

Mondamin Field Corn, Yellow Flint Variety.

This corn is rightly named Mondamin (which in the Indian tongue means "Friend of Man") as it will yield more profit to the farmer than any other known sort. It was hybridized on the World's End Farm, Hingham, Mass., it being a cross between the famous Angel of Midnight and another strain of Indian corn that has been improved by selecting the top ears for a number of years. It is extremely early, maturing one hundred days from time of planting; the ears are eight rowed, 12 to 15 inches long, and well filled to the tips. We consider it a very valuable acquisition to the corn family. Qt. 25 cts., peck \$1.25, bushel \$4.00.

I believe this new variety of corn to be very practical to the New England farmer. I had splendid success with it, raising ninety-five bushels of excellent shelled corn from one acre.

C. R. GOODHUE, Supt. World's End Farm, Hingham, Mass.

I planted a two-acre field of "Mondamin Corn" last year, and it was the finest variety that I ever grew; excellent for ensilage. The seed was planted June 2, and matured for ensilage September 20 to 25, the corn maturing in 108 days.

E. WENTWORTH, East Hiram, Maine.

Breck's Early Harvest Sweet Corn.

We are pleased to announce that since we introduced Breck's Early Harvest Sweet Corn it has proved a wonderful success, as our patrons cannot speak too highly of its merits.

We claim for it two distinctive qualities that will appeal to all lovers of this popular vegetable:—first, extreme earliness; second, deliciousness of flavor—it is superior in sweetness to any corn on the market. Pkt. 10 cts., pt. 20 cts., qt. 35 cts.

Breck's Waban Lettuce.

An excellent variety of the loose heading type, very crisp and tender and of fine flavor. The outside leaves are slightly curled, with reddish brown edges. It is of quick growth and can be planted in the open ground extremely early. Pkt. 10 cts., oz. 40 cts., $\frac{1}{4}$ lb. \$1.00.

May King Lettuce.

Extra large, round, solid heads, light green outside, with golden yellow heart, very tender and of fine flavor, excellent for forcing. Pkt. 10 cts., oz. 40 cts.

See Special Offers on third page of cover.

Breck's Old Glory Pea.**Extra Early and Weather Proof.**

Awarded First Prize Massachusetts Horticultural Society.

The pronounced success of our Old Glory Pea proves that it is the best pea on record; it is practically in a class by itself, and is without an equal, either as a market sort or for the home table. Our patrons who grow this variety are enthusiastic in praise of its early growing qualities and great productive powers. Pkt. 10 cts., pt. 25 cts., qt. 45 cts., pk. \$3.00.

The "Old Glory" pea is the finest we have ever seen; planted beside other "earliest" varieties, it always comes out ahead, not only in earliness but in quantity and quality.

Yours very truly,

HARRY W. WHITE.

Leyden, Mass.

I must say a word to you in regard to the "Old Glory" peas I purchased from you. I have the finest ones in town; they have been one mass of pods. Extra early and wonderfully prolific.

Sincerely yours,

MRS. G. D. EMERSON.

So. Berwick, Me.

Breck's Old Glory Pea.

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—
Vegetable and Flower Seeds at the package, ounce, $\frac{1}{4}$ pound, $\frac{1}{2}$ pound and 1 pound prices.
Bulbs at the single and dozen rates.
Books and other publications.
If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

Breakfast Delight Musk Melon.

"Breakfast Delight"**Musk Melon.**

This new dark salmon-fleshed Cantaloupe is fine for the home garden or for market. It is oblong in shape; the color is green, interlaced with gray netting, and the seed cavity is unusually small.

The melons average 6 inches in length, $4\frac{1}{2}$ inches through, and weigh about 2 pounds each. The flesh is dark salmon in color, very thick, deliciously sweet, and highly flavored. Pkt. 10 cts., oz. 25 cts., $\frac{1}{4}$ lb. 60 cts., lb. \$2.00.

See Special Offers on third page of cover.

Ailsa Craig Onion.

We offer a very fine strain of this popular onion. It is large in size, yellow in color and a good keeper. We recommend it very highly to those who like raw onions, on account of their pungent flavor. Pkt. 10 cts.; oz. 50 cts.; $\frac{1}{4}$ lb. \$1.50.

Breck's Yellow Globe Danvers Onion.

We believe we are safe in saying that *three-fourths* of all the Onion seed now offered is *California grown*. This fact accounts for the low price and also for the frequent disappointment met with in the crop, late ripening, flat and scallion bulbs being common results.

The strain we here offer is totally different. It is home grown and has been brought to the highest state of excellence by continued selection and care in growing. There is more of it sown by the leading onion growers of New England, who know what the market wants and what brings the highest prices, than all other special strains combined. We will take pleasure in furnishing to interested persons the names of a sufficient number of these leading growers, who plant Breck's Yellow Globe, to convince them of the fact. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.00.

Rhubarb, or Pie Plant.

We can supply fine roots of these plants, which, if planted in good soil early in the spring, will yield stalks suitable for table or for market, the following spring.

In the Northern states, a bed of rhubarb will last from ten to fifteen years. A deep, rich soil, trenched to the depth of two feet, is best. Strong roots, 20 cts. each; \$2.00 per dozen.

A Field of Breck's Beardless Barley.

Breck's "Success, or Beardless Barley."

Breck's "Beardless Barley" is a six-rowed variety, and is one of the best grains to sow early in the spring. Seed sown in April will be ready for cutting early in July. It requires $2\frac{1}{2}$ to 3 bushels to sow one acre, and grows from $3\frac{1}{2}$ to 4 feet high. It seldom lodges. It yields from 50 to 60 bushels of seeds per acre when fertilizer is used. The quality of the straw is excellent. It is splendid for bedding horses during winter. It is frequently used for seeding with Alfalfa to protect the young shoots until they get well rooted. Price per bushel, \$2.00.

See Special Offers on third page of cover.

BRECK'S

--HIGH GRADE--

VEGETABLE

SEEDS

HIS IS OUR EIGHTY-EIGHTH ANNUAL CATALOGUE. We believe our knowledge and reputation acquired through all these years is of value. We have built up through experience and integrity a business that in this country stands second to none in reliability and only one or two in volume. Our Golden Roll of Honor shows that we are both able and willing to satisfactorily serve the gardening and farming public, else we would not be privileged to retain these gentlemen as customers for such periods of years. We always consider our goods our best recommendation; and they continually bring us new patrons. If you have not had experience with our goods, or methods of doing business, surely some of your neighbors can tell you of them. If you desire "*the best*," inquire, and if results warrant it, send us a trial order and you will be satisfied. Prices may vary as the season advances. Ours will always be as low as the lowest for goods of equal quality.

Where orders are accompanied by cash we Deliver Free to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:

Vegetable and Flower Seeds at the pkt., oz., $\frac{1}{2}$ lb., $\frac{1}{4}$ lb. and 1 lb. prices. Bulbs at the single and dozen rates. Books and other publications. If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

Artichoke.

German, *Artischoke*.—French, *Artichaut*.—Spanish, *Alcachofa*.

Culture.—A rich sandy loam is desirable, but any soil made fine by deep culture, and enriched with plenty of well-rotted manure, will answer. Sow seed in hot-bed early in spring, in rows six inches apart; transplant when large enough into boxes or pots. After danger of frosts is past plant in the open ground, two feet between the plants and three feet between the rows.

This method of cultivation will produce heads for culinary purposes by September. Seed may, if desired, be sown in the open ground in May, but the little tender plants should be given protection until the cold weather of spring has passed.

Plants raised from seed sown outdoors will not give edible heads until the second summer. One ounce of seed will sow 30 feet of drill.

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Large Green Globe. The best and most popular sort	\$0.10	\$0.35	\$1.00
Early Purple, or Violet	.10	.35	1.10

Jerusalem Artichoke.

A species of sunflower (*Helianthus tuberosus*). A tuber that thrives well upon light dry soil and is cultivated for feeding sheep and swine. It is also used for pickles. The tops when cut and cured make an excellent dry fodder. It is propagated by tubers, which should be set in rows four to five feet apart and one foot apart in the rows. Three bushels are required to plant an acre. Qt. 25 cts.; pk. \$1.00 net.

Asparagus.

German, *Sparget*.—French, *Asperge*.—Spanish, *Esparragos*.

(For price on Asparagus Roots, see Vegetable Plants.)

An asparagus bed may be made from one or two year old roots, planted in April and May, or in October. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly two feet. Plant the roots in rows four feet apart, leaving about 12 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow. Every fall a liberal dressing of coarse manure should be spread after the tops have been cut, and in spring forked in. The second season after planting the bed may be cut two or three times. Do not cut too closely, as the roots require the benefit of some foliage. Seed may be sown in April in drills one inch deep and one foot apart. One ounce of seed will sow 60 feet of drill.

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Conover's Colossal. Large, excellent and hardy	\$0.05	\$0.10	\$0.20

Hub Asparagus

Beans—English.German, *Grosse Bohnen*.—French, *Fève de Marais*.—Spanish, *Haba*.

Plant as early in spring as the ground can be worked. The rows should be three feet apart; set the seed in the rows six inches deep, four inches apart. As the pods get formed, top the plants, thereby preventing too much running to vine.

Broad Windsor. The best variety for general use. Pkt. 10 cts.; qt. 35 cts.; pk. \$2.00.

Beans—Dwarf or Bush.German, *Bohne*.—French, *Haricot*.—Spanish, *Frijolencano*.

To afford a regular succession of crops throughout the season, plant every two weeks, from about the beginning of May to the end of summer; but not until the soil becomes warm, as they are very sensitive to cold. Plant in rows 18 inches apart, two inches deep; cultivate frequently, but only when dry, as the scattering of earth on the foliage or pods, when moist, will cause them to become damaged with rust. *One quart will plant 100 feet of drill.*

Green Podded Varieties.*We supply packets of Beans at 10 cents each.*

BEANS—Pole or Running.

German, *Stangen Bohne*.—French, *Haricots à Rames*.—Spanish, *Jidas*.

It is desirable to make the planting of Pole Beans at least a week later than the first planting of the bush sorts, as they are more tender. Plant in hills three to four feet apart, putting four or five beans in a hill, and leaving space in the centre for the pole. A liberal quantity of well composted manure in each hill is of value.

One quart of *Limas* will plant 100 hills. One quart of the smaller seeded sorts about 200 hills.

Breck's Improved Rust Proof Golden Wax Beans.

Borage.

The young leaves of this annual are used as a salad or boiled like spinach. Sow in the spring, in light soil, and thin out to eight inches apart. The flowers are a pretty blue and afford excellent food for bees throughout a long season. Borage, pkt. 5 cts.; oz. 20 cts.

Borecole or Kale.

German, *Blatterkohl*.—French, *Chou Vert*.—Spanish, *Breton*.

Sow early in the spring in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for cabbage. They are extremely hardy, and will endure quite a low temperature. The Siberian variety is also sown in September for early greens. *One ounce will sow 150 feet drill.*

Dwarf Green Curled Scotch. Leaves of a bright green and very tender and closely curled. The quality is improved if the plants are touched by frost before being used. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

Dwarf Brown. Similar to the preceding but of darker color, very hardy. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

Siberian or German Greens. Sown in fall for spring use. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 70 cts.

Tall Green Curled Scotch. Similar to the dwarf, but of more vigorous growth. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

Green Curled Scotch Kale.

Broccoli.

German, *Spargelkohl*.—French, *Chou Brocoli*.—Spanish, *Brocoli*.

This vegetable closely resembles the cauliflower, but is hardier. Like cabbage and cauliflower, it succeeds best in deep, rich, moist soil and in cool weather. The seed should be sown at the same time and the plants receive the same general culture as cabbage. Broccoli completes its growth from seed in from 120 to 140 days. Five to ten degrees of frost will not injure the plants when they are approaching maturity. *One ounce of seed will produce about 1500 plants.*

Early Purple Cape. Hardy, heads of medium size and compact formation

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Veitch's. Self-protecting, large, compact head	\$0.10	\$0.35	\$1.25
White Cape. Like Purple Cape, but of a creamy white color	.10	.35	1.25

Paris Market
Brussels Sprouts.

in the same way as cauliflower. Seed should be sown about the middle of May in a seed bed, and the plants afterwards set out in rows two feet apart and cultivated like cabbage. Being small and hard, the sprouts are not in the least affected by frost. *One ounce of seed produces about 1,200 plants.*

Alburgh. The finest variety. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.

Improved Paris Market. A most desirable strain. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.

I have bought of all the leading seedsmen in the country, but your seeds are the best I ever used. They are without a peer, and I shall want more in the spring.

Richmond, Maine.

Yours for prosperity

A. B. REED.

Brussels Sprouts.

German, *Sparsenkohl*.—French, *Chou de Bruxelles*.—Spanish, *Berza de Brusela*.

Species of the Cabbage family. It produces along the whole length of the stem small sprouts resembling miniature cabbages. These heads are a great delicacy boiled

Chervil.

German, *Gartenkerbel*.—French, *Corfeuil*.—Spanish, *Cerafolio de Cafe*.

Chervil, Curled. An aromatic sweet herb that resembles parsley. The young leaves are used in soups and salads. Sow evenly, in May, in drills half inch deep, one foot apart. 5 cts. per pkt.; 10 cts. per oz.; \$1.00 per lb.

Chervil, Tuberous Rooted. Sow in May or June, after treatment same as for carrots. 5 cts. per pkt.; 20 cts. per oz.; \$1.50 per lb.

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—

"The Winchester" Savoy Cabbage.

BRECK'S SAVOY CABBAGE "The Winchester"

The Cabbage for the market gardener to grow. The seed we offer was obtained after many years' careful selection from the best heads only. Seed planted as late as June 20th will mature about the middle of October; heads large, of splendid shape, fine flavor, and as a keeper for winter use it is unsurpassed. Pkt. 15 cts.; per oz. 75 cts.; per 1-4 lb. \$2.50.

Cabbage.

German, *Kopfschl.* — French, *Chou Pomme*. — Spanish, *Berza*.
(For price on Cabbage Plants, see Vegetable Plants.)

All that Cabbage requires is the soil to be rich, deep, well-drained, and abundantly manured. For the early kinds, plant 30 inches between the rows and 16 inches between the plants. For the late kinds, three feet between the rows and two feet between the plants. For very early use, sow in January or February, in hot-beds. Set out when the plants are strong enough into other hot-beds, or set in cold-frames in March. Transplant when danger from frost is past to the open ground. For a succession, sow in the open ground last of March or early in April. The late or winter crop seed can be sown in May and the plants set out in July. One ounce of seed produces 2,500 plants.

	Pkt.	Oz.	¼ lb.	Lb.

See Special Offers on third page of cover.

BRECK'S WHITE BOUQUET CAULIFLOWER.

Cauliflower.

German, *Blumenkohl*.—French, *Chou-fleur*.—Spanish, *Coliflor*. (Price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious of the Cabbage family. For the production of the cauliflower a rich, deep loam is required, a low moist situation being preferable. A liberal supply of water when possible produces very marked results. Seed of the very early variety should be sown in a hot-bed in February or March and set out by the end of April. For later supply, sow seed in May, choosing a cool, moist place. When large enough, transplant, making the rows about $2\frac{1}{2}$ feet apart, and 18 inches between the plants. Transplanting should be done in damp weather. To destroy the cauliflower-maggot, try one ounce of sulphuret of potassium dissolved in one gallon of water. Heat the liquid to about 100 degrees, and apply a tablespoonful to the stalk of the plant just above the ground. *One ounce of seed produces about 2,500 plants.*

	Pkt.	Oz.	$\frac{1}{4}$ lb.
Breck's White Bouquet. This we believe is the earliest and most reliable cauliflower for New England. Since its introduction it has become an especial favorite with market gardeners	\$0.25	\$4.00	\$12.50

Veltch's Autumn Giant. A desirable large, late variety10	.35	1.00

See Special Offers on third page of cover.

Carrots.German, *Mohre*.—French, *Carotte*.—Spanish, *Zanahoria*.**Danvers Half Long Carrot.**

Carrots are grown largely both for feeding to stock and culinary purposes; the long varieties used for the former, the "Horn" and medium sorts for the latter. The "Horn" sorts can be grown on thin soil and are mostly for early use. The others prefer deep, sandy loam that was well manured the previous year for some other crop, such as potatoes or onions. Sow in April or May or for late crops for table use, up to the end of June, about one inch deep in drills 15 inches apart for garden sorts. The rows in field cultivation should be two feet apart. Thin out the plants from three to eight inches apart, according to variety. *One ounce of seed is sufficient for 100 feet of drill, four pounds to an acre.*

	Pkt.	Oz.	¼ lb.	Lb.
Chantenay. A type of Danvers Half-Long, but earlier and smaller	\$0.05	\$0.10	\$0.30	\$1.00
Danvers Half-Long. The most desirable main crop variety; an excellent keeper05	.15	.40	1.25
Early Scarlet Forcing. Very early and valuable for forcing10	.20	.60	2.00
Early Scarlet Horn. A medium-sized half-long variety of fine color05	.10	.30	1.00
Guerrande, or Oxheart. Intermediate between half-long and Horn sorts05	.10	.30	1.00

White Vosges. Large, thick, short, fine for stock05	.10	.25	.60

Cardoon.German, *Kardon*.—French, *Cardon*.—Spanish, *Cardo Hortense*.

Cardoon is grown for the midrib of the leaf, which requires to be blanched in the same manner as celery. Sow early in spring, where the plants are to remain, in drills three feet apart, and an inch and a half deep, and thin out the young plants to a foot apart in the drills.

	Pkt.	Oz.	Lb.
Large Smooth Spanish. Grows about four feet high	\$0.05	\$0.20	\$2.00

Chicory.German, *Cichorie*.—French, *Chicorée*.—Spanish, *Achivoria de Cafe*.

Large Rooted. Sow and treat in the same manner as carrots. This is the chicory of commerce used to mix with coffee. The roots are taken up, washed, cut in small pieces and carefully dried before being used.

Witloof. Sow in May or June in drills, thin out to six inches apart, treat as *Endive* until end of summer, when it should be banked up like celery. The blanched stalks are used as a salad. It is also used as a boiled vegetable dressed in the same way as cauliflower.

	Pkt.	Oz.	¼ lb.
	.05	.10	.30
	.05	.10	.35

Collards, or Colewortz.German, *Blatterkohl*.—French, *Chou Cabu*.—Spanish, *Cabu*.

Sow seed as for cabbage, in June, July and August in succession. Transplant when one month old into rows three feet apart and two feet apart in the rows. Is closely allied to the Cabbage family, used as greens; grown largely in sandy sections, particularly in the South. *One ounce of seed will produce about 3,000 plants.*

Georgia. Per pkt. 5 cents; oz. 10 cents; lb. \$1.00.

Corn Salad, or Fetticus.German, *Lammersalat*.—French, *Mache*.—Spanish, *Macka Valerianilla*.

Used as a salad. It is sown very early in spring, rows one foot apart, and is fit for use in six or eight weeks. For spring use sow in Sept. and winter in cold-frames, or cover with litter. *One ounce will sow 100 feet of drill.*

Large-Leaved. Per pkt. 5 cts.; oz. 10 cts., lb. 50 cts.

See Special Offers on third page of cover.

Corn—Sweet.

German, *Mais*.—French, *Mais*.—Spanish, *Mais*.

A rich, warm soil is best, especially for the earlier varieties, which ordinarily should not be planted before the middle of May. Successive plantings may be made until July. Plant in hills three or four feet apart each way, according to the height of the variety. *One quart will plant about 200 hills. We supply packets of corn at 10 cts. each.*

SELECTED EARS, TEN CENTS EACH.

See Special Offers on third page of cover.

Golden Self-Blanching Celery.

Celery.German, *Sellerie*.—French, *Celeri*.—Spanish, *Apio*.

(For price on Celery Plants, see Vegetable Plants.)

Sow seeds the first or second week in April in hot-bed or cold-frame. As soon as the plants have attained a height of three inches, transplant in prepared border, setting them four inches apart. In order to secure "stocky" plants, cut off the tops once or twice before again transplanting into richly manured soil, in rows four feet apart, and from seven to nine inches plant to plant. Keep down all the weeds, and as fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with litter, or stored in pits or cold cellars. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row, and to hold them in place tack bits of laths across the rows at the top. The turnip-rooted variety does not require blanching, and may be planted in rows one foot apart. *One ounce of seed produces about 3000 plants.*

	Pkt.	Oz.	$\frac{1}{2}$ Lb.	Lb.
Breck's Boston Market. The best and most popular sort in cultivation . . .	\$0.10	\$0.40	\$0.75	\$2.50

Cress.German, *Gartex und Brunnen Kresse*.—French, *Cresson*.—Spanish, *Masiuerzo*.

Curled, or Peppergrass. The popular sort. Sow thickly in drills in the spring season, when the ground is in good working order. As the plants rapidly run to seed, repeat sowings at intervals of about two weeks. <i>One ounce will sow about 100 feet of drill</i>05	.10	.20	.50
Upland Cress. A perennial variety, flavor pungent, resembling Water Cress. Sow in drills one foot apart, in April05	.10	.25	.75
Water Cress. This succeeds only in damp soils on the borders of ponds or streams, or where its roots are partially submerged in water. Seed should be sown about a quarter of an inch deep. The plants are rapidly propagated by root extension and self-seeding10	.40	1.25	4.50

See Special Offers on third page of cover.

Cucumber.German, *Gurken*.—French, *Concombre*.—Spanish, *Pepino*.**White Spine Cucumber.**

The first planting should be made early in May on partly spent hot-beds; inverted sods form an excellent medium for both planting on and carrying the young plants to their permanent location, or small paper pots can be used. Such plantings are usually ready for transplanting to the open ground in from three to four weeks, and are seldom troubled with the striped bug. Transplanting should be done in the evening, into hills four feet apart each way. Thin out to about four plants to a hill. The seed may be planted in hills late in May, thus giving a succession. For pickles, plant during the last two weeks of June. *One ounce will plant about 50 hills.*

English Frame Varieties.

These are mostly grown by private gardeners. They attain a length of from 12 to 30 inches, and are of fine quality. **Tender and True.** **Blue Gown.** **The Rochford.** Each, per pkt., 25 cts.

Dandelion.German, *Pardeblum*.—French, *Pisse-en-lit*.—Spanish, *Amargon*.

Sow seed in May or June, in drills half an inch deep and 12 inches apart. Cultivate, to keep down the weeds during summer, and the following spring the leaves will be fit to cut. Upon the approach of severe weather cover with litter, which should be removed early the following spring. Dandelion that has been blanched is much more tender and entirely lacks the bitter flavor of the plant matured in the open. The blanching is accomplished by placing two boards inverted V-shape over the rows. *One ounce will sow 200 feet of drill. One pound will sow an acre.*

	Pkt.	Oz.	¼ lb.	Lb.

Musselburgh or Carentan . The famous Scotch sort, large, hardy and distinct	.05	.30	.60	2.00

Lettuce.German, *Lattich-Salat*.—French, *Laitue*.—Spanish, *Lechuga*.

(For price on Lettuce Plants see Vegetable Plants.)

**Breck's Black Seeded Tennisball Lettuce.**

The most easily grown of all open-air plants used for salads. It requires a warm soil that has had a liberal dressing of well-rotted manure and abundant moisture. To be of satisfactory quality, the growth should be rapid and vigorous. Seed may be sown in a frame in February or March, the plants set out as early as the ground can be worked, as light frosts will not injure them. Set the plants nine inches apart in the rows, and 18 inches between the rows. For successive crops sowing may be made every two weeks up to the end of August. To grow Cos successfully the seed must be sown early in a hot-bed, and when large enough transplanted to a cold-frame in order to have good plants ready to set out when the ground becomes workable. They require tying for a few days, when grown, to blanch them. *Breck's Boston Market, Big Boston and Hittinger's Belmont* are varieties especially suitable for growing under glass. *One ounce of seed will produce about 4000 plants.*

	Pkt.	Oz.	¼ lb.	Lb.
All the Year Round . Medium size, firm heads that do not readily run to seed	\$0.05	\$0.15	\$0.40	\$1.25

Yarmouth, N. S. Yours truly,
I. M. LOVITT.

Mushroom.

German, *Champignon*.—French, *Champignon*.—Spanish, *Hongo*.
(Our special offers do not apply to Mushroom Spawn.)

**Mushrooms.**

until the heat runs up to 100 degrees or over and then declines to 90 degrees; when this point is reached it is ready for spawning, which is done by making holes three or four inches deep and 12 inches apart each way; into each hole put a piece of spawn about as large as a hen's egg and fill in the hole with compost. At the end of 10 or 12 days the spawn will have run through the whole bed. There should then be spread over the entire surface about two inches of fresh loam. Over all place a few inches of straw. All that remains to be done is to keep the temperature as near 60 degrees as possible. Ordinarily, if the conditions are right, mushrooms will appear in about six weeks and continue to come for about a month. In the event of the surface of the bed becoming very dry sprinkle it freely with water at a temperature of about 100 degrees. After the crop has been taken off the bed, it should receive a dressing of fresh loam to a depth of half an inch, thoroughly firmed, over the entire surface, and when dry a sprinkling with water as above recommended, and a second crop will soon be had. *A brick of English spawn is sufficient for nine square feet of bed.*

Mushroom Spawn. Original English Milltrack, superior to all others. Lb. 15c.; 50 lbs. \$5.00; 100 lbs. \$9.00.

Mushroom Spawn. Genuine French Virgin. Lb. 50 cts.; 100 lbs. \$45.00.

Mushroom Spawn. American pure culture. Per brick, 25 cts.; per doz., \$2.50.

"How to Grow Mushrooms," by Faulkner, the most practical work, \$1.00. **"Mushroom Culture,"** by Robinson, 50c.

See Special Offers on third page of cover.

Mushrooms may be grown in cellars, out-houses, sheds, under greenhouse benches. The temperature should range between 55 and 60 degrees. Use a mixture of equal weights, fresh horse droppings and loam that has no manure in it. Before placing this mixture in the bed turn it over every day for a week, so that it does not heat violently, and be careful to keep it under cover, so that it cannot get wet. Then begin to make the bed by spreading thin layers of the mixture, and pound each firm, until you have in all a depth of eight to ten inches; leave it thus for a few days

Melon (Musk).German, *Melone*. — French, *Melon*. — Spanish, *Melon*.

Melons prefer a warm, light, sandy loam; being tender, plantings should not be made before the middle of May. Plant about six seeds, half-inch deep, in hills five to six feet apart each way. The hills should have at least a peck of well-rotted compost thoroughly stirred into each of them before the seed is planted. When well grown thin out to three plants in a hill. If an earlier crop than this method of cultivation allows is desired, the directions given for growing early cucumbers may be followed. Slug shot, tobacco dust, coal ashes or dry lime are excellent to sprinkle over the young plants to prevent the attack of insects. *One ounce will plant about 60 hills. Two pounds will plant an acre.*

Martynia.

The seed pods are used for pickling, and should be gathered when green and tender. Plant in the open ground the last week of May in rows two feet apart, making hill one foot apart in the rows; place several seeds in each hill, and when well up thin out to one plant. The seed may also be sown in a hot-bed, and the seedlings afterwards transplanted. *One ounce will plant 50 hills.*

Martynia Proboscidea

**Miller's Cream Musk Melon.**

See Special Offers on third page of cover.

Mustard.German, *Senf*. — French, *Moutarde*. — Spanish, *Mostaza*.

Cultivated for salad. The leaves are used like cress when very young. Sow thickly in rows at different times from April to June, and cut when about two inches high; for use during winter, it may be sown at intervals in boxes, in the greenhouse, or in a frame. *One ounce will sow 40 feet of drill.*

	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Brown or Black. More pungent in flavor than white	\$0.05	\$0.10		\$0.25
Chinese. Leaves twice the size of the ordinary white mustard, of a deeper green, flavor pleasantly sweet and pungent, and desirable as a salad		.05	.15	.30
White London		.05	.10	.25

Nasturtium, or Indian Cress.German, *Indianische Kresse*. — French, *Capucine*. — Spanish, *Capuchina*.

Cultivated both for use and ornament; the seeds while young and succulent are picked and used as capers. The young leaves are also useful in salads. The many beautiful colored flowers, which bloom freely all summer, add a charm to the garden. *One ounce will sow 40 feet of drill.*

	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Dwarf. Good for borders	\$0.05	\$0.15	\$0.50	\$1.50
Tall. Excellent for covering fences, trellis-work, etc.		.05	.15	.50

For complete list of finest flowering sorts, see page 98.

Okra, or Gumbo.German, *Essbarer*. — French, *Gumbo*. — Spanish, *Quibombo*.

This vegetable is of the easiest culture, and grows freely, bearing abundantly in any ordinary garden soil. Sow early in May, in drills two inches deep, thin out the plants to about three feet apart. *One ounce will sow 40 feet of drill.*

White Velvet. Large, creamy-white pods, very tender	.05	.10	.25	.75

**Breck's Yellow Globe Danvers Onion.****Onion.**German, *Zweibel*. — French, *Oignon*. — Spanish, *Cebolla*.

The onion thrives best in rather strong, deep, loamy soil, which should be well enriched with old well-rotted manure or compost, or what is better, deeply trench, add manure the autumn previous to sowing, and lay upon ridges during the winter to soften. Sow the seed thinly in drills about one-quarter inch deep and one foot apart. To ensure quick and safe germination after sowing the seed, the drills should be trod along evenly with the foot, and then raked even, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed. When three inches high, thin to three inches apart. Hoe frequently. Where the hoe cannot be used, the soil should be stirred with the fingers, otherwise weeds will quickly grow up and choke the crop. *One ounce of seed will sow 100 feet drill; four pounds per acre.*

Potato Onions30	1.50	Shallots30	1.50
Top, or Button Onions25	1.25			
Egyptian, or Perennial Tree, for fall planting					1.00

The Yellow Globe Danvers Onion Seed I purchased of you last year gave me excellent satisfaction—from an area of 12 feet by 22 feet I gathered three barrels of good merchantable onions. Other seed included in my order was entirely satisfactory.

Yours truly, M. R. NEWCOMB, Damariscotta Mills, Maine.

Parsley.German, *Petersilie*.—French, *Persil*.—Spanish, *Perejil*.

Soak the seeds a few hours in tepid water, and sow early in the spring in drills one foot apart; thin out the plants to three or four inches apart; a single row forms a very good edging for bed or walks. The seed germinates very slowly, and sometimes two or three weeks will elapse before the plants make their appearance. To preserve in winter, transplant to a light cellar or cold-frame. The Turnip-Rooted variety should be thinned out while the plants are quite young, and afterwards treated the same as carrots. One ounce to 150 feet of drill.

	Pkt.	Oz.	¼ lb.	Lb.
Breck's Green Crest. A splendid sort for frames or open ground	\$0.10	\$0.15	\$0.30	\$1.00
Champion Moss Curled. Leaves beautifully curled, extra fine for garnishing05	.10	.25	.75

Hamburg, or Turnip-Rooted. Roots used for flavoring soups05	.10	.25	.75

Parsnip.German, *Pastinake*.—French, *Panais*.—Spanish, *Pastinaca*.

Sow thick in April, in rows 18 inches apart, and one inch deep, in a rich, deep soil, well manured the previous fall, or with fine manure early in March. When the plants are two or three inches high, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a sufficient quantity for winter use, leaving the rest in the ground until spring to be dug up as required. One ounce for 100 feet of drill; five pounds to an acre.

	Pkt.	Oz.	¼ lb.	Lb.

See Special Offers on third page of cover.

Breck's Selected Strain Gradus Peas.

Peas.

German, *Erbse*.—French, *Pois*.—Spanish, *Chicaros*.

Peas come earliest to maturity in light, rich soils, but for a general crop a deep loam or moderately heavy soil is better. Sow the smooth sorts as early in spring as the ground can be worked, and make successive sowings every ten days, the wrinkled sorts being given the preference as soon as the ground is warmed up. Plantings of the earlier sorts, such as Breck's Excelsior, may be made through July and even up to the 10th day of August with reasonable hope of a crop. Sow in rows, from two to five feet apart, according to the height of the variety. *One quart of peas will sow about 100 feet of drill.*

The seeds of the sorts to which an asterisk (*) is prefixed are wrinkled.

The past season was not a favorable one for the growing of seed Peas, and they are in very short supply. The prices here-in quoted are subject to change without notice.

We supply packets of Peas at 10 cts. each.

Extra Early Sorts.

	Pt.	Qt.	Pk.
Alaska, or Clipper. A smooth, blue, prolific, sweet, extra early . . .	\$0.20	\$0.40	\$2.75

Squash, or Tomato-Shaped. The kind most generally grown for pickling; an excellent sort10	.50	1.75
Sweet Mountain, or Mammoth. Similar in shape to the Large Bell, but of much larger size10	.30	.85

Potatoes.

(Prices subject to market changes.)

Special prices on large quantities quoted on application. Special offers do not apply on potatoes.

Of the many varieties of potatoes that claim public favor, we have selected only a few, and these the best in cultivation. We aim to include in our list only those sorts which we have found by actual test are worthy of cultivation. Orders will be booked as received, and shipped in rotation, after danger of freezing is over; and as potatoes are of a perishable character, we assume no responsibility for damages incurred in transit, but we will, of course, exercise the greatest care to

guard against sudden changes in the temperature. All the potatoes we offer are grown from selected stock especially for seed purposes. They are calculated to give the best results to planters, and when compared with common stocks will more than pay in increased crop for the small extra cost of seed, while the quality will be better and more uniform. Ten to 12 bushels will plant an acre.

	Pk.	Bu.	165 lb. Sack

Radish.

German, *Rettig*, *Radieschen*.— French, *Radis*, *Rave*, *Petit Rave*.— Spanish, *Rabano*.

French Breakfast Radish.

Early Scarlet Globe Radish.

Radishes require a light, rich, sandy loam; heavy or clayey soils not only delay their maturity but produce crops much inferior, both in appearance and especially in flavor. For a constant supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hotbed in February. For winter radishes, sow the seed about beginning of July, and keep the roots during winter in a cool cellar, covered with earth. They should be placed in cold water an hour or so before using. *One ounce of seed will sow 100 feet drill; 10 lbs. per acre.*

	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.

Rhubarb.

German, *Rhabarber*.— French, *Rhubarbe*.— Spanish, *Rhubarbo Bastardo*.

(For price of Rhubarb Roots see Vegetable plants.)

Sow early in the spring in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall, or the following spring, transplant into deep, rich soil about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, planting it at the same distance apart as given above.

Linnæus. Early, large and tender. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.

Victoria. Very large, later than Linnæus. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.

See Special Offers on third page of cover.

Squash.German, *Kurbiss*. — French, *Courge*. — Spanish, *Calabaza Tontanera*.**Hubbard Squash.****Bay State Squash.**

As all squashes are somewhat tender, they should not be planted out until danger from frost is past. They will grow on almost any soil, but a warm, mellow one that has been well manured suits them best. The hills for bush varieties should be about four feet apart; for running sorts, eight feet. Thin out to two plants to a hill, and in the early stages of growth keep well sprinkled with plaster dust. *Bush varieties, one ounce to 40 hills; running varieties, one ounce to 20 hills; two to four pounds per acre.*

Havana. Imported seed10 .30 3.50

Tomato.

German, *Liebsapfel*.—French, *Tomate*.—Spanish, *Tomate*.

(For Tomato Plants see Vegetable Plants.)

The seeds should be sown in a hot-bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out about four or five inches apart in another hot-bed. About the middle of May the plants may be set in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotten manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. One ounce will produce about 2000 plants.

Pkt. Oz. ¼ lb. Lb.

Acme. Very early, medium size, smooth, purplish pink color . . . \$0.05 \$0.25 \$0.60 \$2.00

Breck's Belmont. The best early either for forcing or open ground cultivation, fruit bright scarlet, with few seeds, finely flavored and solid10 .35 1.00 3.50

Turnip.German, *Steckrube*.—French, *Navet*.—Spanish, *Navo Comun*.

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crop, and early in August for a fall and winter crop. A light soil well manured the previous year is the best; no manure should be applied at the time of sowing, unless it be well decomposed compost, or the roots would be liable to be bad-flavored. The ground should be dug or plowed deep and made mellow and fine. Sow the seeds of the flat sorts broadcast, and rake in evenly. After they are well up, thin to six or eight inches apart, and keep them clear from weeds. The Ruta Baga sorts should be sown in drills 15 inches apart, and for winter use may be sown from the 20th of June to the middle of July, on land that has been well manured for other crops in spring; thin out as for the early crop. *One ounce will sow 150 feet drill. Two pounds will sow one acre in drills. One pound will sow one acre broadcast.*

Breck's King Seed Oats.

The King Seed Oats introduced by us have proved a wonderful success. Our many customers who grew them are enthusiastic in their praise. This splendid large variety of oats have filled a long felt want among the farmers and growers of grain. Many planters make the common mistake of sowing oats that are used for feeding purposes and are usually disappointed in their crop.

In Breck's King Seed Oats we have a variety of vigorous growth; the straw is of good length, very firm, does not lodge easily and is wonderfully productive.

Per bushel for \$1.25; 5 bushels for \$6.00; 10 bushels for \$11.50; 20 bushels for \$22.00.

A Field of Breck's "King Seed Oats," growing on World's End Farm, Hingham, Mass.

We append below one of the many testimonials commending the valuable qualities of these oats.

In the photograph of the "King" Oats you will find me standing at full height, which is five feet, eleven inches, and will see at a glance that they are a very tall variety of oats. I consider the straw from these oats worth one-third more than any other variety I have ever known. It is of unusual size, some of the largest stalks being one-half an inch in diameter, consequently they do not lodge like other varieties. I find the fibre of the straw very firm, something like that of Rye straw; the oats are very plump and of very good quality—the best I have ever seen.

Yours truly, C. R. GOODHUE, Foreman World's End Farm, Hingham, Mass.

A field of Breck's "True Turkestan Alfalfa Clover," Grown on Cherry Hill Farm, Beverly, Mass.

BRECK'S TRUE TURKESTAN ALFALFA CLOVER

Alfalfa or Lucerne Clover is now commencing to find favor in the East; hitherto our eastern dairymen and farmers were a little skeptical as to the results obtained from planting this valuable clover. It has been demonstrated that splendid crops may be gathered from sowing Breck's True Turkestan Alfalfa at the rate of *thirty pounds per acre*. Sow in spring as soon as the ground gets warm. Sow broadcast. Do not cover seed too deep.

Alfalfa grows best on a deep sandy loam with a loose sub-soil. The land must be well drained. It is a deep feeder. Plow the ground thoroughly, the deeper the better.

Alfalfa will grow in favorable soil anywhere from sea level to 7000 feet elevation.

It will not thrive on an acid soil; overcome acid condition with lime. Cut when first blossoms appear; cut in afternoon, allow it to wilt, put up in cocks, cover with hay caps, move each day until cured. Do not cut too late.

For dairy cattle there is no forage that equals alfalfa. It is palatable, rich, easily digested.

The feeding of alfalfa hay in winter gives the milk and butter a rich, yellow color.

Price per lb. 30 cts.; per 100 lbs. 28 cts. per lb.

MISCELLANEOUS SEEDS. For Forage Crops, Plowing Under, Etc.

Prices subject to market changes.

Beans, Yellow Soya. A large-growing, yellow-seeded variety, especially suitable for ensilage and plowing under.

Sow at the rate of one bushel per acre. Qt. 20 cts.; pk. \$1.00; bu. \$3.50.

Broom Corn, Long Brush Evergreen. Sow 12 quarts per acre, after danger from frost is passed. It succeeds best in a good, deep, moderately moist soil. Lb. 15 cts.; 10 lbs. \$1.00.

Lupins, Yellow. This succeeds in the poorest soils, and is very valuable for plowing under to improve sandy soil. It makes good forage, either green or as hay. Sow in spring when the ground has become warm, 90 lbs. to the acre. Lb. 20 cts.; 100 lbs. \$10.00.

— **Blue.** Used for plowing under. Lb. 20 cts.; 100 lbs. \$10.00.

Millet, Pearl (*Penicillaria spicata*). A valuable and very productive fodder plant, should not be sown until danger from frost is over. This Millet has frequently been sold at very high prices under the names of *Brazilian Millet* and *Penicillaria Zeaoides*. Drill 18 inches apart, 10 lbs. to acre. Lb. 15 cts.; 100 lbs. \$10.00.

Rape, Dwarf Essex English. Is easily grown and perfectly hardy, and possesses remarkable fattening properties. One acre will pasture 36 head two months, and lambs will make a gain of 8 to 12 pounds a month. *Pigs and cattle are also very fond of it.* Sow in drills, 10 lbs. per acre; broadcast, 15 lbs. per acre. Lb. 15 cts.; 100 lbs. \$10.00.

Spurrey (*Spergula arvensis*). Annual. This plant will grow on land that is too dry and too thin to support clover, and so rapidly that three sowings may be made in one season. The crop may be fed both green and as hay. It is in condition to pasture sheep or cattle on in about six weeks after sowing, and sowings may be made every month from April to August. Sow broadcast, 20 lbs. per acre. Lb. 15 cts.; 100 lbs. \$10.00.

Vetches, Spring Tares (*Vicia sativa*). Sown broadcast at rate of 1 to 1½ bushels to the acre, like wheat or barley, and sometimes mixed with oats for soiling. Used in France and Canada as a substitute for peas. Also ground up into flour, after which it is mixed with wheat flour for making bread. A valuable plant. Qt. 20 cts.; bu. \$3.00.

See Special Offers on third page of cover.

BRECK'S SAND OR WINTER VETCH (*VICIA VILLOSA*) AND GOLDEN CHAFF WINTER WHEAT.

(Our Special Offers do not apply on goods under this heading.)

This mixture of a non-legume and a legume is a very desirable spring green fodder. It will produce excellent crops on poor, sandy soils as well as on good land; grows to a height of four to five feet. It is perfectly hardy throughout the United States, and should be sown in the fall. It is the earliest crop for cutting, being hardier and nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Every dairyman and stock-breeder in the United States should have a field of it, and if you try it once you will never be a season without it. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. If more of the fodder mixture has been produced than can be fed green, the balance may be made into hay.

A Field of Breck's Sand or Winter Vetch and Golden Chaff Winter Wheat growing on Cherry Hill Farm, Beverly, Mass.

Seed for the above field was sown broadcast October 1st, at the rate of three bushels wheat and one-half bushel Vetch to the acre, and was harvested June 15th and produced twelve to fifteen tons green fodder to the acre.

NOTE.—Customers who wish to sow in the spring may use Fyfe spring wheat and spring Vetches (*Vicia Sativa*) in the same proportion per acre.

PRICES (Subject to Market Changes):

Breck's Sand or Winter Vetch, <i>Vicia Villosa</i>, 60 lb. per bu., per bu.	\$6.00
Golden Chaff Winter Wheat, 60 lb. per bu.	2.25

In regard to the merits of the combination of Golden Chaff Winter Wheat and Sand Vetch, will say I think very highly of it; we have seeded about six acres this fall, and regard it as the best early green fodder crop we can raise in New England climate.

Supt. Cherry Hill Farm, Beverly, Mass.

Yours truly,

J. H. LILLIBRIDGE.

See Special Offers on third page of cover.

Breck's Massachusetts Grown Japanese Barnyard Millet (*Panicum Crus Galli*).

OUR SPECIAL OFFERS DO NOT apply on goods under this heading.

Barnyard Millet (*Panicum Crus Galli*) makes a desirable green feed for the first three weeks of August; is an enormous cropper, growing from six to eight feet high. Three crops can easily be had from one seeding in a season; nearly 20 tons of green fodder from three cuttings. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July, broadcast at the rate of 25 lbs. per acre, or in drills 18 inches apart, 15 lbs. to the acre. Price per lb., 8 cts.; per 100 lbs., 7 cts. per lb.

The Massachusetts grown Barnyard Millet purchased from you last spring has given the best of satisfaction. We planted from eight to ten acres, resulting in a crop averaging fully six feet in height—for the amount of acreage, it has certainly given us more fodder to the acre than anything else, outside of corn. We think so well of it that we shall plant ten acres or so every year. Yours truly,
W. A. BLODGETT, Prop. South Lincoln Dairy,
South Lincoln, Mass.

Southern Cow Peas (*Vigna Catjang*). Make Poor Land Rich.

Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Pea is most popular, especially for medium or light soil. They should be sown in May or June, at the rate of one and one-half bushels to the acre, and plowed under as soon as they have attained their full growth. While this crop is very largely grown wherever known, with the results attained from it the wonder is that it is not grown ten times as much as at present. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers. Nitrogen or ammonia in commercial fertilizers is valued at 15 cents per pound.

Clay, or Wonderful. Has matured in New England. 20 cents qt.; bush. \$4.00.
New Era. Early and large yielder. 20 cents qt.; bush. \$4.00.
Southern Black. Immense cropper. 20 cents qt.; bush. \$4.00.
Southern Black Eye. A favorite variety. 20 cents qt.; bush. \$4.00.
Southern Yellow Eye. Early and a heavy cropper. 20 cents qt.; bush. \$4.00.
Whippoorwill. One of the earliest. 20 cents qt.; bush. \$4.00.

Prices subject to
market changes.

Northern Field Peas.

Price subject to market changes.

Peas, Canada or White Field. Unsurpassed as a green feed for milch cows. Sow with oats or Barnyard Millet. Broadcast two bushels peas and two bushels oats per acre or eight quarts Barnyard Millet. Pk. 75 cts.; bush. \$2.50.

— **Black Eye Marrow.** (See page 36.)

— **White Marrow.** (See page 36.)

— **Flat Forage** (*Lathyrus sylvestris*). A valuable perennial forage plant, does well on poor, sandy soil, its deeply penetrating roots enabling it to stand severe drought. The forage is relished by all farm stock. Plant the seeds thinly in drills one foot apart. Per oz. 10 cts.; lb. 60 cts.

Sorghum.

(Our Special Offers do not apply on goods under this heading.)

Twenty-five pounds per acre is sown in drills. For dry fodder, broadcast 100 lbs. per acre.

Early Amber Sugar Cane. Ripens where Indian corn matures. Per lb. 12 cents; per 100 lbs. \$7.00.

Red Kaffir Corn, or Sorghum. Non-saccharine. The plant is low, stocky, perfectly erect. The whole stalks, as well as the blades, cure into excellent fodder, and in all stages of its growth is available for green feed. Per lb. 12 cents; per 100 lbs. \$7.00.

White Kaffir Corn. Per lb. 12 cents; per 100 lbs. \$7.00.

White African Sorghum, African Millet, or White Dhoura. Per lb. 12 cents; per 100 lbs. \$7.00.

See Special Offers on third page of cover.

Panicum Crus Galli, Barnyard Millet.

GRASSES.

A Field of Breck's Special Grass Mixture for permanent mowing and grazing three years after seeding.

Special attention is called to the fact that by advantageous arrangements with the parties who grow the different seeds for us, we are enabled to make a large reduction in the prices of Permanent Pasture and other Grass Mixtures, without impairing the very high standard of purity and germination that we have always maintained.

"And he gave it for his opinion that whoever would make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together."—SWIFT.

We desire to call special attention to the following list of AGRICULTURAL GRASSES, which will, we think, be found very comprehensive, both as to varieties and descriptions. We are devoting a great deal of time to this most important subject, and the department has already become an extensive one with us.

Having learned by experience that the so-called imported grasses which are offered by those making a specialty of them in this country are very far from reliable, both as regards purity and quality, we have found it necessary to import all our seeds of this character direct. We have accordingly made arrangements for our stocks with one of the most prominent growers of Agricultural Grasses on the Continent, who, by virtue of many years' experience in growing seeds of this peculiar character, has become the recognized headquarters for same. This will enable us to furnish our customers with the *very best*, and that which we know to be *free from all adulteration*.

Grasses—Continued.

It seems almost unaccountable that at this day, when the different branches of practical agriculture are seemingly so thoroughly understood, that our American farmers should apparently ignore the importance of sowing upon their fields only those kinds of grasses which are *adapted to the soil and climate*, and which will produce in the shortest length of time a luxuriant crop of the desired character. The list of grasses now in use by most of our farmers can be counted on the fingers of one hand, which showing is indeed a small one, when we take into consideration the many species, valuable because of their respective merits, which should be in constant demand for the various soils and climates of America.

We invite special attention to our "Mixtures" for Permanent Pastures and Mowing Lands, which follow our descriptions. We have endeavored to bring into prominence a few important facts under the head of *Mixtures*, which, we think, cannot fail to be of interest to any one who is concerned in the laying down of profitable pastures, or who desires to obtain large crops of hay of choice quality from his fields.

Awnless, or Smooth Brome Grass (*Bromus inermis*). An erect growing perennial that attains a height of from three to five feet.

It is especially recommended for dry and arid soils where the more delicate grasses will not grow. (Per bushel 12 lbs.)

Creeping Bent or Firoin (*Agrostis Stolonifera*). The distinctive feature of this species is, as the name implies, its compact, creeping, rooting stems. It prefers low bottom-lands, especially if they are somewhat sandy. It is of rapid growth and spreading habit, and the stoloniferous roots form a strong enduring turf, that is positively improved by constant trampling. Being of fine texture, it is one of the most valuable of our lawn grasses. (Per bushel, 15 lbs.)

Meadow Brome Grass (*Bromus pratensis*). A hardy perennial useful in mixtures for both mowing and pasture. It should not be sown alone except in poor soil or dry hillsides. It withstands extreme cold and drought, and if cut before flowering it makes a good hay. (Per bushel 18 lbs.)

Timothy (Herd's Grass or Catstail) (*Phleum Pratense*). Root fibrous on moist soils; on dry soils often bulbous; perennial; flowers in June and July. While this grass is commonly known as Timothy, it is frequently called Herd's Grass, as this is the name under which it was originally cultivated. It is, without doubt, a most valuable grass for hay, especially in the North. It thrives best on moist, loamy soils of medium tenacity. Grows very readily and yields large crops on favorable soils. Should be cut just when the blossom falls. The hay is of best quality, yielding, under favorable circumstances, three or four tons per acre. (Per bushel, 45 lbs.)

Orchard Grass (*Dactylis glomerata*.) Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, the luxuriance of its aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, where the subsoil is favorable, it withstands droughts better than most species on dry sandy soils. It is very valuable to be used in a mixture with Timothy and Clover, and produces splendid crops of hay. This grass is sometimes condemned because of its coarse growth, which is only apparent when in a neglected condition, but with proper management no grass is more valuable. When pastured Orchard Grass should never be allowed to become coarse, but should be kept closely cropped. In this condition it is highly nutritive, and relished very much by all kinds of stock. (Per bushel, 14 lbs.)

Kentucky Blue Grass (Meadow Grass, June Grass, Spear Grass), (*Poa pratensis*). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, and is claimed by some to be the most valuable of all the grasses in our pastures. On the other hand, some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North, while in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. Kentucky Blue Grass requires about two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, hence it is not suited for alternate husbandry, or where the land is to remain in grass two or three years, and be then plowed up. (Per bushel, 14 lbs.)

Red Top (Herd's Grass), (*Agrostis Vulgaris*). Root creeping; perennial; flowers in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the Clover soon disappears, followed by Timothy, after which the Red Top usually takes its place, and with some wild indigenous grass forms a close sward. When sown alone three bushels per acre are required, or 15 lbs. of the clean seed. (Per bushel, 10 lbs.)

Fancy or clean seed per bushel, about 40 lbs.

Orchard Grass.

Kentucky Blue Grass.

Italian Rye (*Lolium Italicum*). This is one of the most valuable grasses brought into notice during the present century. In nutritive value, earliness and quickness of growth after it has been mown, it by far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate husbandry; but as it does not last over two years it

is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile, and tenacious, or of a medium consistency, and on such soils it is said to be one of the best grasses known to be cut green, affording repeated luxuriant and nutritive crops. (Per bushel, 18 lbs.)

Meadow Fescue.

Crested Dog's-Tail.

**To insure a good Hay Crop
use Mapes Grass and Grain
Spring Top Dressing**

**To Stimulate Worn-out
Lawns use Breck's Lawn
Dressing**

Meadow Foxtail (*Alopecurus pratensis*). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. It endures the cropping of cattle and sheep probably better than any other variety of grass, making it, as stated above, well-nigh indispensable in all first-class permanent pastures. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering. (Per bushel, 8 lbs.)

Crested Dog's-Tail (*Cynosurus cristatus*). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures for lawns. (Per bushel, 28 lbs.)

Meadow Fescue, or English Blue Grass (*Festuca pratensis*). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always sown mixed with other grasses. (Per bushel, 15 lbs.)

Sheep's Fescue (*Festuca ovina*). Somewhat creeping; perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suitable for lawn mixtures. (Per bushel, 12 lbs.)

Fine-Leaved Fescue (*Festuca Tenuifolia*). This is really a variety of *Festuca Ovina*, with much finer leaves. It will grow on very dry and inferior soils, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. It stands grazing well, is very hardy, and lasts long, and may therefore be recommended for permanent pasture on high and dry situations. (Per bushel, 22 lbs.)

Tall Fescue (*Festuca elatior*). Root fibrous, somewhat creeping; perennial; flowers in June and July. In appearance this species resembles the *Festuca pratensis*, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils. (Per bushel 15 lbs.)

Sweet Vernal.

Meadow Foxtail.

Hard Fescue.

For prices of Agricultural Grasses and Clovers see page 46.

Red Top.

Perennial Rye Grass.

early spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers. (Per bushel, 24 lbs.)

Hard Fescue (*Festuca duriuscula*). This is one of the best grasses of the Fescue family. It is regarded by some as a variety of the Red Fescue, though taller, and the panicle more open. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists the summer drought, and develops remarkable verdure during winter. It should form a part of every mixture for lawn or pleasure grounds, and for permanent pasture and alternate husbandry. (Per bushel, 14 lbs.)

Red or Creeping Fescue (*Festuca rubra*). This grass is found growing on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated sheep pastures. (Per bushel, 13 lbs.)

Sea Mat Grass (*Ammophila Arundinacea*). Valuable on the sandy seashore, canal and railway banks, etc. Its strong, creeping, matting roots bind the drifting sand into natural embankments against the action of wind and waves. This grass is usually propagated by transplanting in the fall. Where it is necessary to use seed, it should be sown in spring, and ground covered with brush to hold the seed in place until it has taken firm hold. (Per bushel, 15 lbs.)

Upright Sea Lime Grass (*Elymus Arenarius*). Valuable on the sandy seashore, canal and railroad banks, etc. It tends, with its tough, wide-spreading and thickly matting roots, to form natural and permanent embankments, thus serving to prevent the drifting of the sand, and to protect an exposed shore from wind and waves. It is of no agricultural value. (Per bushel, 12 lbs.)

Sweet Vernal (*Anthoxanthum odoratum*). Root fibrous; perennial flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flower stalks till the end of autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant, and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, and is largely used for this purpose. The seeds of this grass are scarce and most difficult to be had TRUE. An inferior variety of *Anthoxanthum* being sometimes offered at a low price by unscrupulous dealers, care ought to be exercised in buying. Our seed is guaranteed to be the true Perennial Sweet Vernal. (Per bushel, 11 lbs.)

Yellow Oat Grass (*Avena flavescens*). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils. The seed we offer is guaranteed to be the true Yellow Oat Grass. (Per bushel, 11 lbs.)

Tall Meadow Oat Grass (*Avena Elatior*). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds best on deep, sandy lands, and is suitable for sowing in orchards or other shady places. (Per bushel, 15 lbs.)

Wood Meadow Grass (*Poa nemoralis*). This grass, as its name implies, is found naturally in woods and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees, on pleasure grounds. Root fibrous, flowers in June and July. (Per bushel, 14 lbs.)

Various Leaved Fescue (*Festuca heterophylla*). A very early hardy perennial, two to three feet high, thriving best in cool, moist soils. It yields heavily and is a valuable grass in mixtures for permanent meadows, either for mowing or grazing. Its great production of root leaves makes it an excellent bottom grass. It grows well in the shade and is suitable to form part of a mixture for shaded lawns. (Per bushel, 15 lbs.)

Rhode Island Bent (*Agrostis canina*). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and for lawns. For the latter purpose it is often sown by itself, and if cheapness is an object perhaps it is as good as could be sown, but we recommend the lawn mixture wherever practicable. Soil and treatment same as for Red Top (*A. vulgaris*). (Per bushel, 10 lbs.)

Fancy or clean seed, per bushel, 40 lbs.

Rough Stalked Meadow Grass (*Poa trivialis*). Root fibrous; perennial. This grass is valuable on account of its quick growth, productiveness, and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the spring, and continues green until late in the fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Does not thrive well on dry soils. (Per bushel, 14 lbs.)

Perennial Rye (*Lolium perenne*). A very valuable grass; arrives early at maturity and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very

Sheep's Fescue.

White Clover.

Millet.

Hungarian Grass (*Panicum Germanicum*). This is a species of millet, growing less rank, with smaller stalks often yielding two or three tons of hay per acre. It is very popular and valuable. Like the common millet, it is an annual, and requires to be sown every season, but will produce a larger return than almost any other crop. (Per bushel, 48 lbs.)

Japanese Millet, Japanese Barnyard Grass (*Panicum Crus Galli*). Distinct from other varieties, enormous cropper, grows six to eight feet high, excellent either green or cured as hay. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July. Broadcast at the rate of 25 lbs. per acre, or in drills 18 inches apart, 15 lbs. to the acre. (Per bushel, about 35 lbs.)

Common Millet (*Panicum Miliaceum*). Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stalks and leaves, and is excellent for forage. For hay, sow broadcast one bushel per acre from May first to August first. For grain, sow in drills, half-bushel to the acre, not later than June 20th. (Per bushel 50 lbs.)

German or Golden Millet (*Panicum Miliaceum var.*). An improved variety, medium early, growing three to five feet high. The heads are closely condensed, though the spikes are very numerous. (Per bushel 50 lbs.)

During the past few years the fact has been established beyond doubt that seed of the German or Golden Millet grown in Southern latitudes will produce a much larger yield of hay than from seed grown in Northern or Western sections of the country, and for that reason is far better for farmers to sow.

Siberian or Russian Millet. A recent introduction and especially recommended for growing in New England. It is quite as leafy and a heavier cropper than Hungarian. (Per bushel 50 lbs.)

Clovers.

There are no plants so valuable for fertilizers as the Clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

Medium Red (*Trifolium pratense*). This is the common Red Clover in general cultivation, and too well known to need a general description. It is by far the most important of all varieties for the practical purposes of agriculture. When sown alone produces hay of splendid quality, and with Timothy or other grasses forms a desirable pasture. (Per bushel 60 lbs.)

Mammoth or Pea Vine (*Trifolium pratense var.*). Grows five or six feet high; its stalks are so coarse and large that stock will eat only the lands which have been exhausted where the common clover will.

Alsike or Swedish (*Trifolium*). This is the most hardy of clovers and is the most cold and extreme drought yields an enormous amount of quality. Can be cut several times in a season. It is well suited to low lands liable to wash, over a large area and hold the rains. The heads are globular, much liked by bees, who obtain them. (Per bushel 60 lbs.)

Lucerne or Alfalfa (*Medicago sativa*). Where this variety succeeds well it is probably the most valuable of all particularly adapted to the East-flourishes in all Western and mellow soil to get it firmly enough fixed will produce a profit. It yields an enormous amount cut when commencing to blossom, it does not exhaust the soil. In States to which it is introduced from Turkestan. It is said to be hardier and more productive than the ordinary variety; much better. (Per bushel 60 lbs.)

Turkestan Alfalfa. Im-ported from Turkestan. It is said to be hardier and more productive than the ordinary variety; much better. (Per bushel 60 lbs.)

White Clover (*Trifolium repens*). The value of this known, and it is to be found in nearly every natural pasture. It is adapted to all soils. Being a deep-rooted plant, it withstands drought on dry, sandy sections. It should form a part of all mixtures for permanent pastures, and is also valuable for alternate husbandry, when these crops are sown down for more than one year. (Per bushel 60 lbs.)

Crimson Clover (*Trifolium incarnatum*). It is also known as Scarlet Clover and Carnation Clover. It is of rapid growth, and of great value where only one crop is desired, sown either alone or with Italian rye grass. It is an immense yielder, and can be fed green or made into hay. It may be sown in the fall for an early summer crop, or in the spring for cutting in July. (Per bushel 60 lbs.)

Yellow Trefoil (*Medicago lupulina*). An annual or biennial suitable for pasture in wet meadows, or for stiff, clayey soils which are too poor for Red Clover. (Per bushel 60 lbs.)

Alsike Clover.

leaves, but by its judicious use can be reclaimed, as it will grow fail. (Per bushel 60 lbs.)

Lucerne or Alfalfa (*Medicago sativa*). This is the fast gaining popularity. It re- and wet, and on rich moist soil hay or pasture of a nutritive times in a season. It is well as its long, fibrous roots spread soil so as to resist the heaviest very sweet and fragrant, and a large amount of honey from

ported from Turkestan. It is said to be hardier and more productive than the ordinary variety; much better. (Per bushel 60 lbs.)

White Clover (*Trifolium repens*). The value of this known, and it is to be found in nearly every natural pasture. It is adapted to all soils. Being a deep-rooted plant, it withstands drought on dry, sandy sections. It should form a part of all mixtures for permanent pastures, and is also valuable for alternate husbandry, when these crops are sown down for more than one year. (Per bushel 60 lbs.)

Crimson Clover (*Trifolium incarnatum*). It is also known as Scarlet Clover and Carnation Clover. It is of rapid growth, and of great value where only one crop is desired, sown either alone or with Italian rye grass. It is an immense yielder, and can be fed green or made into hay. It may be sown in the fall for an early summer crop, or in the spring for cutting in July. (Per bushel 60 lbs.)

Yellow Trefoil (*Medicago lupulina*). An annual or biennial suitable for pasture in wet meadows, or for stiff, clayey soils which are too poor for Red Clover. (Per bushel 60 lbs.)

I have had very good results from seed you sent me in early spring.

Yours truly,

JAMES M. BUTTIMORE, Winchendon, Mass.

For prices of Agricultural Grasses and Clovers see page 46.

Mixtures for Permanent Pastures.

"One thing is certain: that good pasture land is the foundation of the riches of a farm."—SINCLAIR.

The oft-repeated complaints of wornout and exhausted pastures, made to us by some of our best New England farmers, have long impressed us with the fact that there must be something radically wrong with the manner in which our pastures are formed and cared for. Some remedy for this state of matters is imperatively necessary, and it seems to us that one most important line of improvement would be the sowing of a larger number of species of grasses in the laying out of these pastures.

As we have already expressed as our opinion, farmers, as a rule, in preparing their mixtures of grasses to be used in the laying down of permanent pastures, confine themselves to too few varieties, thus failing to arrive at the most profitable results. The chief properties which give value to a grass are nutritive powers, produce, early growth, and reproductiveness (that is, the property of growing rapidly after being cropped). If one species of grass could be discovered that possessed all these qualities in a superior degree to every other, there would be no necessity beyond that of botanical science for us to acquire the knowledge which enables us to distinguish the different species of grasses, the soils and subsoils best adapted to their growth, natural habits, and comparative value; but the results of all experiments have proven that a combination of all the merits and properties which give value to a grass is not to be found in any single species, or in fact in any two or three. In sowing a mixture or a number of different varieties we are but following nature, who can be always depended upon as the best teacher. This can be easily demonstrated by the careful examination of any old, rich, permanent pasture, on which will invariably be found fifteen or twenty species of grass or forage plants growing in great profusion. Where, however, it is left to nature to supply the necessary plants to make a rich and succulent pasturage, a great deal of valuable time is, of necessity, lost, or *seven or eight years* will elapse before the field will *naturally* assume the character of a rich and profitable pasture, while by *artificial* means the same result can be brought about in *one-fourth the time*.

In compiling any table of grasses and clovers to be used for permanent pasture purposes there are several important features to be taken into consideration. First, the proportion of plants which would be produced from the amount of each kind of seed sown should be determined, so that the undue predominance of any particular variety may be avoided. We have given this point special consideration in preparing our mixtures. A selection of grasses should be made that blossom at alternate months of the year, as it is a well-known fact that there is no month from April to September inclusive, in which some of the valuable grasses do not attain their full perfection.

By using a mixture comprising these species, it will be at once apparent that a rich and luxuriant growth will be secured throughout the entire season, which result cannot possibly be obtained if the stereotyped mixture usually recommended composes the sward. It would be almost impossible for us to give a series of tables which would comprehend all the variations of soils, altitudes and climates. We think, however, that those we have compiled will be found sufficiently comprehensive to meet all the contingencies that arise in ordinary farming.

These mixtures, which we recommend only after careful study and consultation with the best authorities, are of little or no value unless the seeds composing them are absolutely pure and true to name. We, therefore, especially request those who desire to obtain the best results from their mixtures for alternate husbandry, mowing lands, and permanent pastures, to avoid the probability of disappointment which would naturally attend the placing of orders with parties who have never given any degree of attention to this most important subject, and buy from us direct (or authorized agents), who are the first in this country to make a specialty of this branch of the seed business. We doubt if a full stock of all the grasses which form the components of our mixture could be found anywhere in the United States outside of our own establishment, and know they cannot be obtained in the same quantities and of equal quality.

In conclusion, we would say, that although pastures be formed in the best manner as recommended by us, with a combination of MANY different species of grasses, yet a judicious mode of treatment afterwards is as necessary to continue their value. By proper stocking and top-dressing, very indifferent pastures may be brought to a state of great fertility; but, on the contrary, the richest pastures by neglect of proper stocking, top-dressing, or by the too frequent repetition of hay crops, will become so unprofitable as to require many years to bring them again to their original value. This fact every practical farmer is well aware of, and after the proper mode of sowing and stocking has been determined on, a suitable top-dressing should be found. Under the head of Fertilizers, in another part of this Catalogue, will be found a reliable top-dressing, which we can strongly recommend as being specially adapted for pastures of this character.

Crimson Clover.

ALTERNATE HUSBANDRY.

Mixtures for Mowing and Grazing Lands.

As the pioneers of grass mixtures in this country, we naturally have great pleasure in learning from day to day and season to season that our remarks under the heading "Mixtures for Permanent Pastures" are fast becoming universally admitted facts; and we predict with confidence that the time is not far distant when the practice of sowing only one or two varieties of grass seeds with the hope of obtaining the best results from it will pass, and the better and more profitable one of following nature's plan be adopted.

Many of our statements regarding Permanent Pasture Mixtures are equally pertinent when applied to Alternate Husbandry. It does not require much thought to convince any practical agriculturist that there is no basis to a system that employs the same quantity and kinds of grass seeds on all occasions, without regard to soil, duration of lay, or the condition in which the crop is to be used. All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that are of slower growth.

If a mixture principally for mowing is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds, when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, consequently, much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it has, however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence, when we see an old field of grass that was originally sown with Timothy, Redtop and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixture practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equaled first crops of Timothy.

In making up the following tables the utmost care has been exercised, and we have no hesitation in recommending them to our patrons.

Special prices for quantities for ten acres and upwards.

While it is true that the mixtures which we have recommended are SEEMINGLY much more expensive than what is commonly used, it should be borne in mind that a vastly increased value is given to the pasture not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ORDINARY sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

PERMANENT GRASS SEED FOR GOLF LINKS.

In order that we might be the better able to serve our friends in making selection of grasses that will give best results on Golf Courses and Putting Greens under the many varied conditions of soil, etc., that exist, our representative visited Prestwick, Bogside, St. Andrews and other principal Golf Links in Scotland, and carefully ascertained particulars as to the kinds of grasses used for the different situations and purposes. The soil and effect of climate on these grasses, as compared with those prevailing in New England, have had due consideration, and we now offer, under the name of the **Prestwick Golf Grasses**, a series of mixtures, modified as experience warrants for our needs, that we are sure surpass any hitherto offered in the United States.

No. 1. For Putting Greens, sow at the rate of 80 lbs. per acre. Per lb. 20 cts.

No. 2. For Courses, light and dry soils, sow at the rate of 50 lbs. per acre. Per lb. 21 cts.

No. 3. For Courses, low and damp soils, sow at the rate of 50 lbs. per acre. Per lb. 19 cts.

See Special Offers on third page of cover.

BRECK'S STANDARD LAWN GRASS SEED.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country.

One quart will sow 300 sq. ft.	Price per qt. \$0.25	One peck will sow 2,400 sq. ft.	Price per pk. \$1.50
" half peck will sow 1,200 sq. ft.	Price per $\frac{1}{2}$ pk. .85	" bush. will sow 10,000 sq. ft.	Price per bush. 5.00
Four bushels will sow one acre.			

Boston Park Lawn Grass.

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them.

Per pound, will sow 700 feet	Price per lb. \$0.35	Per $\frac{1}{2}$ bushel, 16 pounds, will sow 11,200 feet	\$4.50
" peck, 8 pounds, will sow 5,600 feet	2.25	" bushel, 32 pounds, will sow 22,400 feet	8.00
Two bushels will sow one acre.			

Breck's "Shady Spot" Lawn Grass.

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented. Per qt. 25 cts.; pk. \$1.50; bush. \$5.00

Breck's Bank and Terrace Grass Mixture

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt. 25 cts.; pk. \$1.50; bush. \$5.00

Sterlingworth Lawn Compound

Kills the weeds but not the grass and makes the lawn green and velvety.

It seems incredible that a preparation can be made which will kill the weeds in lawns without injuring the grass. This is exactly what "STERLINGWORTH LAWN COMPOUND" will do and also it will help the grass to grow green and greatly improve the sward. It absolutely destroys Dandelions, Plantain, Chickweed and all weeds with hairy surfaces or broad leaves. It is a dry sandy powder to be applied by sprinkling over the grass.

Five pounds will dress 500 to 700 square feet. Full directions for use on each package. Prices: 5 lb. cans. 60 cts., 10 lb. cans, \$1.00; 50 lb. kegs, \$4.00; 100 lb. kegs, \$7.50.

To Stimulate Worn-out Lawns use Breck's Lawn Dressing.

Fibre Saucer Trucks for Large Pots and Tubs.

These are made of Indurated Waterproof Fibre Ware, mounted on castors. They are a great convenience for using with the larger size pots and tubs. Being perfectly waterproof, they are especially suitable for use in parlors, halls, etc. The four smaller sizes have a detachable and strongly made metal base, so that a new saucer can be substituted when one is worn out or broken. The two larger sizes have the castors attached to the bottom.

				Each.	Doz.					Each.	Doz.
12-in.	diameter,	3	castors	\$0.60	\$6.00	18-in	diameter,	4	castors	\$0.95	\$10.00

Folding Wire Plant Stands.

The most compact, strong, durable plant stand ever offered for sale, and at prices less than all others of the same capacity. They pack closer than any other plant stand for shipment. The ends are made of flat steel and have porcelain castors. The steel and iron work is finished in green and bronze. The construction of the shelves or trays are such that there is more room for the pots and foliage than any other plant stand that takes up the same amount of room on the floor.

Sterlingworth Weed Killer.**Before Using****This Picture Shows the Results from Its Use.****After Using**

This preparation is the most powerful and effective weed-killing compound known. It is unexcelled for use on walks, drives, tennis-courts, and golf links, and is used largely in parks and cemeteries, or where the killing of all objectionable vegetation is desired. It is a dry powder to be dissolved in water. It permanently destroys all kinds of weeds, grass (including milk-weed and witch grass), poison ivy, briars, burdocks, dandelions, daisies, thistles. One application kills roots and foliage, preventing further growth until new seed is sown. Do not dig up your walks, drives, and tennis-courts to kill weeds. The cheaper, quicker and less laborious way is to use this Killer.

It is applied with an ordinary watering can. Full directions on every can. Prices: 1 lb. pkg. (makes 10 gal.) 50 cts.; 3 lb. pkg. (makes 30 gal.) \$1.25; 5 lb. pkg. (makes 50 gal.) \$2.00.

**Glazing Points, The Peerless.**

The only durable and reliable points. Made of galvanized steel wire; no rights and lefts. No raising up when driving. Three sizes, Nos. 2, 2½ and 3. The Nos. 2 and 2½ are for general use; the No. 3 for extra heavy work. Price, per box of 1,000, 60 cts. Pincers for driving same, 40 cts.

Brushes, Flat Paint.

For applying tree ink and general use. Thoroughly well made and of good material. ¾ in. wide, 25 cts. each.

Caps, Hay, Breck's Improved.

Brown, medicated, complete with ropes and pins, 50 cts. each; \$48.00 per 100.

Butter Color, Hansen's Danish. This color is famous the world over and is used wherever it is desired to impart the "golden tinge of June" to butter at all seasons of the year. Bottle sufficient to color 500 lbs. of butter, 25 cts.; for 1,200 lbs. 50 cts.; for 2,500 lbs. \$1.00.

Cotton Batting. For packing flowers, etc., per sheet, 6 cts.

Mats, Straw. Hotbeds, 6 x 6, \$1.75 each; 3 x 6, \$1.25. Other sizes to order.

Palmer Hotbed Mat No. 2. Size 76 x 76 in., wool filled and quilted, frost proof, duck, and burlap outside, \$1.50 each.

Paper, Tarred. For use with tree ink, in rolls about 50 lbs., per lb. 4 cts.

Pencils. Wolff's Indelible Garden. For writing on wood labels, with point protector, each, 20 cts.; doz. \$2.00.

Protectors, Arlington Plant. Protects from bugs, borers and fowls, also subdues wind, rain and cold, 15 cts. each; doz. \$1.50.

Protecting Cloth for Hotbeds. Used as a substitute for glass for protecting plants in early Spring; in pieces of 60 yds., 10 cts. per yd.

Putty Bulbs. A simple and useful device for applying putty to sashes, \$1.00 each.

**Arlington Plant Protector****MASTICA.**

We originally introduced Mastica to the horticulturists of New England. It is superior to any and all other preparations for the purpose, and when results and labor in setting or resetting glass are considered it is decidedly the cheapest article to use.

We are the Manufacturers' Distributing Agents for Boston.

For glazing greenhouses, new or old. The use of Mastica avoids the necessity of frequent reglazing. It can be used to bed in or on the outside, with a machine; one gallon will cover about 290 running feet (one side). Gallon cans, \$1.25; half gallons, 65 cts. 6% discount allowed on orders for 6 gallons; 10% discount allowed on orders for 10 gallons. *Net F. O. B. Boston.*

Machines for applying Mastica, \$1.25 each. *Net.*

See Special Offers on third page of cover.

Roffea.

This grass, long used by gardeners for tying plants and bunching vegetables, has been adapted to new uses. While it is likely to hold its place as the best tying material yet produced, there will be a great demand for it for a few years for making baskets, mats, etc. Price, 25 cents per lb.

Garden Gloves. Specially made for garden use. Men's Gauntlet 85 cts. per pr. Ladies' Gauntlet 75 cts. per pr.

"Basket Making." The first book of the "How to Do It Series." Tells all about basket making. It contains over one hundred illustrations of working designs with full particulars of methods. By mail 25 cents.

Silkalene. Used for growing smilax and asparagus on, also for tying in bouquet work, per reel 25 cents; per lb. \$1.25.

Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprinkling bouquets, dampening clothes, etc.; three sizes, 75 cts., \$1.00, and \$1.25 each.

Twenty-three years coming to your store. All I have tried have done well, and I will still get what I need here until I find better—but where can I but at your store?

17 North St., Bridgewater, Mass.

JAMES MURRAY.

Sashes for Hot-Beds.

Extra well made from thoroughly seasoned lumber, frame 1 3/4 in., 3 x 6 ft., \$3.50 each.

Hot-Bed, Sash and Frame, Complete.

For Violets, Flower Seeds and Early Vegetables.

Having received numerous inquiries for a **Hot-Bed Sash** that was light, and easy to handle, we decided that it would be a good idea to construct a **Sash and Frame Complete** that would meet the requirements.

After carefully studying several designs we adopted the one shown in cut, as most desirable in all particulars.

The outside dimensions of **Frame** are three feet one inch long, and four feet eight inches wide, made of one inch **Cypress**; the back piece is nine inches wide and the front piece is six inches wide, grooved together, and held in place by eight strong hooks.

Being fastened together by the hooks enables one to take it apart at the end of the season and store away in a very compact form, which we consider an essential feature, as by so doing the frame may be made to last for years.

The **Sash** is also made of **Cypress** of one and one-half inch stock, put together and glazed in the very best manner. On the under side of **Sash** is fastened a cleat, one inch from the outer edge, all around, thus forming a rabbet which makes the frame very tight, preventing the cold air from entering or the heat escaping.

The construction of the frame is so simple that any one with a hammer and screwdriver can put it together in a few minutes. We furnish hinges and screws for attaching the sash to back of frame; also the hook and eyes for corners.

In offering this **Special Hot-Bed** to our customers we feel that we have something that will give entire satisfaction and will supply a long felt want.

Our price for **Frame and Sash** complete is **only** \$6.00 delivered at the railroad in Boston.

Sieves, Wire. For preparing potting soil, sifting loam, gravel, etc.; 16, 18, 20, 24 inches diameter; 75 cts., 90 cts., \$1.15, \$1.50 each, respectively.

Soil, Peat, Leaf Mould, Etc.

Prepared Potting Soil. Specially prepared with **peat, leaf mould, loam, sand and fertilizer.** Pk., \$0.30; bush., \$1.00; bbl., \$2.00, **net.**

Peat, Rotted Fibrous. Fine, light and sweet. For some varieties of plants this is invaluable. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, **net.**

Leaf Mould. Vegetable humus, a desirable addition to all soil used for potting. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, **net.**

Silver Sand. For rooting cuttings and mixing with potting soil. Pk., \$0.50; bush., \$1.50, **net.**

Fern Root or Orchid Peat. Bush., \$1.50; bbl., \$3.00, **net.**

Sphagnum Moss. Per bag of 2 bush., \$1.00

Tape, Electric. Exceedingly useful for mending rubber hose. It is a strong, adhesive ribbon, three-quarters of an inch wide, can be wound tightly around a leaking part and thus stop it. Per coil, 25 and 50 cts.

Tinfoil. For bouquets. Per lb., 15 cts.

Twine. Soft, for tying cut flowers, vines, etc. Per ball, 25 cts.

Twine, Parcelling. All sizes. Per ball, 10 to 25 cts.

Wax Grafting. (Trowbridge's.) The best in the market. This brand should not be confounded with the many cheap makes now offered, that are not possessed of an even consistency, and give unsatisfactory results. Put up in 1 lb., 1/2 lb., and 1/4 lb. packages, price 40 cts., 25 cts., and 15 cts., respectively.

Wire, Bouquet. Bright, cut in lengths of nine and 12 inches, in boxes of 12 lbs. (one stone) each.

SPRAYING CALENDAR.

This calendar, in a concise way, gives our friends the benefit of the many experiments made by the Agricultural Colleges of the country for a number of years. It is believed they can be followed without danger to the crops and much profit to the grower.

The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If the crops are not affected at the time advised, the spraying is unnecessary. Know the enemy and the remedy, and apply them at the proper season, keeping in mind the fact that good judgment and prompt and persistent action is more necessary to success than any definite rules.

The applications to which an asterisk * is prefixed are of most importance.

PLANT.	First Application.	Second Application.	Third Application.	Fourth Application.
Apple. Scab, codlin moth, bud moth.	When buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. For bud moth, Arsenites when leaf buds open.	*When blossoms have fallen, Bordeaux and Arsenites.	8-12 days later, Bordeaux and Arsenites.
Cabbage. Worms, aphids.	*When worms or aphids are first seen, Kerosene emulsion.	7-10 days later, if not heading, renew emulsion.	*7-10 days later, if heading, hot water 130° F.	Repeat third in 10-14 days if necessary.
Carnation. Rust and other fungous diseases, red spider.	*When rust is first noticed, Bordeaux. Kerosene emulsion when red spider is first seen.	*For rust repeat first in 10-14 days. For red spider repeat in 3-4 days.	Repeat second, using the Ammoniacal carbonate of copper if plants are in bloom.	Repeat second as before if necessary.
Cherry. Rot, aphids, slug.	As buds are breaking, Bordeaux; when aphids appear, Kerosene emulsion.	When fruit has set, Bordeaux. If slugs appear, dust leaves with air-slaked lime. Hellebore.	10-14 days, if rot appears, Bordeaux.	10-14 days later, Ammoniacal copper carbonate.
Currant. Mildew, worms.	*At first sign of worms, Arsenites.	*10 days later, Hellebore. If leaves mildew, Bordeaux.	If worms persist, Hellebore.	
Gooseberry. Mildew, worms.	*When leaves expand, Bordeaux. For worms, as above.	*10-14 days later, Bordeaux. For worms, as above.	*10-14 days later, Ammoniacal copper carbonate. For worms, as above.	*10-14 days later repeat third.
Grape. Fungous diseases, flea beetle.	In spring when buds swell, copper sulphate solution. *Paris green for flea beetle.	*When leaves are 1-1½ inches in diameter, Bordeaux. Paris Green for larvæ of flea beetle.	*When flowers have fallen, Bordeaux. Paris Green as before.	*10-14 days later, Bordeaux.
Nursery Stock. Fungous diseases.	*When first leaves appear, Bordeaux.	*10-14 days, repeat first.	10-14 days, repeat first.	10-14 days, repeat first.
Peach Nectarine Apricot. Rot, Mildew.	*Before buds swell, copper sulphate solution.	Before flowers open, Bordeaux.	*When fruit has set, Bordeaux.	*When fruit is nearly grown, ammoniacal copper carbonate.
Pear. Leaf blight, scab, psylla, codlin moth.	As buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. Kerosene emulsion when leaves open for psylla.	*When blossoms have fallen, Bordeaux and Arsenites. Kerosene emulsion if necessary.	*8-12 days later, repeat third.
Plum. Fungous diseases, curculio.	*During first warm days of early spring, Bordeaux for black knot. When leaves are off in the fall, Kerosene emulsion for plum scale.	*When buds are swelling, Bordeaux for black knot and other fungous diseases. During mid-winter, kerosene emulsion for plum scale.	*When blossoms have fallen, Bordeaux. Begin to jar trees for curculio. Before buds start, Kerosene emulsion for plum scale.	*10-14 days later, Bordeaux. Jar trees for curculio every 2-4 days. For San Jose scale, Kerosene emulsion when young appear spring and summer.
Potato. Scab, blight, beetles.	*Soak seed for scab in corrosive sublimate solution, 2 oz. to 16 gals. of water, for 90 minutes.	*When beetles first appear, Arsenites.	*When vines are two-thirds grown, Bordeaux. Arsenites for beetles if necessary.	10-15 days later, repeat third.
Raspberry. } Blackberry. } Dewberry. } Anthracnose, rust.	Before buds break, copper sulphate solution. Cut out badly diseased canes.	During summer, if rust appears on leaves, Bordeaux.	Repeat second if necessary.	*Orange or red rust is treated best by destroying entirely the affected plants.
Rose. Mildew, black spot, red spider, aphids.	For mildew. *Keep heating pipes painted with equal parts lime and sulphur mixed with water to form a thin paste.	For black spot. *Spray plants once a week with Ammoniacal copper carbonate, using fine spray.	For red spider. *Spray plants twice a week with kerosene emulsion. Apply to under side of foliage.	For aphids. *Spray affected parts with Kerosene emulsion when necessary.
Strawberry. Rust	*As first fruits are setting, Bordeaux.	As first fruits are ripening, Ammoniacal copper carbonate.	*When last fruits are harvested, Bordeaux.	Repeat third if foliage rusts.
Tomato. Rot blight.	At first appearance of blight or rot, under glass or out of doors, Bordeaux.	Repeat first if diseases are not checked.	Repeat first when necessary.	

For Aphides or Plant Lice use Kerosene Emulsion on all Plants.

Breck's Victor Fly Driver.

The *Rural New Yorker* says: "Fly time is with us again and no small expenditure will bring back so large a profit as a few dollars invested in some of the good fly preparations to make the cows comfortable and happy. The result will show in the milk pail." **This of course applies directly to Victor Fly Driver.**

Safe to use, thoroughly effective and cheaper than any other first class preparation for the purpose on the market. Put up in 1 gal. cans only.

PRICE

1 Gal. Can						\$0.75
Per case of 1 Dozen Cans	7.50

Gentlemen: — Please send me by American Express two cans of Victor Fly Driver. I have tried three kinds, but there is none as good as yours.

Yours truly,

J. S. MUNROE, Lexington, Mass.

Insecticides and Fungicides.

In general terms: **ARSENATE OF LEAD and PARIS GREEN** are specifics for leaf eating insects.

KEROSENE EMULSION, TOBACCO, WHALE OIL SOAP for sucking insects.

BORDEAUX MIXTURE

Arsenate of Lead, Swift's. The safest and best insecticide for leaf-eating insects. If applied according to directions it will not injure the foliage; *one pound to 10 gallons of water has been used on young, tender leaves without scorching or burning them.* It adheres to the foliage for weeks. It is white in color; sprayed foliage may thus be distinguished from unsprayed at a glance. *It can be used with Bordeaux Mixture.* See directions on each package. 1-lb. bottles, per lb. 20 cts.; 2-lb. bottles, per lb. 19 cts.; 5-lb. pails, per lb. 18 cts.; 10-lb. pails, per lb. 16 cts.; 20-lb. pails, per lb. 15 cts.; 50-lb. kegs, per lb. 13 cts.; 100-lb. kegs, per lb. 12 cts.; 550-lb. bbls., per lb. 10 cts.

Aphis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc., contains no ammonia and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine) 60 cts.

Breck's Liquid Anti-Ants. A preparation that destroys or drives away ants from lawns, trees, etc. ½ pt. 30 cts.; pt. 50 cts.

Breck's Dalmation Insect Powder. ("Bubach.") Manufactured especially for us from clean, dried flowers. It is put up in air-tight packages and keeps its strength indefinitely. It is invaluable to the housekeeper for the destruction of flies, fleas, roaches and other noxious insects. Four sizes, 10, 15, 25 and 40 cts. In bulk, lb. 30 cts.

Bordeaux Mixture, Dry, Acme Brand. Ready for use by simply adding water. Bordeaux Mixture, is, we believe, the best fungicide known, and is really a specific for the blight and other diseases attacking potatoes, tomatoes, grapes, apples, pears, etc. 1-lb. box makes 5 gallons spray, 25 cts.; 5-lb. box makes 25 gallons spray, \$1.00; 25-lb. box for \$4.25; 50-lb. box for 8.00; 100-lb. box for \$15.00.

Bordeaux Mixture, Liquid, Acme Brand. We consider this the best concentrated Bordeaux Mixture on the market. One gallon makes 50 gallons of Bordeaux by simply adding 49 gallons of water. It does not clog the nozzle and adheres to the leaves. Full directions on cans for use. 1-qt. cans, 35 cts.; 1-gal. cans, \$1.00; 5-gal. jacket for \$4.50; 10-gal. for \$8.00; 25-gal. for \$18.00; 50-gal. bbl. for \$34.00.

Bug Death. (The prices quoted on this article are *net*, and not subject to either of our special offers.) A patented, *non-poisonous powder*, entirely different from anything yet offered for the purpose, and as effectual as Paris Green. It is sure death to the potato, squash and cucumber bugs, currant and tomato worms, also other plant and vine-eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendency to assist growth. For potatoes a 12½-lb. package is sufficient for an acre. Bug Death may be applied with a shaker or mixed with water and sprayed. 1-lb box, 15 cts.; 3-lb. box, 35 cts.; 5-lb. box, 50 cts.; 12½-lb. box, \$1.00; 100-lb. keg, \$7.50.

Where orders are accompanied by cash WE DELIVER FREE to any Post Office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted:—

Vegetable and Flower Seeds at the package, ounce, ¼ pound, ½ pound and 1 pound prices.

Bulbs at the single and dozen rates.

Books and other publications.

If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to the price, at the rate of 8 cents per pint and 15 cents per quart.

See Special Offers on third page of cover

- Creosote Mixture.** This mixture is sure death to the eggs of the Gypsy Moth, Tussock Moth and similar insects. Made on the formula used for years, and recommended by the Massachusetts Gypsy Moth Committee. 1 qt. 20 cts.; 1 gal. 50 cts.
- Dip, McDougall's Sheep.** An effective, non-poisonous preparation for killing vermin on sheep, cattle and domestic animals. Per lb. 50 cts.; $\frac{1}{2}$ gal. \$1.50; 1 gal. \$2.50.
- Dip, Cooper's Sheep.** A world-famous preparation, in powder form. It is easily carried, quickly prepared and most effective. Large pkg. sufficient to make 100 gals., \$2.00; small pkg. to make 25 gals., 50 cts.
- Disparene.** A powerful remedy for all leaf-eating insects; will not injure foliage and adheres a long time. 1 lb. 25 cts.; 2 lbs. 40 cts.; 5 lbs. 90 cts.; 10 lbs. \$1.70; 25 lbs. \$4.25; 50-lb. keg, \$8.00.
- Eciffo.** A sure cure and prevention of water-bugs, cockroaches, etc. Per tin, 50 cts.
- Fir Tree Oil, Soluble.** An invaluable preparation for destroying all insects and parasites that infest fruit trees, plants and animals, whether on the foliage or at the roots of the plants. Per gal. \$4.00; per qt. \$1.25; pt. 75 cts.; $\frac{1}{2}$ pt. 50 cts.
- Fungiroid and Paris Green Compound.** An insecticide and fungicide combined. Kills potato bugs and prevents blight; easily applied and desirable for fruit trees, etc. 1-lb. box 30 cts.; 3 lbs. 75 cts.
- Grape Dust.** Destroys mildew on grape vines. Can also be used in the garden for mould, mildew or rust mites. 5-lb. pkg. 35 cts.
- Hellebore, Breck's Pure Powdered.** We furnish a guaranteed pure article, ground from fresh roots. It is easily applied either in liquid or powder form, and destroys currant worms, rose slugs, etc. Each package has special directions for its effective use. Packed in three sizes, air-tight packages, 10, 15, 25 cts. each.
- Kerosene Emulsion, Acme Brand.** This is a concentrated article for successful use against scale and all soft bodied sucking insects such as *San Jose Scale*, *Plum Lecanium*, etc. Dilute 10 to 12 times for plant lice and soft-bodied bugs. Use strong solution for scale insects. Pt. can 20 cts.; qt. can 35 cts.; gal. can 75 cts.; 5-gal. can \$3.25.
- Kno-Worms, Breck's.** A famous preparation that is much used on the lawns and the putting greens of Scotch golf courses. It not only destroys the worms, but prevents their increase and reappearance. It is a concentrated liquid and is ready to apply when diluted with 100 parts of water. It is effective against cut worms in the garden and ant hills on the lawn or elsewhere. 1 qt. makes 25 gallons solution, 50 cts.; $\frac{1}{2}$ gal. makes 50 gallons solution, 85 cts.; 1 gal. makes 100 gallons solution, \$1.50; 5 gals. makes 500 gallons solution, \$6.50.

Lime and Sulphur Spray, Breck's. The most widely used and recommended remedy for San Jose Scale. *San Jose Scale* is the worst pest of the 20th century. Our Agricultural Experiment Stations have recommended the use of Lime and Sulphur mixture as being generally satisfactory in preference to all other mixtures. BRECK'S LIME AND SULPHUR SPRAY is offered as a convenient and most effective remedy for this pest. It is ready for use by simply adding water. No heating is necessary. Lime and Sulphur is also recommended for Peach Leaf Curl, Ground and Bitter Rot, Smuts, Scabs, Leaf Spot, etc. It is also an insecticide of value when used against the Caterpillar and Canker Worm, the *larvæ* of the Codlin Moth and Bud Moth, and other pests. One gallon of Breck's Lime and Sulphur Spray makes 20 gallons. Full directions with each package.

Prices. 1-qt. cans, 30 cts.; 1-gal. cans, 75 cts.; 5-gal. jacket cans, \$2.25; 10-gal. jacket cans, \$4.00; 25-gal. kegs, \$6.50; 50-gal. barrels, \$12.00. Special price on large lots.

London Purple. For spraying fruit trees, potatoes, etc. 1 lb. 20 cts.

Lemon Oil. An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt. 50 cts.; qt. 80 cts.; gal. \$2.25.

Nicotinic Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip, mealy bug, red spider, etc. The vapor does not alter the natural color or scent of the flowers. Gal. can, \$15.00; 1 pt. for 32,000 cubic feet, \$2.50; $\frac{1}{2}$ pt. for 16,000 cubic feet, \$1.25; $\frac{1}{4}$ pt. for 8,000 cubic feet, 70 cts.

HOW TO MEASURE THE HOUSE.—To ascertain how many cubic feet there are within any greenhouse, etc., multiply the length in feet by the breadth in feet, then by the average height; the result being the number of cubic feet.

Fumigators for Vaporizing "Nicotinic." These consist of stand, pan and lamp. The set 50 cents. In a large house one fumigator should be used for every 5,000 cubic feet, distributing them evenly over the house and using all simultaneously.

"Nico-Fume" is especially effective against Aphides ("Green Fly" and "Black Fly") and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: 24 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

"Nico-Fume" Liquid. $\frac{1}{4}$ pt. can 50 cts.; pt. can \$1.50; $\frac{1}{2}$ gal. can \$5.50; gal. \$10.50.

Nikoteen. Packed in pint bottles; each bottle contains all the nicotine obtained from 200 pounds of tobacco stems. A cheap, clean and safe insecticide. Can be applied by fumigation, or applied locally, diluted as a spray. Pt. bottle, \$1.50.

Paris Green, Guaranteed Pure. This is the highest grade of Paris Green it is possible to make. It is manufactured from pure material and is always of uniform quality. Be careful of cheap greens and so-called new methods. These products are liable to burn and scorch the leaves. $\frac{1}{4}$ lb. 15 cts.; $\frac{1}{2}$ lb. 20 cts.; 1 lb. 35 cts. Subject to market changes.

Pyrax, Bowker's. A combined insecticide and fungicide for use on fruit trees, shrubs and vines, kills leaf and fruit-eating insects, and prevents scab, rot, mildew, etc. "It sticks like paint." 1 lb. 25 cts.; 5 lbs. \$1.00; 10 lbs. \$1.75; 25 lbs. \$4.00; 50 lbs. \$7.50.

See Special Offers on third page of cover.

**"TARGET BRAND" SCALE DESTROYER.
FOR SAN JOSE SCALE.**

This preparation is a soluble oil which positively **destroys and prevents San Jose Scale**. In exhaustive test with other similar materials it has proven far superior.

"Target Brand" Scale Destroyer dilutes instantly in any kind of water and will not separate. It kills scale by suffocation, forming a very thin waxy film on the limbs and branches of the trees. Being perfectly neutral and **containing no crude oil**, it cannot injure the most delicate growth. It has no caustic action and cannot injure hands, eyes, body, clothing or spraying apparatus; also possesses no disagreeable odor.

DIRECTIONS.—Dilute 1 to 20 for winter treatment; 1 to 25 for fall and late spring treatment; 1 to 40 for summer treatment.

Prices, qt. 35 cts., $\frac{1}{2}$ gal. 65 cts., gal. \$1.00, 5 gals. \$3.75, 10 gals. \$7.50, 25 gals. \$14.00, 50-gal. bbl. \$25.00.

Slug Shot. Not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. Price, 1-lb. boxes 15 cts., 5-lb. pkg. 35 cts., 10-lb. pkg. 65 cts., in barrels of about 225 lbs., per lb. 5 cts.

Soap Spray, Imperial. This spray contains no mineral poisons, but *does* contain vegetable poisons, harmless to plants, but peculiarly effective against Red Spider on fruit, etc., Rose Rug, White, Black and Green Fly, Mealy Bug, Thrip, Aphis, and other insect pests, on fruit, flowers and foliage. It sticks but can easily be washed off fruit before marketing. It does not spot leaves. Harmless to animals eating orchard grass. Largely used for general tree and shrub spraying against elm-leaf beetle, etc. Qt. 50 cts., gal. \$1.50, 5-gal. can \$6.00.

Soap, Pinner's Tobacco. Manufactured from the essential oil of tobacco, for the destruction of all insects, parasites and their eggs. Per lb. 50 cts., $\frac{1}{2}$ lb. 30 cts.

Soap, Whale Oil, and Potash. Breck's Special. For the destruction of San Jose scale and all sucking insects. Lb. 15 cts., 14-lb. bucket \$1.50. Special prices on kegs and casks.

Soap, Sulpho-Tobacco. (Patented.) A superior insecticide and fertilizer. Non-injurious to the tenderest growth. Kills all insect life in the window-garden. Unsurpassed for rose bushes. For domestic purposes, it is valuable as an exterminator of moths, cockroaches, carpet bugs, and is a superior wash for dogs and all animals. Every insect will succumb to this insecticide. 3-oz. cake 10 cts., 8-oz. cake 20 cts., 10-lb. can \$3.00.

Soap, Fir Tree Oil. This article contains no poison, yet it is quite effective in destroying red spider, mealy bug, aphids, etc. $\frac{1}{2}$ -lb. tin 25 cts., 2-lb. tin 75 cts.

Sulphate of Copper. (Blue Stone.) Per lb. 12 cts. Subject to market changes.

Sulphur, Flowers of. Used to prevent and cure mildew on plants. 8 cts. per lb., \$6.00 per 100 lbs. *Net.*

Tobacco Dust. This article varies as much in quality as do cigars. To produce effective results the right kind, and in suitable mechanical condition, must be used.

Fine Ground Black. For dusting on plants, animals, in poultry houses, etc. Per lb 10 cts., 100 lbs. \$4.00. *Net.*

Fumigating Brand. (*The kind that burns.*) This is used by gardeners and florists and poultrymen for fumigating greenhouses, poultry houses, etc. It can be readily lighted and consumes itself without making a flame, throwing off great quantities of smoke. Per lb. 10 cts., per 100 lbs. \$4.00. *When ordering please state kind wanted.*

Tree Tanglefoot.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destructive work of the wire and cut worms. \$1.00 per 30-lb. sack, \$2.50 per bale, \$25.00 per ton. *Net.*

XL-All Vaporizing Compound. This is an English preparation, that at the first glance has a high-priced appearance. The safety with which it can be used, its never-failing effectiveness and the ease with which it can be applied as an insecticide place it at the head of the first rank. It is cheaper, results considered, than any other vaporizing compound and there is no other like it. Its action is positive on *Mealy Bug, Thrip, and all kinds of Aphis*. Price per bottle No. 1, \$6.50; No. 2, \$3.25; No. 3, \$1.65; No. 4, 90 cts. The smallest bottle is sufficient to fumigate 5,000 cubic feet.

Fumigators. With lamp for vaporizing. Large, \$1.00; medium, 85 cts.

Tree Tanglefoot. A perfect safeguard for trees, vines, and shrubs against Gypsy, Brown-Tail, and Tussock Moth, Canker Worm, Cut Worm, Ants, and other creeping insects. **GYPSY AND BROWN-TAILED MOTHS**—Apply as soon as the foliage begins to appear. Should be applied to the body of the tree to form a continuous sticky band around the tree trunk at least 1-16 to 1-8 inch thick, and from 3 to 5 inches wide. Apply it high enough from the ground so as to be out of the way of children and animals. Before applying remove all loose bark from the surface to be coated. Apply with a small wooden paddle. The bark should be dry when applied. Do not heat, but apply it directly from the can. 1-lb. can 30 cts., 3-lb. can 85 cts., 10-lb. can \$2.65, 20-lb. can \$4.80.

Tree Burlap. 10 inches wide, for girdling trees. 5 cts. per yard 100 yards 4 $\frac{1}{2}$ cts. per yard.

See Special Offers on third page of cover.

Dusters, Tin. These have finely perforated bottoms for applying Paris Green, Slug Shot, etc. 20 cts. each. *Net.*

Dickey's Bug Death Shaker. The best thing in the way yet offered. Every person who has a garden will want one. Price, 25 cts. *Net.*

Powder Puff, Scollay's Insect. This is a large, strong rubber bulb, with long metal neck and distributor set at an angle that enables the operator to apply either powder or liquid over or under the leaves. \$1.25 each

FERTILIZERS.

BRECK'S LAWN AND GARDEN DRESSING.

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is manufactured expressly for us and we vouch for its containing all the constituents required to produce a luxuriant growth. We believe beyond a question that ours is the only absolutely odorless Lawn Dressing. It is also so clean that the most fastidious person can apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a finer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year, from April to November, as often as the grass seems to need nourishment. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flower beds and all vegetable crops as for the lawn.

BRECK'S MARKET GARDEN MANURE.

Not subject to our special offers, but a discount of 5% may be deducted when cash accompanies order.

A high grade, properly balanced, chemical fertilizer that is especially recommended to market gardeners and farmers for potatoes and all vegetable crops. We sold large quantities of it last year, and already we have had many testimonials, also increased orders from those who had it for use this spring. *It is beyond a question the best value offered in Chemical Fertilizers.* 50 lbs., \$1.00; 100 lbs., \$1.80; ton, \$34.00.

R-R LAND LIME (HYDRATED).

R-R Land Lime is specially prepared for use on the soil, and is an unusually pure calcium lime, being made from a lime-stone which analyzes from 93 to 97 per cent. calcium carbonate (CaCO_3), with less than 2 per cent. magnesian carbonate (MgCO_3). It is a combination of calcium hydrate and calcium carbonate, made in accordance with the recommendations of the various Agricultural Experiments Stations. It is shipped in the form of a fine white powder in 100-pound cloth bags. This form is most convenient, as it is ready for immediate distribution on receipt or will keep indefinitely when stored in a dry place; size and shape of package admit easy handling; loss of time and labor necessary to slake and sift ordinary lump lime is obviated, and the fineness removes all danger of breaking machinery of a spreader. 100 lb. bags, \$1.00; per ton, \$14.00. Price on application for car lots.

UNLEACHED HARD WOOD ASHES.

Our trade in this valuable fertilizer has grown to such an extent that we have for a number of years had an experienced agent employed in Canada collecting the purest, driest and choicest grade of Hard Wood Ashes that is obtainable. We guarantee the percentage of potash and to insure against too much water we accept none that contain more than 12 per cent. moisture. *We quote special prices on carloads in bulk delivered anywhere.* Price, per ton, in sacks, f. o. b. Boston, \$18.00 net; per sack of 100 lbs., \$1.25.

See Special Offers on third page of cover.

Pulverized Sheep Manure—Ram's Head Brand.

We recommend Ram's Head Brand Sheep Manure for all purposes where a high-class fertilizer is required. It is pure and unadulterated, and gathered from sheep corrals where they have been under cover, hence retaining its fertilizing requisites. As a top dressing for lawns it is unequalled, it can also be used with splendid success on golf courses and tennis courts, as well as on plants indoors. For lawns and tennis courts it should be put on at the rate of 500 to 600 pounds to the acre.

Price per ton, \$35.00; 100 lb. bag, \$2.00; 50 lb. bag, \$1.25; 5 lb. pkg., 30c.

Scotch Soot

This is much used by florists and gardeners, both as a fertilizer and fungicide. Mixed with Flowers of Sulphur (two-thirds soot, one-third sulphur) there is nothing better to prevent and cure mildew. Used as a fertilizer either in the dry state or in liquid, it quickly promotes growth. Per bag of about 2½ bu. \$2.50

For the past two or three years I have had your sheep dressing for my lawn, and it is the very best dressing that I know of.

GEORGE S. SMITH,
Newton Centre, Mass.

Fine Ground Fertilizer Bone.

We have a high grade of this valuable fertilizer especially prepared for us. It is useful for all crops but especially for grass lands and Fruit Trees. Per 50 lb. bag, \$1.25; 100 lbs. \$2.00; per ton, \$32.00, NET F.O.B. BOSTON.

Inch or Grape Bone.

This is an unmanipulated bone, broken into pieces that vary in size from one-quarter to an inch. It is unsurpassed as a lasting fertilizer for grape vines, fruit trees, shrubs and trees of all kinds. It should be used liberally in grape vine borders and when setting out vines and fruit trees. Mix with the soil to a depth of one foot or more. Price \$2.00 per 100 lbs.; \$38.00 per ton.

See Special Offers on third page of cover.

MAPES MANURES.

These Manures and Superphosphates are fine, dry, in superior mechanical condition for use in machine drills, or for application by hand. Packed in 100 lb. bags. Each bag is plainly branded, besides having a tag attached, upon which is printed the *Guaranteed Analysis and full directions*. The basis of the Mapes Manures is Bone; no Rock used. We are the sole Boston agents. Full information mailed free. Prices are NET, F. O. B., BOSTON.

Picture showing crop Green Mountain Potatoes grown with Mapes Potato Manure, one acre, 381 bushels.

Potato Manure. Ammonia, 4.50 to 5 per cent.; phosphoric acid, 8 to 10 per cent. (soluble and available, 8 per cent.); soluble potash, actual, 6 to 8 per cent., all as high grade sulphate and in forms free from muriates (or chlorides); magnesia, lime, etc., 77 to 81 per cent. For Irish and sweet potatoes, also for asparagus, early vegetables, tomatoes, sugar beets, fruits sorghum, sugar cane, sweet corn, etc. For bag of 100 lbs., \$2.35; five bags and over, \$44.00 per ton.

Economical Potato Manure. Ammonia, 4 to 5 per cent.; phosphoric acid, 6 to 8 per cent. (soluble and available, 4 to 5 per cent.); soluble potash, actual, 8 to 10 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). Per bag of 100 lbs., \$2.30; five bags and over, \$41.00 per ton.

Fruit and Vine Manure. Ammonia, 2 to 3 per cent.; phosphoric acid, 7 to 9 per cent. (soluble and available 5 to 7 per cent.); soluble potash, actual, 10 to 12 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). For insuring fruiting power, particularly in quality of fruit in vineyards (grapes), pears, apples, plums, strawberries, and all small fruits. Is slow in effects. Per bag of 100 lbs., \$2.45; five bags and over, \$45.00 per ton.

Vegetable Manure, or Complete Manure (for light soils). Ammonia, 6 to 8 per cent.; phosphoric acid, 8 to 10 per cent. (soluble and available, 6 to 8 per cent.); soluble potash, actual, 6 to 8 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). This is our special manure on all kinds of soils, for truck, early vegetables, onions, celery, tomatoes, also on light soils for oats, hops and barley. All vegetables require liberal supplies of soluble potash. Per bag of 100 lbs., \$2.60; five bags and over, \$47.00 per ton.

Grass and Grain Spring Top Dressing. Ammonia, 5 to 6 per cent.; phosphoric acid, 7 to 9 per cent.; actual potash, 5 to 7 per cent. Per bag of 100 lbs., \$2.50; five bags and over, \$46.00 per ton.

Cauliflower and Cabbage Manure. Ammonia, 5.50 to 6.50 per cent.; phosphoric acid, 6 to 8 per cent.; actual potash, 8 to 10 per cent. Per bag of 100 lbs., \$2.35; five bags and over, \$43.00 per ton.

Complete Manure (for heavy soils). Ammonia, 6 to 7 per cent.; phosphoric acid, 10 to 12 per cent. (soluble and available, 8 to 10 per cent.); soluble potash, actual, 3 to 4 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). For any soils where small quantity of potash but large quantities of ammonia and phosphoric acid are required. It is very safe for use around young plants, nursery stock, strawberry vines. Per bag of 100 lbs., \$2.50; five bags and over, \$45.00 per ton.

Complete Manure (for general use). Ammonia, 4 to 5 per cent.; phosphoric acid, 10 to 12 per cent. (soluble and available, 8 to 10 per cent.); soluble potash, actual, 4 to 5 per cent. A substitute for stable manure. For use on all crops and all soils with or without stable manure. Use broadcast; if any in hills, use sparingly. Special for oats, Hungarian grass, vegetables, melons, tomatoes, and seeding with or without grain. Per bag of 100 lbs., \$2.30; five bags and over, \$42.00 per ton.

Complete Manure ("A" Brand). Ammonia, 3 to 4 per cent.; phosphoric acid, 12 to 16 per cent.; (soluble and available, 10 to 12 per cent.); soluble potash, actual, 2.50 to 3.50 per cent. Specially adapted for use in hill or drill on all crops, particularly in connection with farm manures. Special for peas, beans, buckwheat and turnips. Per bag of 100 lbs., \$2.20; five bags and over, \$40.00 per ton.

Average Soil Complete Manure. Ammonia, 5 to 6 per cent.; phosphoric acid (soluble and available, 7 to 8 per cent.); soluble potash, actual, 5 to 6 per cent., all as high grade sulphate and in forms free from muriates (or chlorides). For onions, tomatoes, vegetables of all kinds, Irish and sweet potatoes, fruits and cranberries. A substitute for stable manure. Special for tobacco on heavier soils. Per bag of 100 lbs., \$2.30; five bags and over, \$41.00 per ton.

Corn Manure. Ammonia, 3 to 3.50 per cent.; phosphoric acid, 10 to 12 per cent. (soluble and available, 8 to 10 per cent.); soluble potash, actual, 6 to 7 per cent. Also for sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. Per bag of 100 lbs., \$2.20; five bags and over, \$40.00 per ton.

BRADLEY'S FERTILIZERS

Are guaranteed to contain more plant food in a better mechanical condition and of higher agricultural value than any other fertilizers in the world, and they are, therefore, as the New England Homestead affirms "the most economical to use."

Do not be misled into purchasing unknown fertilizers of uncertain value, but buy Bradley's Fertilizers which have grown large crops of superior grass, grain, and vegetables, on thousands of farms all over New England for more than thirty years.

Among their leading brands are:

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world.

From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise, — "*the Old Reliable*."

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure.

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated *field tests* have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced special "potato manures" whose alleged scientific combination is their principle claim to the farmers' patronage.

BRADLEY'S COMPLETE MANURES

For Potatoes and Vegetables. — For Corn and Grain. — For Top-Dressing Grass and Grain, With 10 per cent. Potash.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable, combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Send to us for finely Illustrated pamphlets, describing all of their brands, and let us quote you prices on all of these unequalled fertilizers before purchasing elsewhere.

Clay's Fertilizer.

A safe and reliable preparation. In great favor with successful gardeners in England. Prices: 2-lb. cans 35 cts.; $\frac{1}{8}$ cwt. (14 lbs.) \$1.25; $\frac{1}{4}$ cwt. (28 lbs.) \$2.25; $\frac{1}{2}$ cwt. (56 lbs.) \$4.00; 1 cwt. (112 lbs.) \$7.00.

Thomson's Vine, Plant and Vegetable Manure.

A safe and reliable food and stimulant for every fruit-bearing plant, also for foliage and flowering plants and vegetables of all descriptions. Prices: $\frac{1}{8}$ cwt. (14 lbs.) \$1.25; $\frac{1}{4}$ cwt. (28 lbs.) \$2.25; $\frac{1}{2}$ cwt. (56 lbs.) \$4.00; 1 cwt. (112 lbs.) \$7.00.

Thomson's Special Chrysanthemum Manure.

Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaping dessert-spoon full will be sufficient for a 10-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season. Price, 14 lbs. \$2.25; 28 lbs. \$4.00; 56 lbs. \$7.00.

Bowker's Ammoniated Food for Flowers.

A dressing made expressly for plants grown in the house, garden, or conservatory. Clean, odorless, and producing early and abundant blossoms of rich and brilliant color and healthy, luxuriant plants free from vermin. Price, small pkg. 15 cts.; large pkg. 25 cts.

STERLINGWORTH PLANT TABLETS

A NEW INVIGORATOR FOR HOUSE PLANTS AND VEGETABLES

STERLINGWORTH PLANT TABLETS are a clean, odorless, concentrated, plant stimulant and invigorator. Their use promotes healthy, vigorous leaves and branches, and insures beautiful, luxuriant flowers. They build up the soil scientifically, and make frequent renewal of soil less important. The large amounts of waste matter in what is commonly known as "liquid manure," and "bone plant foods," which pollute the soil, and are many times accompanied by disagreeable odors, are absent in these excellent stimulating tablets. If you want luxuriant, healthy plants, ferns and beautiful flowers, these tablets are just what you are looking for.

PRICES: Large box (250 tablets) sufficient 35 plants 8 months, 50c postpaid medium, (100 tablets) sufficient for 35 plants 3 months, 25c postpaid; trial size, 10c.

Cocoon Fibre.

A chemically prepared cocoon fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy, vigorous plants. For potting bulbs use one-third fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Cocoon Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs. 30 cts.; 15 lbs. 50 cts.; 25 lbs. 75 cts.; 50 lbs. \$1.00; 100 lbs. \$1.50, net.

Bees and Bee-Keepers' Supplies.

Prices subject to change.

The particular feature of the Hive, and hence its suggestive name is the dovetailing. Unlike the old-fashioned lap, miter, or halving plan, it will not gap or pull loose, but will successfully resist all climates. This Hive is fitted with Danzantaker bottom board and cover. As we ship, it is fitted complete with starters in Brood Chamber and Section Boxes. We have in stock but one size, the eight frame. All Hives set up ready for

use. Net price, each, \$3.25.

Section Boxes, each, 1 cent; per 100, 80 cents; per 250, \$1.60; per 500, \$2.75. Our No. 1 Sections are made of the choicest white basswood lumber, and are all perfect in finish, and free from defects. They are not all snow white, but vary from that to a light cream color. Choice honey shows off to best advantage in a section not too white.

Dovetailed or Lock-Corner Hive.

Section Honey-Boxes.

We also have in stock Brood and Section Foundation, Bee Veils, Rubber Gloves and many other articles necessary to the successful Bee-Keeper. Prices quoted upon application. Bee Supplies not included in Special Offers.

See Special Offers on third page of cover.

Bingham Smoker.

This is strong, well made, does not clog up and burns any fuel. It has recently been improved by the addition of a curved snout to prevent fire dropping, and a safety attachment to prevent burning the fingers in removing the hot cone for replenishing. They have wide shields; have wire handle to cone, and inverted bellows. Large 2½ in., each, 65 cents; by mail, 90 cents.

POULTRY SUPPLIES

We carry the most extensive line in New England.

(Prices subject to change.)

**To Raise Healthy Chicks
Use
Breck's Hygienic Brand
Chick Food.**

**To Make Hens Lay
Use
Breck's Complete Poultry
Feed.**

Breck's Hygienic Brand Chick Food.

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply, without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhoea, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the bone-forming properties that prevent leg weakness. It is high in protein, the flesh and muscle forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$1.50. 100 lb. bag, \$2.50.

Breck's Complete Poultry Feed.

We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in **Breck's Complete Poultry Feed** what we believe is the best food for poultry that is on the market to-day.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. Feed dry. 50 lb. bags, \$1.35. 100 lb. bags, \$2.50.

Breck's Mash Egg Food.

Is a properly balanced meat and cereal preparation, and is one of the best egg-producing foods we know of for poultry that do not have large runs; it is just what is wanted to keep them in good vigorous condition. Can be fed wet or dry. Price, 100 lb. bags, \$2.50.

Breck's Cut Alfalfa and Alfalfa Meal.

The best known green foods for poultry. DIRECTIONS FOR FEEDING:—Pour on boiling hot water, cover, let steam an hour, then mix with usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 100 lb. bag, \$2.00; 500 lbs. \$9.50. *Net.* Special price on larger quantities quoted upon application.

Breck's Banner Brand Cut Clover and Banner Brand Clover Meal.

The best known green foods for poultry. DIRECTIONS FOR FEEDING:—Pour on boiling hot water, cover, let steam an hour, then mix with usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 50 lb. bag, \$1.00. *Net.* Special price on larger quantities quoted upon application.

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filled, and is equally serviceable for both chickens and adult fowls. (See cut.) $\frac{1}{2}$ gal., 50 cents each; 1 gal., 75 cents each; 2 gals., \$1.00 each. Special prices per dozen or 100 upon application.

JOSEPH BRECK & SONS,

Dear Sirs—Your "Hygienic Brand Chick Food" cannot be beaten, as I have chicks four weeks old, and not a single one sick.

Manville, R. I.

Yours truly, FRED GOWER.

See Special Offers on Third Page of Cover.

Breck's Hygienic Poultry Fountain

Breck's Hygienic Poultry Fountain. Made of heavy galvanized iron. Easily cleaned and filled. Water pan fastened with hinge and spring clip. The best sanitary fountain in every respect on the market. 1 gal., 75 cts. each.

Sanitary Poultry Fountains. Made of glazed stoneware, in two pieces; a saucer and an inverted cup, finished off on top to prevent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one quart size is *specially suitable for pigeons*. 1 qt. 25 cts.; 2 qts. 30 cts.; 1 gal. 35 cts.; 2 gals. 50 cts. *Net*. Packing charges extra.

Sanitary Poultry Fountain

Sterlingworth Poultry Charcoal.

Sterlingworth Charcoal is especially prepared for poultry. It is carefully and uniformly graded in just the right sizes, is free from ammonia or other dangerous poisons, contains no useless dust or dirt and is the best charcoal sold for poultry.

It is manufactured in four grades: X (Fine Powdered) for mash foods and ducks; XX (Fine Granulated) for brooder chicks and dry chick food mixtures; XXX (Medium Granulated) for half-grown fowls and pigeons; XXXX (Coarse Granulated) for full grown fowls, geese, and turkeys.

Price: per lb. 10 cts.; 5 lbs. 25 cts.; bag of 50 lbs. \$1.25.

Ground Oyster Shells. 100 lb. bag, 75 cts.; 500 lb. lots, 65 cts. per 100 lbs.

Mica Cristal Grit. 50 lb. bag, 50 cts.; 100 lbs. 80 cts.

Cracked Poultry Bone. Per bbl. of about 200 lbs., \$2.25 per 100 lbs.

Bone Meal for Poultry and Cattle. 50 lb. bag, \$1.25; 100 lb. bag \$2.25.

Flour of Bone. 50 lb. bag, \$1.25; 100 lb. bag, \$2.25; per bbl. of about 200 lbs., \$2.25 per 100 lbs.

Poultry and Swine Meal. BRECK'S. Trial Bag, \$1.00; 50 lbs., \$1.35; 100 lbs., \$2.25.

Spratt's Food. The celebrated English preparation; nothing equals it for young chicks. 50 lb. bag., \$3.25; 100 lbs., \$6.00.

Barley. \$1.50 per bushel. *Net*.

Buckwheat. \$1.50 per bushel. *Net*.

Peas. Small white Canada, \$2.50 per bushel. *Net*.

Sunflower. Large Russian, \$1.75 per bushel.

Millet. Golden, for chickens, \$2.25 per bushel of 50 lbs. *Net*.

Kaffir Corn, or White Sorghum. Per 100 lb. bag, \$2.25. *Net*.

Wheat. \$2.50 per 100 lbs. *Net*.

Sheridan's Condition Powders. 25 cts. and \$1.00. *Net*.

Conkey's Poultry Tonic. The manufacturer says this is the greatest egg producer ever discovered. Price, 25 cts. *Net*.

Ground Beef Scraps. Always freshly ground from the best kettle rendered cake scrap. 50 lb. bag, \$1.50; 100 lb. bag, \$2.50; ton, \$46.00.

Thousands of boxes of this Roup Cure have been sold. It cures every time, even in the very worst cases of this terrible disease. If it fails we return the price. Do not experiment with anything else for roup. Our boxes contain twice the quantity usually sold at the price we ask. It is a powder that is administered in the fowl's drink. They take their own medicine.

Prices: small size (makes 25 gallons) 25 cts. postpaid; large size (makes 50 gallons) 50 cts. postpaid.

Conkey's Roup Cure. The only remedy positively known to cure roup in all its forms, as long as the fowl can see to drink. FOR CANKER, especially in pigeons, this cure excels all others. One 50 cent package makes 25 gallons of medicine. Directions with every package. Small size, 25 cts.; medium, 50 cts.; large size, \$1.00.

Pratt's Poultry Food. A poultry regulator, absolutely pure, makes large fowl, quickens the growth of young chicks, prevents and cures all poultry diseases. Makes hens lay. Trial pkg., 10 cts.; 26 oz. pkg., 25 cts.; 5 lbs., 60 cts.; 12 lb. bag, \$1.25; 25 lbs., \$2.50; 50 lb. bag, \$5.00; 100 lb. bag, \$9.00.

Pratt's Horse and Cattle Food. It regulates the bowels, blood, liver and digestive organs. It builds up run down horses, restores lost appetite, expels worms, grubs and bots. 7 lb. pkg., 50 cts.; 12 lb. bag, 75 cts.; 25 lb. bag, \$1.50; 100 lb. bag, \$5.00.

Sterlingworth Diarrhoea Remedy. This is the only remedy we know of which will positively cure Diarrhoea, including white Diarrhoea and all other bowel troubles in young chickens and fowls. It is used in the drinking water, the chickens thus taking their own medicine. Package sufficient for several flocks, 50 cts. postpaid.

BRECK'S LICE POWDER

The deadliest Lice Powder made. You can see it kill. No guessing. Use nothing else for lice on fowls, horses or cattle. Sprinkler top boxes, ready for use. 15 oz., 25 cts.; 48 oz., 50 cts.; 100 oz., \$1.00.

Death to Lice. 5 oz. box, 10 cts., if by mail 15 cts.; 15 oz. box, 25 cts., if by mail 40 cts.; 3 lb. pkg., 50 cts., by mail, \$1.00; 100 oz. pkg., \$1.00.

Death to Lice. Special. A preparation containing all the qualities of the famous "Death to Lice Powder," but which is soluble in kerosene oil and can be used to paint or spray roosts and interior of poultry houses. 4 oz. box, 10 cts., if by mail 15 cts.; 1 lb. box, 25 cts., if by mail 40 cts.

Death to Lice Ointment. For use on young chicks. Per box, 10 and 25 cts.

Liquid Lice Killer, Acme Brand. Is a wholesale lice and vermin destroyer on poultry, cattle, horse and hogs. It saves time, labor and expense. No dipping, no dusting, no greasing and no handling being necessary. It is applied with an ordinary sprayer. It is of such strength that the gas given off by it destroys the pests; is perfectly safe to handle, and is not injurious to fowls, animals or operator when used as directed. It is the best thing made for killing lice and mites in poultry houses. Price, 1 qt. cans, 35 cts.; 2 qt., 60 cts.; 4 qt., \$1.00.

COW'S RELIEF.

Is guaranteed to cure Caked Bag caused by garget, injury, overfeeding or calving; sore or injured Teats, Spider in the Teat, Stricture, Hard Milkers, Cow Pox, and is especially valuable for heifers with the first calf, to remove the soreness and swelling that is too frequently a cause of kickers and hard milkers. Your money back if it don't satisfy you. Price, \$1.00 per box.

Nest Eggs, China. Per doz., 40 cts. *Net.*
Medicol Nest Eggs. Valuable as a disinfectant.
 10 cts. each; \$1.00 per doz.

Kow-Kure. It is a medicine for Cows only. It prevents abortion, cures barrenness, removes retained after-birth, prevents tuberculosis, stops scours, cures milk fever, caked udder, swelling in the bag, bloating, red water, increases the flow of milk, cures cows "off their feed," improves the quality of the milk. Large size, \$1.00; small size, 50 cts.

Sulpho-Naphthol. This preparation, originated by the late Dr. Cabot, is recommended for a great many purposes. It cleans and heals all sorts of cuts, bruises and sores. It is sure death to all kinds of bacteria and insects, and is unsurpassed as a disinfectant. For domestic animals, poultry and poultry houses it is the thing. Trial size 10 cts. 25 ct. bottle makes 5 gals.; 50 ct. bottle makes 10 gals.; \$1.00 bottle 50 gals. solution; 1 gal. can, \$3.00.

Bellocs, Spraying. \$1.25 to \$2.25.

Bellocs, Houchin's Patent Powder. 50 cts., 75 cts., \$1.10 and \$1.50.

Leg Bands. THE FAMOUS PHOENIX, secure, neat, light and superior to all others. Numbered to order. Per doz. 25 cts.; per 100 \$1.50.

Leg Bands, Aluminum, for Pigeons. Double clinch, per doz. 15 cts., per 100 \$1.00. Open, per doz. 15 cts., per 100 \$1.00. Postpaid.

Leg Bands, Aluminum, for Poultry. Double clinch, No. 1 for Bantams, No. 2 for Mediterraneans, No. 3 for American females, No. 4 for American males, Asiatic females, small turkeys, No. 5 for Asiatic males and turkeys. We number them to order. Per doz. 15 cts., per 100 \$1.00. Postpaid.

Climax Leg Bands. A thick brass wire goes around the leg which is locked securely by the attaching of the tag bearing number. All sizes. Doz., 15 cts.; 100, \$1.00. Postpaid.

Leader Adjustable Leg Bands. Latest and best adjustable leg band out. Has neat, compact and smooth fastening with no catching points; easily attached and are absolutely secure. Made in two sizes: No. 1 for Bantams or Mediterraneans, No. 2 for Americans. Per doz., 15 cts.; per 100, 75 cts. Postpaid.

Nests, Wire. Strong and clean. Each, 50 cts.

Guns, Insect Powder. 2 oz. size, 15 cts. each.

Pumps, Breck's Hand Force is a double-acting portable force pump. It is made of brass, and therefore impervious to the action of acids and liquids, and will not rust or corrode. Pump is placed directly in water or other liquid, insuring a perfect suction. It is furnished complete with malleable foot-rest and suitable nozzles for a solid stream and large spray. Pump may be used for washing windows, wagons, in conservatories, gardens, etc., and for general spraying purposes. Price, \$4.50 each.

Acme Sprayer. Invaluable for spraying all kinds of insecticides in a liquid or dry powder form and for spraying cat-tle.

They are especially adapted to the use of poultrymen and florists, and can be used by all to advantage around the house and place. The brass sprayer is not affected

by acids, and is practically indestructible.

All Brass sprayers Our net price, each, \$1.00
 " Tin " " " " 50

birds or any particular hatching 50 cents.

Punch, Breck's Improved Spring Lever. Works on the principle of a conductor's punch, and does perfect work. Its use enables poultrymen to identify their own

Lehman's Heaters. Put one of these heaters in each poultry house on cold nights and there will be no frozen combs. The use of Lehman's Heaters and Coal is no longer an experiment. Their practicability and usefulness have long since been demonstrated. The fact that 125,000 Heaters are in actual use, with an average yearly sale of 10,000 Heaters and 1/2 million pieces of coal, speaks more for their merits than thousands of testimonials.

Lehman's Heater is a metallic case 7 1/4 inches wide, 3 1/4 inches deep, and from 14 to 20 inches in length. The top is oval, giving the feet a comfortable resting place. These Heaters, which are furnished with carpet coverings, have a lining of asbestos cloth between the carpet and the heater, making it perfectly safe from scorching.

The No. 3 and No. 4 Heaters are our standard Heaters, which we specially recommend, as they are packed with a special composition which retains the heat and makes them more durable. *Net Prices.*

Veterinary X-Zalia. A purely vegetable preparation; contains no alcohol or poisonous ingredients. It may be applied to a raw surface or even poured into the eye of an animal without causing pain. It cures Galls, Scratches and Surface Inflammation of every description. Per large bottle, \$1.25.

GENUINE PRAIRIE STATE INCUBATORS AND BROODERS.

To those who desire to rear as well as to hatch chicks and ducks, the selection of an incubator is of vital importance. The high death-rate experienced with chicks the first ten days is more frequently due to imperfect incubation than to any other cause. Too many incubators of to-day are constructed with reference solely to hatching the desired numbers without considering the manner in which they are brought into existence.

Weak, anæmic chicks, lacking in strength and vitality, are of no value, if you hatch thousands; hence the importance of carefully considering the merits of an incubator in this direction before making a selection.

The Prairie State Sand Tray Incubators have proven themselves by thousands of tests, both in the hands of the novice, as well as in comparative results obtained by the large poultry plants using different makes of incubators.

The perfect construction and automatic heat regulation of these machines makes them easily operated and results doubly certain.

JOS. BRECK & SONS, Boston, Mass.

Milford, N. H., May 23, 1910

GENTLEMEN:—Yours of the 16th received, and we are glad to let you know what results we have had with the incubators that we purchased of you. Previous to the time that we purchased these machines, we had four 360 egg machines of a no-moisture style and run them for six seasons, and sold them for almost nothing as we could not raise one half of the chicks hatched from them, and those we did raise were practically worthless. From these results we decided to hatch by old hens, and did so for two seasons and got good results.

The spring of 1908 we purchased of you a 240 egg machine which we have run three seasons and have raised not less than 85 per cent. of all chicks from it and the 390 machine purchased this season; we have hatched 900 with two machines and 500 with hens this season and the chicks from the machines have lived as well and grow faster than those with hens because one thing they are free from lice; and then another reason, when they feel chilled they have the Universal Hover to run to which is ready at all times to hover them.

This combination of machines cannot be beat for hatching and raising chickens. Now that we have found a machine that will hatch chicks that live, we are going to raise broilers this winter and shall order three or four of the 390 egg machines this fall. If at any time we can speak a good word for the Prairie State Incubators or Universal Hovers, we shall be more than pleased to do it because they are the best machines on the market today in our opinion.

Yours truly,
(Signed) A. J. CARLETON & SON.

The PRAIRIE STATE UNIVERSAL HOVER has completely revolutionized the rearing of chicks. No device ever offered to the poultry-raiser has received such endorsement. In cold weather and hot weather it has been an overwhelming success. As its name implies, our Universal Hover has a universal sphere of usefulness. There is practically no limit to its adaptability. As an individual brooder, in brood houses alone or in combination with a hot-water pipe system, or may be used as an indoor brooder in almost any kind of building. It may be attached to any form of outdoor brooder two feet or more in height, to any size or form of colony house, shed, coop, piano, dry-goods or organ box. It also enables those who wish to build their own brooders to get the best brooding device possible in an economical manner. It fills that want, felt by everyone who raises poultry, for something they can use anywhere, any time, and do the work well.

The hover is twenty-two inches in diameter, the top of which is wood, lined with strawboard, a 4-inch rim extending downward, to which is attached six inches of felt curtains. The hover stands on three iron feet, but is not stationary, and may be raised and moved instantly, if desired.

A thermometer is provided, which may be read from the outside without disturbing any part of the brooder. The lamp used is made of metal, using a No. 2 Sun Hinge Burner and a metallic chimney seven inches in length, thus assuring a steady, bright, clear flame; the lamp being on the outside of the brooder in full view at all times. Surrounding the hot air flue or chimney is a fresh-air pipe, through which fresh air, slightly warmed, is injected into the upper part of the brooder. This diffuses downward and through the curtains, thus furnishing a perfect system of ventilation.

FLOWER SEED NOVELTIES AND SPECIALTIES

Ageratum Mexicanum Capella.

74. *Ageratum Mexicanum Capella.*

This new Tom Thumb *Ageratum* differs from all other dwarf varieties in the decidedly distinct and pretty rosy chamois color of the flowers. The plants are dwarf and compact in habit. Height, 9 to 10 inches.

Sow under glass early in the season, or, later, outdoors, in a mellow seed-bed. Seed sown in August will produce good plants for winter flowering. Pkt. 25 cts.

Broom White Gem.

508. *Broom White Gem.*

A grand improvement on the old White Portugal variety. The plants are more compact in growth not so coarse, and very free-flowering, being literally covered with pure white flowers. Pkt. 25 cts.

261. *Aster, Hercules Rosy Lilac.*

A colored variety of the White Hercules Aster introduced in 1905. It is a splendid delicate rosy lilac, similar to that already existing in the Hohenzollern class. The plant is of compact semi-dwarf habit, not more than 15 to 20 inches in height. It produces flowers $5\frac{1}{2}$ to $6\frac{1}{2}$ inches across, of the most perfect form. Hercules is one of the most refined of all Asters. Pkt. 15 cts.

Hercules Aster, Rosy Lilac.

262. *Aster, Eclipse.*

The flowers of this beautiful and distinct Aster are of immense size, measuring 6 to 7 inches across, pure white with fine thread-like florets; quite double without the objectionable yellow centre seen in many Asters. Per pkt. 15 cts.

See Special Offers on third page of cover.

665. ***Centaurea Cyanus*. Breck's
Double Bachelor's Button.**

A grand improvement on the old-fashioned *Centaurea Cyanus*. This strain will prove a great acquisition as a cut flower, being double and of a very deep blue; the flowers measure 2 inches in diameter, with the petals formed in perfect rows, and bloom continually all summer. Pkt. 15 cts.; oz. \$2.00.

885. ***Calliopsis Radiata*, "Tiger
Star" Dark Brown and
Golden Yellow.**

A rich and continuously blooming Annual with pretty, peculiar flowers. The leaflets of each flower are twisted like those of the well known *Cactus Dahlia*; towards the centre they show a vivid reddish brown coloration, the outer part being brilliant golden yellow. The plants reach the height of about 8 inches and form round compact bushes which are literally covered with its pretty flowers. Per package 10 cts.

Single Japan Pink, "Silver-edged."

1022. ***Dianthus Heddewigi*
Marginatus. Single Japan
Pink, Silver-edged.**

This most striking novelty forms dwarf and compact growing bushes. It flowers profusely, bearing its medium-sized flowers quite regularly above the foliage, forming a pretty bouquet effect of fascinating appearance. The flowers are dark blood-red, with purple hue, and have a uniform white edge, which is slightly fringed. Pkt. 25 cts.

Breck's Double Bachelor's Button.

***Dianthus Laciniatus*
Punctatus.**

1020 *Dark Shaded Princess Pinks.*

1021 *Light Shaded Princess Pinks.*

These recent introductions in the *Dianthus* class will be gladly received by all lovers of pinks as a valuable acquisition; the flowers are charming and of extremely peculiar markings. Pkt., each variety, 10 cts.

886. ***Calliopsis Radiata*
"Dark Brown"**

This is a splendid match to the "Tiger Star," distinguishing itself only by a pure velvety brown coloration of its flowers. Per package 10 cts.

1024 ***Giant Chabaud Carnation*
"Duchess of Saxony-Coburg-Gotha."**

In size and beauty this pure white carnation stands comparison with the best American Giant Perpetual. It produces magnificent flowers, each on a firm and erect flower-stem. It flowers six months from time of planting, coming quite true from seed, being very double, and pure white in color. It is fine as a pot plant and useful for florists. Pkt. 25 cts.

See Special Offers on third page of cover.

650. **Breck's Celosia Plumosa Pyramidalis. Crimson Plume.**

This Celosia is the result of many years of selection, and, as its name implies, is of perfect pyramidal form. It is a very pleasing color—bright crimson, a little on the orange shade. It is of easy culture, breaks naturally to its true shape, and makes a fine pot plant. It is also most effective as a bedding plant, making a striking mass of color from mid-summer until the frost comes. It grows to a height of 2 feet. Sow about April first for outdoor culture. Pkt. 25 cts.

Dimorphotheca Aurantiaca.

1300. **Giant Scarlet Daisy.**
Gerbera Jamesoni Gigantea.

The starry lightness of these beautiful flowers, that are borne on long and rigid stalks, render them admirably suited to all kinds of decoration. Pkt. 25 cents.

1253. **Gaillardia Lorenziana.**
"The Bride."

The annual Gaillardias have always been very popular. "The Bride" will be a valuable acquisition. The flower is white, very double, and is borne on a very long stalk, making it an ideal plant either for bedding or for cut flowers. Pkt. 25 cts.

Brachycome Iberidifolia, "Little Blue Star."

502. **Brachycome Iberidifolia,**
"Little Blue Star."

This beautiful annual is a great improvement on the old variety of Swan River Daisy. The flowers are bright blue, star-shaped, and very effective. The plants are compact and free flowering. Excellent for bedding purposes. Pkt. 25 cts.

1103. **Dimorphotheca**
Aurantiaca

A rare and exceedingly rich flowering annual from Namaqualand, South Africa, of very easy culture. The plants of neat, branching habit, grow from about 12 to 15 inches high and produce Marguerite-like blossoms 3 inches in diameter, of a wonderful, shining, dark gold orange color, which is rendered more conspicuous by the dark-colored disc, surrounded by a black zone. Pkt. 25 cts.

1301. **Gerbera Jamesoni**
Hybrida.
"Transvaal Daisy," or
"Marguerite of the Cape."

These new hybrids embrace a wonderful range of colors, including all the shades of white, pink, and crimson. Sometimes the disc is of the same color as the ray florets, other times, it is a different shade. The plants are of sturdy growth, with flowers borne on long stems, which make them unsurpassed as a cut flower. They maintain their freshness for days, and, if the stems are in water, will last for two weeks. Pkt. 25 cts.

Gaillardia Lorenziana, "The Bride."

See Special Offers on third page of cover.

Begonia "Alice Manning."

A magnificent variety of these well known and favorite plants. The flower is pale yellow, and measures three inches in diameter. On the same plant are both single and semi-double blooms. It is very free-flowering.

Its lovely foliage is not its least attraction; it is velvety, and of a delicate pea-green color, edged with crimson.

The flowers are drooping in habit, excellent for hanging baskets, window boxes, and conservatories, and can be had in bloom almost any time, by planting the bulbs at different seasons.

Start the bulbs in shallow boxes or pans, from the middle of April until the end of May. In equal parts of sand and leaf-mould, as soon as a good start is made, transplant into four-inch pots, and later into larger pots or pans, in a compost of two parts loam and one part leaf-mould and well-decayed cow manure. A temperature not less than fifty-five to sixty-five degrees, in a house not too shaded, suits it best. Keep the soil moderately moist. \$1.25 each, \$12.00 per doz.

Begonia, "Alice Manning."

Breck's Choice Gladiolus.

Gladioli, in all their many magnificent varieties, deserve to be grown in every garden. They are of easy culture, will grow in any garden soil, and are valuable for cut flowers. The following list embraces the newest and handsomest shades of color.

Varieties marked with an asterisk (*) are particularly fine for forcing.

***AMERICA.** A most charming soft delicate pink, tinted lavender. Large flowers on a strong spike. \$1.00 per doz., \$6.00 per 100.

***AUGUSTA.** Fine white variety with lavender anthers. Good for forcing. 50 cts. per doz., \$3.00 per 100.

BARON HULOT (Blue Jay). The best blue variety. Very dark, violet-blue, with well opened flowers, \$2.00 per doz., \$15.00 per 100.

***DAWN.** A most beautiful shell-pink, slightly penciled in throat. A very fine variety and a great favorite as a cut flower. \$2.00 per doz., \$20.00 per 100.

FIRESIDE. The new red of intense cherry color. All flowers open at one time. Very popular for cutting and massing. \$2.00 per doz., \$15.00 per 100.

HARVARD. A perfect "Harvard" crimson in color. Very popular as a cut flower, and effective when used with green foliage. Long, graceful spike of large open flowers. \$2.00 per doz., \$15.00 per 100.

***JEAN DIEULAFOY.** One of the most pleasing of the light varieties. Soft cream color, with carmine blotch. \$2.00 per doz., \$15.00 per 100.

MADAM MONNERET. Delicate rose, late bloomer and very popular. 50 cts. per doz., \$2.50 per 100.

***MRS. FRANCIS KING (The Original).** A most beautiful flame pink. Immense flowers on a spike growing 4 feet high, with from 18 to 20 flowers, 6 to 8 open at one time. A magnificent variety. \$1.00 per doz., \$6.00 per 100.

PRINCESS SANDERSONI. The finest white variety, slightly penciled crimson. Beautiful for the home garden and for commercial use. \$2.00 per doz., \$15.00 per 100.

***SHAKESPEARE.** A very dainty white variety, slightly suffused with rose. Fine for outdoor planting and for forcing. \$1.00 per doz., \$7.00 per 100.

SUNRISE. A beautiful clear canary yellow, with no markings. Long spike of dainty flowers all open at one time. Fine for table or house decoration. \$2.00 per doz., \$15.00 per 100.

Postpaid.—One each of the foregoing twelve varieties for \$1.50; two each, \$2.75; six each, \$7.00; twelve each, \$13.00.

BRECK'S HIGH GRADE MIXTURE.—A superb collection, giving a wide range of color of wide opened flowers, beautifully marked, and including many of the named varieties. Especially selected as to combination and blending of colors, so that they may be used for cut flowers as well as for massing. \$1.00 per doz., \$5.00 per 100.

See Special Offers on third page of cover.

Double Annual Hollyhock.

1495. **Double Annual
Hollyhock.**

This strain blooms the first year from seed; the plants branch freely and will flower throughout the summer, and is considered more disease proof than the perennial variety. Seed should be sown in hot beds in February. Mixed colors. Pkt. 10 cts., $\frac{1}{4}$ oz. 50 cts.

**African Marigold,
Sunburst.**

(Breck's Perfection Strain.)

Our strain represents many years of careful selection, and is the finest in cultivation. It produces large, globular, double flowers, measuring 4 to 5 inches in diameter, and for habit of growth and purity of color are unsurpassed. When planted in the garden they will make a grand display of glittering yellow, blooming far into the autumn.

2950. Lemon Yel., pkt. 10 cts., $\frac{1}{8}$ oz. 50 cts.

2952. Deep Orange, pkt. 10 cts., $\frac{1}{8}$ oz. 50 cts.

2171. **Poppy, Shirley
"Picotee."**

A charming variety of the popular Shirley Poppies. The "Picotee" is a magnificent flower, being very large and particularly showy. It is a beautiful white with well-defined carmine edge, and will become a great favorite for cutting. Pkt. 25 cts.

Sunburst Marigold.

Poppy, Shirley "Picotee."

See Special Offers on third page of cover.

2173. **Virginian Poppy.**

This new, large flowering, single poppy of the annual class produces beautiful large white flowers, with soft, pink fringe on the edges, giving a most charming effect. These poppies are especially fine for cut flowers, as they last very long before shedding. When planted in beds, they make a lovely display. Pkt. 15 cts.

1990. **Breck's Colossal Sweet Mignonette.**

The finest of all the Giant varieties. The flower spikes are of immense size, very fragrant and rich reddish green in color. The seed of this special strain was saved from selected spikes under glass, and is excellent for forcing or outdoor culture. Pkt. 10 cts.; oz. 75 cts.

2081. **Nemesia Hybrida, "Blue Gem."**

This fine variety of the dwarf and compact form of Nemesia is a real "gem," both in color and habit of plant. It is very pretty and neat-flowering. The flowers are a beautiful forget-me-not blue, and are very effective for beds and borders. Pkt. 25 cts.

Virginian Poppy.

2642. **Salpiglossis, Breck's Multi-Colored.**

The Salpiglossis is a beautiful garden annual. The strain we offer under the name of Multi-Colored is a wonderful improvement over all other varieties of this very desirable plant. The magnificent flowers, large and funnel-shaped, present an extremely pleasing variety of colors in mottled, veined, and self-colored forms. They require good, rich soil, and will amply repay in glorious effect good care and liberal treatment. Pkt. 10 cts.

2643. **New Emperor Salpiglossis. Variabilis Superbissima. Purple Violet with Gold.**

This new introduction is of a pleasing color, a brilliant, velvety violet, veined with bright gold. The plants have the same habit and growth as the Emperor Salpiglossis, and will prove a valuable acquisition. Pkt. 25 cts.

1060. **Sweet William, Breck's Improved Auricula Eyed.**

The old-fashioned garden flower of which it is difficult to procure a really good strain. Our improved variety is the finest on the market; it is single and produces good trusses of large, round, individual blooms, with smooth edges and rich, well-defined markings, and embraces a wide range of color. Per pkt. 10 cts.; oz. \$1.00.

New Emperor Salpiglossis

See Special Offers on third page of cover.

2700. **BRECK'S BOSTONIA SCABIOSA.****Mourning Bride, or Sweet Little Leaves.**

This is a great improvement on the old-fashioned garden Scabiosa. The flower is large, and, while very double, still retains its perfect dome shape. It is a lovely shade of velvety, brownish purple with a tint of crimson. It is very free flowering. Each flower is borne gracefully on a long, slender stem,—a quality which makes it invaluable for cutting. As a garden annual it is becoming very popular, because it is of easy culture, and very effective for beds and borders. It blooms continually throughout the summer and autumn. Height, 2 feet. Pkt. 10 cts.; oz. \$1.50.

Breck's
Bostonia Scabiosa.

SWEET PEAS OF SPECIAL MERIT.**(Spencer Type.)**

1729. **APPLE BLOSSOM.** Bright rose and pink-waved. Pkt. 10 cts.; oz. 25 cts.; lb. \$2.00.
 1732. **ASTA OHN.** Lavender, tinted with mauve, waved. Pkt. 10 cts.; oz. 25 cts.; lb. \$2.00.
 1734. **BLACK KNIGHT.** (True.) Shining deep maroon, waved. Pkt. 15 cts.; oz. 50 cts.
 1744. **COUNTESS SPENCER.** Fine, bright, clear pink, showing a little deeper at the edges. The margins of the petals are wavy. Splendid variety. Pkt. 10 cts.; oz. 25 cts.; lb. \$1.50.
 1803. **KING EDWARD.** (Spencer.) Rich, carmine scarlet, waved. Pkt. 10 cts.; oz. 25 cts.; lb. \$2.00.
 1853. **PARADISE IVORY.** Ivory white, with a slight tinge of buff on the standard. Pkt. 10 cts.; oz. 25 cts.; lb. \$2.00.
 1895. **BURPEE'S WHITE SPENCER.** Bold standard, crinkled and fluted; measures from 1¾ to 2 inches across. Pure white. Pkt. 10 cts.; oz. 25 cts.; lb. \$2.00.
 1897. **CHOICE MIXTURE OF SPENCER TYPE VARIETIES.** Pkt. 10 cts.; oz. 20 cts.; lb. \$1.50.
 1900.

**Sweet Peas,
Breck's Boston Mixture.**

The very best mixture offered at any price. It includes in good proportions over sixty of the choicest kinds, and this year is enhanced in value by the addition of many new and charming shades. Oz. 10 cts.; ¼ lb. 25 cts.; lb. 75 cts.

For complete list of Sweet Peas, see page 103.

SPECIAL PREMIUM ON SEEDS IN PACKETS.

\$1.25 VALUE FOR \$1.00.

Customers ordering Seeds in PACKETS at Catalogue Prices may select Seeds to the value of \$1.25 for every \$1.00 sent us in cash; \$2.00 sent us with the order will pay for Seeds in packets amounting to \$2.50 and so on. Thus you may select 25 cents' worth extra of Seeds in Packets for each \$1.00 sent. This offer does not include Seeds in collections, by weight or measure, or anything excepting SEEDS IN PACKETS.

See Special Offers on third page of cover.

Breck's Imperial Stock.

Messrs. Joseph Breck & Sons,
Gentlemen:

I bought fifty German Pansy plants of you about April 1st—the blossoms were very large and of varied and beautiful coloring, and there were hundreds of new blooms every day until the 1st of November.

I earnestly recommend your Pansy plants to any one desiring a bed of these attractive flowers.

Yours truly,

JAMES A. SYMONDS.

15 Wayne St. Roxbury, Mass.

3526. **Zinnia Elegans**
Grandiflora, Cardinal.
Double Flowered.

A new shade in Zinnias. The color is a rich, glowing crimson scarlet. The flowers are very large and double, measuring five inches across, and are easily grown from seeds sown in the open ground. Pkt. 25 cts.

Zinnia Elegans, Cardinal.

2674. **Salvia "Zurich."**

A dwarf scarlet (hhP). A compact and very early and free-flowering variety, 12 to 15 inches high, with erect spikes covered with a mass of brilliant scarlet. Blooms from beginning of July until cut down with frost. Pkt. 15 cts.

2925. **Stokesia Cyanea.**

(Corn Flower Aster.)

A beautiful hardy perennial easily grown from seed. The plant grows from 18 to 24 inches high and produces the Centaurea-like (4 to 5 inches in diameter) lavender blue flowers from early in July until late in October, even after frost has destroyed nearly all other outdoor flowers. It is of easiest culture, succeeding in any open, sunny position. Pkt. 10 cts.

2864. **Breck's Imperial Stock**
(Gilliflower.)

A special strain of the favorite ten weeks Stocks, extremely early, flowers pure white, unusually large, and very double. Pkt. 15 cts.; oz. \$5.00.

See Special Offers on third page of cover.

It is somewhat difficult to convey detailed particulars as to how success may be had in the planting and maturing of flowers. The skilled gardener who has every appliance necessary often fails in his efforts; while the little girl who has no knowledge of the art, but loves flowers, will frequently surprise not only herself but the older folks, *who are not so much interested*, with the results obtained by her labor and love. "The Norwegians have a pretty and significant word, 'Opelske,' which they use in speaking of the care of flowers. It means literally 'loving up,' or cherishing them into health and vigor."

The following practical information, in connection with the special cultural notes, that, when necessary, are set in the right-hand column against the variety, will be of service in making for success:

Hardy Annuals (hA).—This class require no artificial aid, but grow and flower freely in the open ground, mature their seeds and die in the same year. Before sowing the seeds in the open border, the soil should be thoroughly enriched with fertilizer or stable manure, dug and raked until firm, level and smooth. If possible, the location should be free from shade, although some sorts do well where they do not have the sun for more than half the day.

Seed should be sown in spring as soon as the ground is dry enough to work freely. After the seed is sown shake over it fine soil sufficient to cover, light or heavier, according to size of seed; a good rule is, to cover seed twice its own depth. Very fine seed, such as *Portulacas*, requires no covering at all, but should be merely pressed into the soil with a piece of board or the palm of the hand. A second sowing can be made in from two to four weeks after the first, in order to provide for a succession, as well as to insure against failure.

When it is desired to sow hardy Annuals and carry them along indoors until they can be planted out there is nothing better than shallow boxes, two or three inches deep, filled with sandy loam. Take especial care until the plants are up and during their early stages of growth to give plenty of air and *water* carefully. When they are well out of the seed leaf they should be planted in rows in other shallow boxes; or in two-inch pots. If they begin to crowd one another before the weather is suitable for setting out, a second transplanting may be necessary. When first set out in the garden, or until well established, they should be watered carefully. Keep down all weeds, and loosen the ground occasionally, so that the plants may receive the full benefit of rains and dews, which will not benefit them if the ground is allowed to become hard or crusted.

Half-Hardy Annuals (hhA).—These, in the latitude of Boston, should not be sown out-doors until about the middle of May. A good rule, followed by a successful gardener, is to sow these, and even some of the tender Annuals, at the same time he makes his sowings of cucumbers and melons. With half-hardy Annuals, however, it is generally best to sow them under the same conditions as advised for hardy Annuals in-doors.

Tender Annuals (tA).—To get strong plants and an early bloom, sow the seed in shallow boxes or pots in March, and place them in a warm greenhouse, or plunge in a moderate hot-bed, shade from the strong sun and water only with a very fine rose. A very light, sandy soil and good drainage are essentials. Be particular that the finer seeds are not covered over deep, but have the soil pressed closely about them. Water frequently, especially if the green-house or hot-bed is very warm. When the plants are out of the seed leaf, transplant into shallow boxes or small pots. When sufficiently strong and the weather is suitable, set out in the flower beds, but not before the end of May.

Hardy Biennials (hB.) and Perennials (hP).—These require the same conditions as hardy Annuals. Those marked with a dagger (†) if sown early, in boxes, as directed for hardy and half-hardy Annuals, will

See Special Offers on third page of cover.

bloom the first year. All, however, may be sown in the open border in August or September; in which case it is a good plan at the commencement of frost to give them a light covering of straw, leaves or dry litter. When the frost is out of the ground in spring remove the covering, loosen the soil around the plants, and when large enough transplant them to where they are permanently to remain.

Half-Hardy Biennials (hhB.) and Half-Hardy Perennials (hhP.).—These may be sown in the open border as directed for hardy Annuals, but, when practical, it is generally better to start them in-doors, as recommended for half-hardy Annuals.

Tender Biennials (tB.) and Tender Perennials (tP.).—Accord these the same treatment as recommended for tender Annuals.

Those to whom a greenhouse or hot-bed is not available will meet with good success by placing the boxes or pots in the open sunlight in the windows of the dwelling house, and keep the temperature from 65 to 75 degrees during the day and 10 degrees less at night. If the soil was in proper condition at planting time, a slight sprinkling once a week will be sufficient until the plants begin to grow nicely.

Greenhouse Seeds.—Leaf mould, or peat, with some fine sand added, is the most suitable soil for sowing. The smaller seeds of greenhouse plants are somewhat difficult to germinate unless extra care be taken with them; they require to be slightly watered occasionally, and sheltered from the hot sun until large enough to transplant. Press the soil firmly down into the pot or box and make perfectly level, so that no unequal settlement takes place through watering. The seeds should be sown thinly and *covered very lightly*. A pane of glass placed over the pot or box until the little plants get well started is of decided benefit, but care should be taken to air occasionally, when excessive moisture is shown by water globules on the under side of the glass. When the young plants have two leaves they should be transplanted into a similar soil, in other pots or boxes. To do this do not pull them out one by one, but, if in a pot, remove the entire contents and break up gently; if in a box, loosen by running a trowel around the side and take out a mass at a time, thus preserving the little roots which are so essential to their future welfare. After transplanting, keep in a shady part of the greenhouse and water sparingly until established, when they may be removed to the light.

It is well to know that Poppies delight in a rich, sandy loam, that Eschscholtzias will do best in a poor soil; or of Pansies, give them abundance of old manure, the richest earth you can find, plenty of water and partial shade; that you need not be anxious if it is not convenient to carry water for Nasturtiums in a dry time, for their habitat is dry Chili, and they will thrive in a dryer soil and atmosphere than almost any other plant; or that Zinnias like a heavy, cool clay; Sweet Peas a deep, rich soil and plenty of water, while such gross feeders as Roses, Sunflowers, Hollyhocks, Dahlias and Asters cannot be planted in too rich a situation; yet,

To raise your flowers, various arts combine,
Study these well, and fancy's flight decline;
If you would have a vivid, vigorous breed
Of every kind, examine well the seed:
Learn to what elements your plants belong;
What is their constitution, weak or strong;

Be their physician, careful of their lives,
And see that every species daily thrives;
These love much air, these on much earth rely;
These, without constant warmth, decay and die:
Supply the wants of each, and they will pay
For all your care through each succeeding day."

Explanatory.

Our General List of Flower Seeds comprise the following, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. The dash (—) designates the repetition of the name above it as applying to the variety to which the dash is prefixed; the *first column*, following the name, denotes hardiness and duration; the *second column*, height in feet; the *third column*, color or predominating colors; the *fourth and fifth columns* show the price per ounce and packet respectively; the *sixth column* gives brief descriptions or special notes on culture. To this arrangement and the following abbreviations we have given the most careful attention, and we trust that their simplicity will not only find favor with our customers, but prove valuable to them as a handy reference.

Key to Abbreviations.

hA	designates Hardy Annuals—Lasting but one year.
hhA	" Half Hardy Annuals—Lasting but one year.
tA	" Tender Annuals—Lasting but one year.
hB	" Hardy Biennials—Lasting two years.
hhB	" Half Hardy Biennials—Require protection during winter.
hP	" Hardy Perennials—Lasting three or more years.
hhP	" Half Hardy Perennials—Require protection during winter.
tP	" Tender Perennials—Lasting three or more years, but require greenhouse protection during winter.
†	" Biennials or Perennials that if sown early will bloom the first year.
Trai.	" Trailing Habit.
Var.	" Various.

The abbreviations of colors are—

blk.—black.
br.—brown.
tri.—tricolor.
car.—carmine.

crim.—crimson.
sul.—sulphur.
lav.—lavender.
pur.—purple.

var.—variegated.
scar.—scarlet.
strip.—striped.
ver.—vermilion.

In some instances when the flower is of two colors, these are indicated by the initial letters only,—for example, b. & w.—blue and white; s. & y.—scarlet and yellow; w. & p.—white and pink.

For Flower Seed Novelties see pages 76-83

Breck's Selected List of High Grade Flower Seeds

Our Complete List of Flower Seeds begins on page 105

This special list embraces only sorts that are of the easiest cultivation, and particularly desirable for producing a quick and continued effect. A dollar's worth of seeds selected from these varieties will, under reasonably favorable conditions, give a greater amount of bloom in varied form and color than could be had by planting ten dollars' worth of plants from the greenhouse. Sow the seed freely. Their combined strength will break the crust on hard soils; and in the thinning which follows, only strong and promising plants are allowed to remain. Better effects are also often secured, when the flowers are in masses, especially if the flowers are thrown into the bays of heavy shrub borders.

Plants continue to bloom for a longer period if they are not allowed to produce seed. The flowers should be picked, if possible, before they begin to fade.

Joseph Breck & Sons:—

I wish to say a few words regarding your seeds. Your seeds in general have never been excelled. I have used seeds from leading seedsmen from Maine to California and from Maine to Florida. Your seeds are of strong germinating powers and true to name. They cannot be excelled.

A. B. REED,
Richmond, Me.

Ageratums.

In many respects this is one of the most desirable summer flowering plants we have. It may be used alone for beds and borders, or planted in connection with geraniums, coleus, cannas, etc. The colors include many shades of blue as well as white, rose and a pale yellow. The plants grow well almost anywhere. If the seed is started in a box in the house, or in a hot-bed, in the beginning of April and transplanted to where they are intended to bloom about the end of May, an abundance of flowers will be produced until hard frost. Seed sown in August will produce plants for winter flowering.

Sweet Alyssum.

The Sweet Alyssum is so well known and such a general favorite that it is scarcely necessary to call special attention to it here. It is of the easiest culture both indoors and out, and is suitable alike for beds and edging in summer or for growing in pots and boxes for winter blooming. It will stand considerable cold in the open ground and may be sown early; it blooms throughout the entire season until destroyed by hard frost. For winter flowering sow the seed in August or September.

Sweet Alyssum.

See Special Offers on third page of cover.

Antirrhinum (Snapdragon).

If sown in March or April and set out when strong enough, these plants make a display that is unequalled for duration and brilliancy. The tall sorts are fine in borders. The dwarf make splendid beds. They prefer a light, warm, but a well enriched soil. Seed sown outdoors in May will produce satisfactory results. If grown indoors they require about the same temperature and treatment as carnations. Most of the varieties are fairly hardy and will live through a New England winter if well covered.

Aquilegia (Columbine).

This family is one of the most beautiful and popular among hardy perennials. The different varieties present an unusual wealth of color and form. For growing in borders or filling up bays in shrubbery they are unsurpassed. Seed sown in the house, in March will frequently produce bloom the same year. It is best, however, to sow seed out of doors when ground warms up. Any ordinary garden soil is suitable for their growth. The flowers are fragrant.

Breck's Special Asters.

The demand for Breck's Asters from the leading commercial and private growers all over the United States is a sufficient recommendation of their superiority. We welcome a comparison of the product of Breck's seeds with that of the most highly lauded. Our prices speak for themselves.

Cultivation.—Sow in fine soil, and cover lightly in shallow boxes, which should be set in the greenhouse or a sunny window. Keep moderately moist until the plants are well up, then transplant, three inches apart.

- 265 Breck's International Prize.** Breck's International Prize represents all the best classes and colors of large flowering Asters, and embraces the cream of the most desirable species only.

330. Dwarf Pæony-Flowered Perfection Aster.

Plants of fine dwarf habit. Flowers large, very double, incurved, and of great beauty, 1 ft.
—finest mixed, per oz. \$2.50, ¼ oz. 75 cts., pkt. 10 cts.

See Special Offers on third page of cover

Balsam (*Impatiens Balsamina*).

Magnificent summer and autumn flowering annuals. A rich sandy loam is most suitable for them. They must be kept well watered. If transplanted several times the plants have a tendency to dwarf and produce more double flowers. Seed may be started early in heat or outdoors in May.

Balsams are not often given room for perfect development; they will easily cover 12 to 18 inches of space each way if given fair treatment.

Campanula (*Canterbury Bells*).

These are well-known favorites. Seed may be sown in the open ground in April or May. The annual and biennial sorts will bloom the first year; the perennials early the year following. They all like a good rich soil. All of them are exceedingly beautiful and attractive, especially when the different colors are planted together.

C. calycanthema can be transplanted to pots for house decoration by soaking the soil about them with water and lifting with a ball of earth.

Calendula (*Pot Marigold*).

"The Marigold of Shakespeare's time." One of the most popular and easily grown hardy annuals. The plants are free flowering and do well in almost any situation, although they prefer a warm, loose soil. They bloom the whole season. It is usual to sow the seeds where the plants are intended to stand, but they will bear transplanting. Calendula make good pot plants and flower freely during the winter.

BRECK'S DOUBLE BALSAM

Candytuft (*Iberis*).

Very showy, branching annual plants that produce flowers which embrace nearly all shades of red, purple and white. A succession of sowings lengthens the season of bloom. Seed sown outdoors in spring will produce flowers from July until September. Is very effective for beds, borders, etc., and useful for pot culture during winter. Grown extensively by florists for cutting.

Perennial Candytuft, see *Iberis*. Page 112.

Candytuft, Breck's Improved White Spiral.

Cockscomb (*Celosia*).

The *Cristata* sorts have become very popular for bedding; their beautifully formed, highly colored flowers being very attractive and effective. The *Plumosa* class is splendid in both foliage and flower, very suitable for vases, borders, etc. The "Ostrich Feather" produces large plumes, beautifully curved and curled.

Seed should be sown in a hot-bed in Mar. or Apr. and transplanted to pots when large enough.

***Gentaurea* (Cornflower).**

C. Cyanus is the favorite **Bachelor's Button**, or **Ragged Sailor**. This class is of the earliest culture and produces an abundance of bright colored and beautifully formed flowers throughout a very long season. The strain of seed we offer embraces everything desired in color and form. Sow seed early outdoors and thin out the plants to 6 or 8 inches apart, or in boxes in the house, and transplant when large enough.

Chrysanthemums, Annual or Summer Flowering.

All the summer flowering chrysanthemums are very effective and showy plants for beds and borders, besides affording an immense material for cutting. Sow seed where the plants are wanted to bloom and thin out to 9 inches apart; earlier flowering plants can be had by sowing early in a cold frame, and transplanting when large enough.

Coreopsis (Calliopsis).

A species of very showy annual and perennial plants that are invaluable for garden decoration and cutting. They enhance the color of the garden by the wealth of bright yellow flowers, which is strengthened in some sorts by disks of rich crimson, maroon and various shades of brown. The perennials are all hardy border plants and well worthy a place in every garden. The flowers last well when cut.

Breck's Early Flowering Cosmos

Cosmos (Cosmea)

We especially recommend Breck's Massachusetts grown Cosmos as the most desirable and most satisfactory for growing in New England. Under ordinary cultivation they will begin to bloom in July and continue up to frost. The flowers are of good size and delicate shades. Sow seeds of Breck's Early Flowering varieties in open ground, in light warm soil, early in May and cover not more than half an inch deep. The seed germinates in about ten days. The Cosmos must have the full sunshine for successful growing. High-grade fertilizer, rich in potash, such as Breck's Lawn and Garden Dressing, gives best results. Seeds of the later varieties should be sown early in March in a hot-bed or box in the house. When plants are 2 inches high transplant into 2-inch pots, when well established repot into 4-inch pots and water moderately. Transplant to open ground in June.

Convolvulus (Morning Glory)

Convolvulus Major is the old favorite, and grows rapidly to a height of ten feet. The other two sorts are new and fine, especially the Japanese Morning Glory. They bear large and wonderfully colored flowers.

The dwarf Morning Glory is suitable for growing in clumps or beds, and fine for hanging baskets, window boxes, etc. Height, 1 foot.

Dahlias (Breck's Selected).

We offer seed of the following varieties. This seed is saved from the best collections in Europe. If the seed is started early in a hot-bed an abundance of flowers will be produced the same season. Dahlias like a good, deep, rich soil. The roots should be housed during winter in a cool cellar where they will be safe from frost. In spring roots can be divided and about May 20th transplanted to the open ground.

Dianthus

(Pink or Carnation).

Among the Dianthus will be found some of our best loved flowers.

The biennial sorts are all well-known favorites that flower the first season. The colors of the Heddwegii vary through all shades of crimson to a delicate rose.

The Diadematus shades from rose to purple. They are all exceedingly ornamental, and suitable alike for beds, borders, house cultivation and cutting.

Barbatus is the old-fashioned German Sweet William.

The Caryophyllus bloom in about four months from time of sowing and produce 80 per cent double flowers.

Seed can be sown under glass in the spring, or in an open, sheltered bed. The seedlings are easily transplanted and should stand 8 to 12 inches apart; dwarf ones about 6 inches. If especially large, brilliant flowers are desired, a bed of well-mixed, turfy loam, leaf-mold and well-decayed manure should be prepared for them. Average height, 1 ft.

Breck's Giant Eschscholtzia.

***Eschscholtzia* (California Poppy).**

Large showy flowers in shades of yellow, orange, rose and white. The foliage is bluish green and very attractive. For a display in beds and borders as well as for cutting, these flowers are very satisfactory. The plants are fairly hardy and seed may be sown quite early where wanted to bloom.

Double English Daisy.

The English Daisies are very popular spring-flowering, perennial plants; they are very often used for bedding with Pansies and Forget-me-nots, Silenes, etc. They grow about 4 inches high and have a flowering season from May until Sept. They are easily grown. Seed can be sown either in spring or in midsummer. They require protection in a cold frame during winter.

***Breck's Silver Medal Hollyhocks* (*Althæa Rosea*).**

Breck's Silver Medal strain of seed is superior to any in vigor of growth, texture, quantity and range of color.

Although Hollyhocks are perennials, young plants produce larger flowers and fresher colors than old ones, therefore we recommend the sowing of seed every year. Plants will flower the same year from seed sown in the greenhouse in January and grown on in pots until time for setting outdoors. Sowings can also be made from May to August for the following year's flowering; when the plants are large enough, transplant to a rich, cool soil, giving each at least a foot of space for growth. The permanent border or location in which they are set should be dug deep and well manured. Abundance of water should be supplied throughout the entire season of growth.

Larkspur (Delphinium).

Larkspurs thrive in any good garden soil, but are of much better color and texture of flower when grown in a deep, rich, sandy loam. Both the annual and perennial sorts are easily raised from seed, fall or early spring sowing is recommended. The perennial sorts are also propagated by cuttings and divisions of roots. Seedlings should be given plenty of room by transplanting; they may be set out where they are intended to flower any time in May or June. The tall sorts are very suitable for setting among shrubbery and in borders; the dwarf kinds are effective for beds.

Breck's Colossal Sweet Mignonette.

Marigolds (Tagetes). (See also Calendula.)

For adding shades of yellow to the garden effect in late summer and autumn the African and French Marigolds are unsurpassed. They make nice beds when grown together, the Dwarf French sorts being used for edging; both sorts are also very desirable for borders or for brightening up any bare or colorless spots. Sowings should not be made outdoors until danger from frost is passed.

Mignonette (Reseda Odorata).

Well known, fragrant favorites, delightful for working into bouquets. For winter flowering seed should be sown in July or August. All the sorts we offer are very fine, but especial attention is called to Breck's Giant Machet and Breck's Colossal as being particularly good and the most desirable for pot culture. A succession of bloom during both summer and winter may be had by repeated sowings.

Breck's Rainbow Nasturtiums (*Tropæolum*).

A great variety of soft and pleasing colors. The seed we offer is a selected strain and mixed in proper proportions so that our customers may be assured of having all the effective shades of *pink, rose, scarlet, crimson, brick, claret, chocolate, brown, garnet, orange, primrose, yellow and white*. Seed may be planted, one inch deep, early in April, where wanted to bloom or in any convenient place, and the plants when large enough transplanted to the beds.

Pansy (Viola Tricolor).

The Pansy is one of our specialties. For size and form of flowers, variety and brilliancy of colors and markings, there is nothing approaches it. *Breck's Boston Prize* is an American strain and is superior to any European mixture. The flowers are immensely large and wonderful in their coloring.

The English and Scotch Prize Pansies are remarkably fine; they are from the finest collections in these countries.

Our Trimardeau Pansies embrace the cream of that type, and will give perfect satisfaction in every particular.

Pansies delight in a cool, moist soil and a situation that protects them from cutting winds as well as the midday sun. To obtain large flowers early in spring, seed should be sown in July or August and the plants protected with a frame during winter. Spring sown seed does very well, although the flowers produced are not so large.

Shirley Poppy.

POPPY (*Papaver*).

Poppies are so well known that it is needless to say anything in their favor. Quite a number of the perennial varieties bloom the first year from seed if sown early. The new strain of Shirley we offer produces softer and more pleasing shades than we have offered hitherto. Sowings made in May, and again several times during spring, will produce a continuous bloom from early summer until frost. The seed should be sown where the plants are wanted to bloom, as Poppies do not take kindly to transplanting. Cover seed very lightly, and firm the soil with a flat board. When large enough thin out the plants. A sandy loam and early spring sowings produce the best flowers.

Petunia Hybrida.

Free flowering, sweet scented and easily cultivated, well-known favorites, effective and beautiful in borders, beds, vases, etc. They thrive in almost any soil and produce a brilliant array of color throughout a long season. Breck's Prize is an exceedingly fine strain of large fringed flowers that produces a large percentage of doubles. We call special attention to the collections offered. The seed is all saved from selected pot-grown plants, and we believe will prove perfectly satisfactory.

Breck's Large Flowered Petunia.

Salpiglossis.

Salpiglossis.

The Salpiglossis is a beautiful garden annual. The magnificent flowers, large and funnel shaped, present an extremely pleasing variety of colors in mottled, veined and self-colored forms. They require good, rich soil, and will amply repay in glorious effect good care and liberal treatment.

The strain we offer under the name of Multi-Colored is a wonderful improvement over all other varieties of this very desirable plant.

Sweet Peas (*Lathyrus odoratus*).

We have endeavored to simplify the selecting of Sweet Peas by reducing our list of varieties, and by specifying those sorts that, in the opinion of leading specialists, are most representative and desirable for persons who desire to grow the named kinds.

Seeds should be sown as early as possible, in drills 4 inches deep. At the time of sowing cover only with one inch of soil and fill in the drill as the young plants grow, taking care not to cover the top of the plants. A deep, rich soil and a sunny situation is best.

BRECK'S BOSTON MIXTURE.

1900 *The very best mixture offered at any price. It includes in good proportion over sixty of the choicest kinds. Pkt. 5 cts. oz 10 cts.; ¼ lb. 25 cts.; lb. 75 cts.*

Sunflowers (Helianthus).

Most Sunflowers being of strong growth are not suited for beds near the house, but are very desirable for growing in shrubberies, against fences, or making backgrounds for borders. They do well in any kind of soil, from light sandy to heavy; they do not grow to perfection if heavily shaded. Seeds may be sown where the plants are wanted to bloom, or indoors in March and April, and transplanted when weather is suitable.

Breck's Defiance Zinnia.

Breck's Zinnias.

Breck's Defiance is without exception the finest strain of large Double Zinnias offered. The plants are of vigorous branching habit and produce freely immense double flowers in an endless variety of splendid colors. The separate colors are saved from the same collection, which is admitted to be the finest in Europe. Seed sown early in heat will begin to bloom in June and continue until frost, or seed may be sown outdoors where the plants are intended to bloom.

GENERAL LIST OF FLOWER SEEDS

Explanation and Key to Abbreviations.

Our General List of Flower Seeds comprises the following, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. The dash (—) designates the repetition of the name above it as applying to the variety to which the dash is prefixed; the *first column*, following the name, denotes hardness and duration; the *second column*, height in feet; the *third column*, color or predominating colors; the *fourth and fifth columns* show the price per ounce and packet respectively; the *sixth column* gives brief descriptions or special notes on culture.

hA designates Hardy Annuals—Lasting but one year.
 hHA " Half Hardy Annuals—Lasting but one year.
 tA " Tender Annuals—Lasting but one year.
 hB " Hardy Biennials—Lasting two years.
 hHB " Half Hardy Biennials—Require protection during winter.
 hP " Hardy Perennials—Lasting three or more years.

hhP designates Half Hardy Perennials—Require protection during winter.
 tP " Tender Perennials—Lasting three or more years, but require greenhouse protection during winter.
 † " Biennials or Perennials that if sown early will bloom the first year.
 Trai. " Trailing Habit.
 Var. " Various.

The abbreviations of colors are—

blk.—black.
 br.—brown.
 tri.—tricolor.
 car.—carmine.

crim.—crimson.
 sul.—sulphur.
 lav.—lavender.
 pur.—purple.

var.—variegated.
 scar.—scarlet.
 strip.—striped.
 ver.—vermilion.

In some instances when the flower is of two colors, these are indicated by the initial letters only,—for example, b. & w.—blue and white; s. & y.—scarlet and yellow; w. & p.—white and pink.

940 <i>Sugar Trough</i>	hhA	15		.40 5	Used as water holders.
941 <i>Mixed</i>	hhA	var.		.25 5	All ornamental.
collection, 12 varieties... 50 cts.					
945 <i>Cuphea</i> (<i>Cigar Plant</i>) <i>miniata</i>	†hhP	1	crim.	5	} Continual bloomers. Adapted for bedding and for house and conservatory decoration.
946 — <i>compacta</i>	†hhP	¾	mixed	10	
Cyclamen giganteum					
950 — <i>Breck's Imperial</i>	tP	1	mixed	50	} Easily grown, free flowering, bulbous plants for pot culture. Breck's Imperial is unsurpassed for size, form, profusion and variety of delicate colored flowers. It has eclipsed all others on the exhibition tables at the Massachusetts Horticultural Society's exhibitions. The several varieties offered here are grown for us by the leading cyclamen growers of Europe, and are at least equal in quality to any obtainable.
951 — <i>Blood Red</i>	tP	1	d. cr.	50

Periwinkle , see Vinca page 120					
Petunia , see page 102					
2380 Phacelia campanularia	hhA	1	blue	.50 5	Whitlavia-like flowers; showy. Well known and useful, ornamental climbers, very much used for veranda or trellis work.
Phaseolus multiflorus (Climbing Bean).....					
2385 Scarlet Runner	hA	10	scar.	5	
2386 White Runner	hA	10	white	5	These flowers are of extreme beauty and are greatly admired. Their long duration of bloom, combined with their unequalled richness of color, renders them of invaluable service in the flower garden. By making a second sowing they may be had in bloom until frost. They prefer a rich soil and plenty of water. The doubles if sown and grown carefully make a splendid display of color last- ing all season.

Primula sinensis (Chinese Prim- rose)					Primulas are fine for winter and spring blooming; are free-flowering, and es- pecially valuable for cut flowers or for house and window culture; a cool place suits them best. To secure good results in growing these favorites the planter must be sure to obtain the very best strains only. Our seed is the cream of several collections that are recognized as the best in Europe. Breck's Superb is the finest strain in existence; vigor of plants, size, sub- stance and variety of delicate shades of flowers are its features.

2830 large flowering ten week bright crimson.....	hhA	1¼	crim.	4.00 10	} The seed we offer is all pot grown especially for us in Germany by the foremost cultivator of this fragrant favorite. It will produce a very large percentage of flowers that are unsurpassed for doubleness, form, size and color. Our Boston Florists' strain is now also raised in Germany. It produces a fine long spike, very double globular flower of the purest white. For a succession of flowers seed should be sown in March or April, in heat, and outdoors in May and June. A light soil and high cultivation are desirable.

Wild Garden Seeds.

Any one who has cultivated flowers in neatly laid out beds or carefully planted ribbon borders is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different seasons of bloom insuring something new almost every day. Half-oz. packets, 20 cts.

See Special Offers on third page of cover.

BULBS and PLANTS

ACHIMENES. Free flowering plants of easy cultivation. The bulbs should be potted early in a mixture of loam and leaf mould. Keep warm and water carefully. Assorted colors, 5 cents each; 50 cts. doz.

AGAPANTHUS UMBELLATUS (African Lily). Blue, fine for tubs, pots, etc. 35 cts. each.

—**Umbellatus albus.** White, 35 cts. each.

AMARYLLIS. Lovely lily-like plants that produce flowers in almost every shade of color, ranging from pure white to deep crimson.

—**Belladonna major.** Rosy pink, fragrant, 15 cts. each.

—**Formosissima (Jacobean Lily).** Blooms freely out-of-doors; flowers velvety crimson. 15 cts. each; \$1.75 doz.

—**Johnsonii.** Large crimson and white flowers. 40 cts. each; \$4.00 per doz.

HALLI (The Hardy Amaryllis). Produces in early summer strong stems about eighteen inches long on which are borne large clusters of beautiful rose-colored flowers. The bulbs are perfectly hardy and when planted in the border require no protection during winter. Extra strong bulbs, 50 cts. each.

APIOS TUBEROSA. A pretty, hardy native climber. Flowers resemble the popular **Wistaria**; very fragrant. 10 cts. each; \$1.00 per doz.

BEGONIA. Tuberous Rooted. These are desirable plants for bedding. The flowers are not destroyed by rain storms, but seem to shine more brilliant after every shower. The colors are varied and beautiful. Our bulbs are imported from the most reliable source known. Single flowered sorts as follows: **Red, Crimson, Scarlet, Rose, Pink, White, Yellow, Gold and Bronze, Striped and Flaked.** 5 cts. each; 50 cts. per doz.; \$3.75 per 100.

—**Single Flowered.** Mixed colors, 4 cts. each; 40 cts. per doz.; \$3.00 per 100.

—**Double Flowered Sorts.** Same color as the single kind. 10 cts. each; \$1.00 per doz.; \$6.50 per 100.

—**Double Flowered Mixed.** 8 cts. each; 85 cts. per doz.; \$5.50 per 100.

BESSERA ELEGANS (Coral Drop). Bright scarlet flowers borne on stems about two feet high. Will bloom from shortly after planting until frost. 5 cts. each; 50 cts. per doz.

CALADIUM ESCULENTUM. Beautiful ornamental foliage plant. The leaves are of immense size, light green with darker veins. Will grow in any good garden soil, to a height of five feet. Dry bulbs, according to size, 10, 15 and 20 cts. each; \$1.00 to \$2.00 per doz. Growing plants from pots, 20 and 25 cts. each; \$2.00 to \$3.00 per doz.

CINNAMON VINE. Hardy climber, shining green foliage, fragrant white flowers. 5 cts. each; 50 cts. per doz.

GLOXINIA BULBS. Our stock of these is very choice.

Bulbs potted up in nice sandy loam in February or March, will bloom in June and July. In the fall, dry them and store in a warm place through winter. Strong flowering bulbs in separate colors, per bulb, 10 cts.; \$1.00 per doz.; \$7.50 per 100.

GLADIOLI. To keep up a continuous bloom from June until frost, plantings should be made every two weeks. Plant six inches apart in rows, four inches deep. After frost lift and cut off near the bulb, and store in any dry place where the frost will not reach them.

—**AMERICA.** Color charming soft flesh pink, slightly tinged with lavender. Doz., \$1.00; 100, \$6.00.

—**AUGUSTA.** Pure white, blue anthers. Doz., 50 cts.; 100, \$3.00.

—**BRANCHLEYENSIS.** Vermilion scarlet. Doz., 30 cts.; 100, \$2.00.

—**MAY.** White flaked crimson. Doz., 30 cts.; 100, \$2.50.

—**Shakespeare.** White with pale rose; good forcing variety. Doz., \$1.00; 100, \$7.00.

—**BRECK'S BOSTON MIXED.** A good mixture, containing almost every shade known in the Gladioli family. 30 cts. doz.; \$2.25 per 100.

—**GROFF'S HYBRIDS.** A new strain, largely hybrids of *Nanceanus*, *Lemoinei* and *Childsii*. Very vigorous growth, largest size blooms, nearly all scarlet shades. 30 cts. doz.; \$2.00 per 100.

Unnamed Gladioli, Separate Colors.

Scarlet Red Shades. 30 cts. doz.; \$2.00 per 100.

Pink and Rose Shades. 30 cts. doz.; \$2.00 per 100.

White Shades. 30 cts. doz.; \$2.50 per 100.

Yellow Shades. 85 cts. doz.; \$7.00 per 100.

Striped and Variegated. 40 cts. doz.; \$3.00 per 100.

Gladiolus America.

HARDY GARDEN CHRYSANTHEMUMS.

These old-fashioned hardy plants are eagerly sought for by garden lovers. The list below embraces every variety of color. These plants, though hardy, with a slight protection winter more safely. Splendid for fall effects.

Climax. Rosy pink, free and early.

Eagle d'Or. Fine yellow.

Flora. Beautiful deep golden yellow.

Fred Peele. Deep crimson, tipped gold.

Goldfinch. Golden bronze.

Globe d'Or. Golden yellow.

Julia Lagravere. Very fine crimson.

Model of Perfection. A fine, pure white.

Mrs. Vincent. Dark crimson.

President. Rosy carmine.

Strathneath. Rosy pink, distinct.

Trojan. Bright maroon, yellow center, early and free.

White Jardin des Plantes. Extra-early white.

Yellow Jardin des Plantes. Extra-early yellow.

10 cts. each; \$1.00 per doz.; \$8.00 per 100.

**JAPANESE LARGE FLOWERING
CHRYSANTHEMUMS.**

The flowers of this class are larger than any of the other popular Japanese sorts. Those we have listed are the best of the large flowering sorts.

Pockett's Crimson. Splendid exhibition variety.

Merza. Pure white, large flower.

Nellie Pockett. A massive white of great depth.

Mrs. Norman Davis. Fine white; one of the best.

Col. D. Appleton. Deep golden yellow, large round flower.

Cheltoni. Large yellow; a monster flower.

F. S. Vallis. One of the best yellows.

A. J. Balfour. Handsome pink; habit strong and erect.

M. F. Plant. Deep pink, reflexed petals.

Mrs. C. H. Totty. Light pink, very showy.

Glenview. Reddish bronze, well built.

Mrs. H. Partridge. Crimson, broad petals, handsome flower.

15 cts. each; \$1.50 dozen; \$10.00 per 100.

Hardy Chrysanthemums.

**New and Improved Exhibition Varieties of Japanese
Chrysanthemums.**

Hon. Mrs. Lopes. Monstrous yellow for exhibition.

Hetty Wells. Gold, shaded bronze. Excellent.

Keith Luxford. Fine wine red. Splendid.

Mrs. Wm. Wincott. Fine early pink.

William Mease. Old rose cerise. Excellent.

Well's Late Pink. Mauve pink. Splendid.

Price 30 cts. each; \$3.00 dozen; \$20.00 per 100.

FLOWERING CANNAS.

The Cannas here offered are all started plants, not dry bulbs — that will come into bloom shortly after being set out.

Alphonse Bouvier. 5 ft.; foliage dark green; flowers crimson-scarlet.

Admiral Courbet. 5 ft.; foliage green; flowers yellow, speckled with orange-scarlet.

Antoine Crozy. 4 ft.; foliage green; carmine flowers.

Alice Roosevelt. 4 ft.; foliage dark green; flowers crimson.

Black Beauty. 4 ft.; foliage dark red. 25 cts. each; \$2.50 per doz.

Chicago. 4 ft.; large vermillion flowers.

Charles Henderson. 3½ ft.; foliage green; flowers crimson.

Crimson Bedder. 3 ft.; foliage green; flowers crimson.

Eastern Beauty. 4 ft.; foliage dark; large flowers; salmon-pink. 20 cts. each; \$2.00 per doz.

Florence Vaughan. 3½ ft.; foliage dark green; flowers golden-yellow, spotted red.

Flamingo. 4½ ft.; foliage dark green; flowers crimson.

Grand Rouge. 6 ft.; foliage dark green; flowers bright scarlet.

King Edward. 3½ ft.; foliage green; flowers orange-scarlet. 20 cts. each; \$1.75 per doz.

Madame Crozy. 3½ ft.; foliage green; flowers crimson-scarlet.

Morning Star. 4 ft.; foliage green; flowers yellow, spotted red.

President Cleveland. 3½ ft.; foliage deep green; flowers bright red.

Queen Charlotte. 4 ft.; foliage bluish-green; flowers red.

Victor Hugo. 4 ft.; foliage dark red; flowers scarlet.

ITALIAN, OR ORCHID-FLOWERED VARIETIES.

Austria. 4 ft.; foliage large green; flowers pure yellow.

Italia. 5 ft.; yellow, blotched with orange-scarlet.

La France. 4½ ft.; dark foliage; flowers orange-scarlet.

Pennsylvania. 5 ft.; green foliage; deep scarlet. 20 cts. each; \$2.00 per doz.

Pillar of Fire. 7 ft.; green foliage; flowers bright crimson-scarlet. 20 cts. each; \$1.75 per doz.

Price 15 cts. each; \$1.50 per doz., except as noted. Cannas are not subject to any of our Special Offers.

DAHLIAS.**Single, Double and Cactus Dahlias.**

The increasing demand for these beautiful fall blooming plants has stimulated growers to produce improvement in size, form, and colors. We offer the following named sorts which embrace some of the old standard varieties as well as the newer approved kinds. Planting should not be made until danger of frost is past in May. The bulbs should be lifted as soon as foliage is injured by first frost in the fall, dried, packed in sand and stored during winter in a warm place.

Show and Fancy Dahlias.

Arabella. Straw color, tinged buff.
Emily. White, tipped pink.
Frank Smith. Reddish maroon, white tipped.
Gold Standard. Golden yellow.
Guinea. Fine crimson.
Lady C. Herbert. White, tipped magenta.
Merlin. Clear scarlet.
Mont Blanc. Pure white.
Norma. Orange buff.
Pink Dandy. Rose pink.
Sensation. Lilac shade.
Thomas Pindred. Clear yellow.
 15 cts. each; \$1.50 doz.

Pompon Dahlias.

Catherine. Yellow.
Clara Hursch. Amber and rose.
Darkness. Dark crimson.
Eleganta. Quilled pink.
Indian Chief. Scarlet.
Little Gyp. Violet.

Pompon Dahlias.—Continued.

Snowclad. Pure white.
Sunshine. Bright Scarlet.
Winifred. White, tipped purple.
 15 cts. each; \$1.50 per doz.

Decorative Dahlias.

Black Beauty. Dark maroon.
Blue Oban. Bluish lilac.
Frank L. Bassett. Purple.
Grand Duc Alexis. Pure white quilled.
Maid of Kent. Crimson and white.
Mrs. Chas. Turner. Beautiful yellow.
Miss I. Newhall. Violet crimson.
Mrs. George Reid. Pink and white.
Nymphaea. Blush pink.
Oban. Crushed strawberry.
Sylvia. Light pink.
Wm. Agnew. Crimson scarlet.
 15 cts. each; \$1.50 per doz.

Single Dahlias.

Amy Barrillet. Crimson, bluish foliage.
Bristol. Dark crimson and violet.
Black Bird. Beautiful deep maroon.
Crimson King. Clear crimson.
Gold Standard. Lemon yellow.
Picturata. Pink, maroon, and deep red.
Twentieth Century. White and rose.
White Century. Clear pure white.
Scarlet Century. Scarlet crimson.
 15 cts. each; \$1.50 per doz.

New Collarette Dahlias.

Exposition de Lyon. Rich garnet, collar yellow.
La Fusee. Clear scarlet, collar white and violet.
Maurice Revoire. Rich maroon, collar pure white.
Orphee. Violet red, yellow tip, collar yellow.
Prince Galitzin. Reddish violet, collar white, striped red.
President Viger. Crimson, white collar.
 25 cts. each; \$2.50 per doz.

Cactus Dahlias.

Alpha. White, crimson and lilac.
Amos Perry. Velvety crimson.
Britannia. Salmon pink.
Cinderella. Purple.
Countess of Lonsdale. Salmon.
Flora M. Stredwick. White.
Harbor Light. Orange red.
Henry M. Robinson. Clear yellow.
J. H. Jackson. Dark maroon.
Lottie Dean. Amber and buff.
Mrs. A. F. Perkins. Yellow and white.
Standard Bearer. Scarlet.
 20 cts. each; \$2.00 per doz.

Single Cactus Dahlias.

Alice Lee. Soft pink.
Amy Robsart. Crimson.
Bertha. Yellow, tipped amber.
Queen Mary. Pure White.
St. Ronans. Fiery scarlet.
Sir Walter. Rose pink and salmon.
 20 cts. each; \$2.00 per doz.

See Special Offers on third page of cover.

**Lilium Auratum.**

TUBEROSES. These are universal favorites and very easily grown. Before potting, remove the small offsets.

Use rich loam and start in hot bed or in house. Do not set out until all danger from frost is past.

— **Excelsior Double Pearl.** 5 cts. each; 25 cts. per doz.; \$1.75 per 100.

WATER LILIES.

(Hardy Nymphaeas).

These are all equally as hardy as our native Pond Lily and may be planted as soon as vegetation commences in spring and any time during the season until the end of August.

— **Alba.** The hardy white English pond lily. 50 cts. each.

— **Odorata.** Our native white pond lily. 20 cts. each.

— **Odorata Sulphurea.** Large yellow fragrant flowers. 50 cts. each.

— **Rosea.** Cape Cod pink pond lily. 50 cts. each.

Hardy Perennial Phlox.

(Phlox Decussata.)

The Phlox is an old-fashioned favorite which is becoming more popular every year.

It is hardy and does well in all situations. By a selection of varieties they can be had in bloom from July until the middle of September; or by "cutting back" the plants early in the season, they will bloom throughout September. They will grow on a gravel bank, but do best in a warm, mellow soil, made deep by cultivation. We have selected these kinds as the best for general cultivation, feeling sure they will give good satisfaction.

Boule de Feu. Beautiful, bright salmon, crimson eye; good spike; very effective.

Coquelicot. Rich, orange-scarlet.

Eclairer. Finest Phlox yet produced, carmine flowers, centre salmon, surrounded by wreath of rosy white.

Edith. Dwarf, white, very floriferous.

Esperance. Silvery rose, centre white.

Eugene Verdier. Deep lilac shaded purple, with very distinct dark eye.

General Brice. Perfect flowers bright scarlet, centre bright purple.

General Chanzy. A new sort of extraordinary brilliancy and of large size. Dwarf habit.

Independence. Large and pure white; extra good.

Le Soleil. Brilliant china-rose; centre bright rose, surrounded with a pale rose tint. Flowers very large and perfect.

Le Feu de Monde. Bright salmon red; late.

Miss Stevenson. Deep pink, conspicuous crimson eye.

Moonlight. Beautiful silvery rose; fine truss and flower.

Ornament. Large flowers, bright pink; very large pink velvet centre.

Richard Wallace. Pure white, rosy crimson eye. 15 cts. each; \$1.50 per doz.

LILIES. Lilium Auratum. Golden Banded Lily of Japan. Immense white flowers, each petal marked with a wide gold band and spotted with maroon. Each, 20 cts.; per doz., \$2.00.

— **Lancifolium Rubrum.** White with rich crimson spots. Each, 15 cts.; per doz., \$1.50.

— **Roseum.** White stained and spotted, rose. Each, 15 cts.; per doz., \$1.50.

— **Melpomene.** White, suffused with darkest crimson. Each, 20 cts.; per doz., \$2.00.

— **Album.** Large, pure white flowers. Each, 20 cts.; per doz., \$2.00.

MILLA Biflora. Beautiful white waxy flowers with pale lemon anthers. Deliciously fragrant. Plant outdoors in May and take up bulbs in fall. Each, 5 cts.; per doz., 50 cts.; per hundred, \$3.75.

MADEIRA VINE. A beautiful, rapid-growing climber, bearing in profusion very fragrant white flowers. Each, 5 cts.; per doz., 50 cts.

MONTBRETIA Crocosmiaeflora. Very large flowers of fine shape. Base of flowers is bright orange, sprinkled with purple spots, arranged like Tigridia. Each, 5 cts.; per doz., 50 cts.

— **Germanica.** A decided acquisition; grows 3 feet high, and of sturdy branching habit. The flowers measure 3 inches across; color glowing scarlet shaded with orange, the reverse side being blood red. Each, 20 cts.; per doz., \$2.00.

TIGRIDIA (Shell Flower). Beautiful, large, shell-like flowers, produced from July until frost.

— **Conchiflora.** Orange and crimson spots. 5 cts. each; 50 cts. per doz.

— **Grandiflora Alba.** White flowers spotted with maroon and rose. 5 cts. each; 50 cts. per doz.

— **Crimson.** 5 cts. each; 50 cts. per doz.

— **Pavonia.** Red with crimson spots. 5 cts. each; 50 cts. per doz.

Pæony.

Herbaceous Pæonies.

The most popular hardy plants of the day. They surpass the rose in size, equal it in range of color and fragrance, are not troubled with insect pests. They do well in any good, rich, deep soil, and prefer a sunny situation, although they thrive almost equally well in a partially shady location. A liberal supply of water should be given them during the growing season. They are perfectly hardy, requiring no protection whatever even in the most severe climate.

The following 12 fine named double sorts, 50 cts. each; \$5.00 per doz.

Amabilis Grandiflora. White, large fringed petals.
Amabilis Speciosa. Rose shading to pink; large, sweet.
Baron T. Rothschild. Rose outside, centre salmon, sweet.
Delectissima. Rose, large, full, fine sweet.
Duchesse de Nemours. Rose pink, very large, double.
Fulgida. Dark crimson, showing golden anthers.

Festiva Maxima. Creamy white, centre carmine.
Francis Ortegal. Dark purple crimson, very large.
Humei. Rose, full, large, late; one of the best.
Officinalis Rubra. Deep red.
Perfection. Rose lilac, inside salmon, sweet.
Caroline Mather. Dark crimson, rose scented.

Double unnamed mixed, our selection, 25 cts. each; \$2.75 per dozen.

Single mixed, exceedingly beautiful, both in flower and foliage. The shades of color embraced are many and delicate, while the form and fragrance are delightful. 50 cts. each; \$5.00 per dozen.

- *Mollis*. Yellow flowers, downy, silvery foliage. 3 ft., 15 cts. each; \$1.50 per doz.
- Helianthus Multiflorus fl. pl.* (So called Hardy Dahlia). Double yellow. Aug.-Sept. 3 ft., 15 cts. each; \$1.50 per doz.
- Heliopsis Pitcherii*. Golden-yellow. July-Oct. 6 ft., 20 cts. each; \$2.00 per doz.
- Hemerocallis Disticha Plena*. Double terra-cotta flowers. Summer. 3 ft., 30 cts. each; \$3.00 per doz.
- *Dumortieri*. Orange. Summer. 2 ft., 30 cts. each; \$3.00 per doz.
- Heuchera Sanguinea*. Bright red flowers. Handsome foliage. Summer. 1½ ft., 25 cts. each; \$2.50 per doz.
- Hibiscus Moscheutos, Crimson Eye*. White, with crimson eye. Aug.-Sept. 3-4 ft., 20 cts. each; \$2.00 per doz.
- Iberis Coræfolia* (Perennial Candytuft). Flowers white, foliage evergreen. May-June. 6-12 inches, 20 cts. each; \$2.00 per doz.
- Iris Germanica*. Named sorts. White, Purple, marbled, etc. June. 2 ft., 15 cts. each; \$1.50 per doz.
- *Kämpferi* (Japanese Iris). Named sorts. Beautiful colors. June-July. 2 ft., 35 cts. each; \$3.00 per doz.
- Mixed. 15 cts. each; \$1.50 per doz.
- *Pumila*. White, blue, yellow. June-July. 6 inches, 20 cts. each; \$2.00 per doz.
- Mixed. 15 cts. each; \$1.50 per doz.
- Lathyrus Latifolius* (Perennial Pea). Bright red. Summer. 5 ft., 25 cts. each; \$2.50 per doz.
- *Albus*. White, otherwise like above. 30 cts. each; \$3.00 per doz.
- Lavandula Vera* (English Lavender). July. 1-2 ft., 15 cts. each; \$1.50 per doz.
- Liatris Pycnostacha*. Lavender-purple. Summer. 6 ft., 20 cts. each; \$2.00 per doz.
- Lobelia Cardinalis* (Cardinal Flower). 3-4 ft. August. Scarlet. Very showy border plant. 20 cts. each; \$2.00 per doz.
- Lupinus Polyphyllus*. Blue, pea-like flowers. 4 ft., 25 cts. each; \$2.50 per doz.
- Lupinus Polyphyllus*.
— *Alba*. White, form of preceding. 25 cts. each; \$2.50 per doz.
- Lychnis Chalcedonica*. Brilliant scarlet. Summer. 2-3 ft., 20 cts. each; \$2.00 per doz.
- *Diurna Rubra Plena*. Deep purplish-red. Summer. 2-3 ft., 35 cts. each; \$3.50 per doz.
- Lythrum Roseum Superbum*. Rosy-red. Summer. 2-3 ft., 20 cts. each; \$2.00 per doz.
- Monarda Didyma*. Brilliant scarlet. Foliage sweet-scented. Summer. 2-3 ft., 15 cts. each; \$1.50 per doz.
- Myosotis Palustris Semperflorens* (Forget-me-not). Light-blue. Summer. 15 cts. each; \$1.50 per doz.
- Oenothera Youngii*. Clear yellow. 2 inches in diameter. June-Aug. 2 ft., 25 cts. each; \$2.50 per doz.
- Papaver Orientale* (Oriental Poppy).
— Royal Scarlet. Scarlet. Small blotches. 2 ft., 35 cts. each; \$3.50 per doz.
- Phlox Subulata* (Moss Pink). Various colors. May. 6 inches, 10 cts. each; \$1.00 per doz.
- *Decussata*. In variety. Many colors. Autumn blooming. 2-3 ft., 25 cts. each; \$2.50 per doz.
- Pentstemon Barbatus Torreyi* (Beard-tongue). Bright red. July. 4-5 ft., 15 cts. each; \$1.50 per doz.
- Physostigia Virginiana*. Spikes of tubular-shaped, pink flowers. August. 3-4 ft., 10 cts. each; \$1.00 per doz.
- Polemonium Richardsonii* (Jacob's Ladder). Sky blue with golden anthers; sweet-scented. All Summer. 1½ ft., 25 cts. each; \$2.50 per doz.
- Potentilla Grandiflora* (Five-finger). Bright yellow. June. 2-3 ft., 25 cts. each; \$2.50 per doz.
- Primula Acaulis Hybrida* (English Primrose). Shades of white, yellow and red. Spring. 1 ft., 25 cts. each; \$2.00 per doz.
- *Elatior* (English Cowslip). Shades of white, yellow, red and brown. 1½ ft., 15 cts. each; \$1.50 per doz.
- Pyrethrum Roseum Hybridum*. Colors range white to dark crimson. Summer. 2 ft., 25 cts. each; \$2.50 per doz.
- Ranunculus Acris Plena* (Double Buttercup). Bright yellow. 15 cts. each; \$1.50 per doz.
- Rudbeckia Fulgida*. Orange-yellow, brown centre. August. 2-3 ft., 15 cts. each; \$1.50 per doz.
- Rudbeckia, Golden Glow*. Double golden-yellow. Aug.-Sept. 5 ft., 15 cts. each; \$2.50 per doz.
- Scabiosa Caucasica*. Lilac-blue. Summer. 2 ft., 25 cts. each; \$2.50 per doz.
- Sedum Spectabilis* (Showy Stonecrop). Rosy purple. September. 2 ft., 15 cts. each; \$1.50 per doz.
- Silphium Perfoliatum* (Compass Plant). Light yellow. July. 5-6 ft., 15 cts. each; \$1.50 per doz.
- Spiræa Gladstone*. White flower. Palm-like foliage. Summer. 2 ft. 20 cts. each; \$2.00 per doz.
- *Filipendula Plena*. Fern-like foliage, creamy white flowers. 2 ft., 15 cts. each; \$1.50 per doz.
- Stokesia Cyanea* (Cornflower Aster). Lavender blue. Aug.-Oct. 12 inches, 15 cts. each; \$1.50 per doz.
- Tritoma Maria Grandiflora*. Red and yellow. Aug.-Oct. 3 ft., 20 cts. each; \$2.00 per doz.
- *Pfitzerii*. Orange scarlet. Aug.-Oct. 4 ft., 15 cts. each; \$1.50 per doz.
- *Express* (Red Hot Poker). Orange red, very early. July-Oct. 3 ft., 25 cts. each; \$2.50 per doz.
- Veronica Longifolia Subsessilis*. Blue flowers. Aug.-Sept. 3 ft., 25 cts. each; \$2.50 per doz.
- Yucca Filamentosa* (Adam's Needle). Early growth, drooping white flowers. 6 ft., 25 cts. each; \$2.00 per doz.

Clematis. Elegant, hardy, free-flowering climbers.

Ina. White, shaded to a delicate lavender blue. 50 cts. and 75 cts. each.

Duchess of Edinburgh. Double white, sweet-scented. 50 cts. each.

Paniculata. The white Clematis now so popular. Plants 25 cts. to \$1.00 each; \$3.00 to \$10.00 per doz.

Mme. Baron Veillard. Soft pink, blooms from mid-summer until frost. 75 cts. each.

See Special Offers on third page of cover.

CLEMATIS—Continued.

Henryi. Immense, single, creamy-white flowers. 75c. each.

Jackmanni. Large intense violet-purple flowers. 50 to 75c. each.

Mme. Edmund Andre. Bright crimson. \$1.00 each.

Virginiana. (American White Clematis.) A profusion of white flowers in August. 25c. each.

HARDY CLIMBING PLANTS.

Actinidia Polygama. A strong, clean vine from Japan. 50c. each.

Akebia Quinata. Of rapid growth, with shining foliage and bluish clusters of fragrant flowers. 35c. each.

Ampelopsis Englemanni. A variety of the Virginia Creeper, with bright foliage; fine color in the autumn; the tendrils enable it to support itself like *A. Veitchii*. 25 and 35 cts. each.

— **Quinquifolia** (*Virginia Creeper*). Well known climber; very vigorous. 25c. each.

Ampelopsis Veitchii (*Boston Ivy*, *Japanese Ivy*). Well-known, particularly around Boston. It grows rapidly and clings to a wall or fence with the tenacity of ivy; the foliage is handsome in the summer, and changes to a crimson scarlet in autumn. For the ornamentation of brick or stone structures, it can be especially recommended. 25c. each; \$2.50 per doz.

Aristolochia Siphon (*Dutchman's Pipe*). Rapid grower, magnificent foliage 10 to 12 inches across, and curious, piped shaped, yellowish-brown flowers. 50c. each. Extra size, 75c.

Bignonia Radicans (*Trumpet Vine*). A quick growing vine, bearing large scarlet flowers, very brilliant. 35c. each.

Celastrus Scandens (*Roxbury Wax Work*). A vigorous vine with conspicuous orange-scarlet berries in autumn. 35c. each.

Dolichos (*Pueraria*). Kudzu Vine. Quick growing vine with rosy purple flowers. 35c. each; \$3.00 per doz.

Euonymus Radicans. Retains its glossy green and bright foliage through the winter; nice plants, 35c. each.

Honeysuckle, Hall's Japan. Abundant, vigorous foliage retained until early winter, flower white and yellow; fragrant. 25c. each. Extra size, 50c. each.

Honeysuckle, Scarlet. Strong, rapid grower, bright scarlet. 35c. each.

— **Belgica.** Dutch monthly, very sweet scented, red and buff. 35c. each.

— **Chinese Twining** (*Lonicera Japonica*). A well known vine, holding its foliage nearly all winter, blooms in July and Sept. Sweetly scented. 35c. each; \$3.00 per dozen.

Humulus Lupulus (*Hop Vine*). Distinct foliage, with clusters of hops. 15c. each; \$1.50 per dozen.

Lycium Barbatum (*Matrimony Vine*). Useful for covering screens or ledges. A fast grower. 25c. each; \$2.50 per doz.

Wistaria Chinensis. One of the most elegant and rapid growing of all climbing plants, bearing long pendulous clusters of pale blue flowers in May and June. 50c. each.

— **Alba.** White, otherwise similar to preceding. 75c. each.

Wistaria.

RHODODENDRONS.

There are no evergreen shrubs more desirable than Rhododendrons. They are hardy, and grow to spread several feet in diameter, giving annually a large mass of showy flowers in many colors. The leaves remain green throughout the winter, making the plant attractive and showy. They do best in a partial shade, and when set, a good sized hole should be dug and filled with leaf-mould from the woods, or pulverized muck. In fall, a mulch with leaves or stable manure will be found very beneficial.

18 in. plants \$1.50 each, \$15.00 per doz. 24 in. plants \$2.00 each, \$20.00 per doz.

Abraham Lincoln. Rosy crimson, of good form.

Album Elegans. Blush, changing to white; fine shape.

Boule de Neige. Pure white, very hardy.

Caractacus. Red purplish crimson, fine truss.

Delicatissimum. Blush white, edged pink.

Everestianum. Rosy lilac; spotted and fringed.

General Grant. Crimson pink.

Gloriosum. White, bold flowers and good foliage.

H. H. Hunnewell. Dark rich crimson.

Lady Armstrong. Pale rose, beautifully spotted.

Mrs. Milner. Rich crimson.

Roseum Elegans. Vivid rose, beautiful.

HARDY FLOWERING SHRUBS.

The month after each sort indicates the time of flowering.

Almond (*Prunus Jap. Rubra fl. pl.*) Double pink. 50c. May.

— (*Prunus Jap. Alba fl. pl.*) Double white flowers, beautiful. 50c. May.

Althæa Purpurea Plena (*Rose of Sharon*). *Hibiscus*. 35 and 50c. October.

Althæa. Double variegated. 35 and 50c.

— Double red, Double white, Double pink. 35 and 50c.

— Single white and Single blue. 35 and 50c.

Azaleas. Ghent Hybrids, perfectly hardy, brilliant colors.

Fine plants \$1.00; large sizes \$2.00 and \$2.50. June.

Azaleas.

— **Mollis.** A new type, flowering earlier than the *Ghent*, and in color and form approaching the Indian varieties. 75c. to \$1.00.

Barberry (*Berberis Thunbergii*). A low growing shrub of arching habit; the foliage changes to many brilliant colors in the fall. 35c. each. June.

— **Vulgaris** (*Common Barberry*). Vigorous habit, free bearer. 35 and 50c.

— Purple leaved. 35 and 50c.

See Special Offers on third page of cover.

HARDY FLOWERING SHRUBS—Continued.

Current Missouriia (*Ribes aureum*). Very ornamental, yellow flowers and glossy foliage. 35 cts. each. May.
Calycanthus Floridus. Strawberry tree or sweet-scented shrub, dark flowers. 50 cts. each. June–Sept.
Chionanthus Virginicus (*Fringe Tree*). White. 50 cts. June.

Clethra Alnifolia. White, fragrant flowers, on spikes. 50 cts. July.

Cornus Florida (*Dogwood*). White. 50 cts. May.

—**Sanguinea** (*Red Osier*). Bark deep red. 35 cts.

—**Elegantissima**. Variegated foliage. The leaves are marked with silvery white. 50 cts.

Corchorus Japonica (*Kerria*). A small shrub with bright green leaves and clear yellow flowers. 25 and 50 cts. June and July.

Desmodium Penduliflorum (*Sweet Pea Shrub*). Red and violet pea-shaped flowers. 50 cts. Autumn.

Deutzia Gracilis. Compact, filled with starry white flowers. 35 and 50 cts. June.

—**Crenata fl. pl.** Flowers double white, tinged with rose. 35 and 50 cts. June.

—**Alba fl. pl.** With very double pure white flowers. 35 and 50 cts. June.

—**Pride of Rochester**. Large panicles of white flowers, tinted rose. 35 and 50 cts.

—**Lemoine**. An early bloomer; flowers pure white and well opened. 35 and 50 cts.

Elder, Golden (*Sambucus Aurea*). Very effective for its bright yellow foliage. 15 and 35 cts.

Eleagnus Longipes. A new fruit-bearing ornamental shrub from Japan. A decided novelty. 75 cts. July.

Euonymus Atropurpureus (*Burning Bush*). Purple. 50 cts. June.

Exochorda Grandiflora. A choice shrub of strong, upright growth, producing a profusion of large, snowy-white flowers in June. 50 and 75 cts. May.

Forsythia Fortunii. Large deep yellow flowers; upright. 35 and 50 cts. April.

—**Suspensa**. Trained as a standard, it becomes one of the most beautiful weeping shrubs, covered with bright golden-yellow blossoms, early in summer. Dwarfs, 35 and 50 cts. April.

Hydrangea Paniculata Grandiflora. Flowers white in great pyramidal panicles, about a foot long. 50–75 cts. and \$1.00. Aug.–Oct.

Kalmia Latifolia (*Mountain Laurel*). A choice native evergreen shrub with shining foliage and dense clusters of pink or nearly white flowers. Well formed clumps. \$1.50 and \$2.00. June.

Lilac (*Syringa*). Bluish-purple flowers. 35 and 50 cts. May.

—(*S. Alba*). Pure white. 50 cts. May.

Lonicera Tartarica (*Bush Honeysuckle*). Pink, sweet-scented. 35 cts. May.

Mahonia Aquifolia. A handsome shrub with shining prickly leaves, and showy, bright yellow flowers in May, followed by large clusters of purple berries. 35 cts. May.

Pyrus Japonica (*Cydonia*). Japan Quince, flowers bright scarlet, very showy. 25 and 50 cts. May.

Rhus Cotinus. The well known smoke bush. 3 ft. 50 cts.; 5 ft. \$1.00. June.

—**Glabra Var. Laciniata** (*Cut-leaved Sumach*). Leaves deeply cut, like a *Sword Fern*. Red in autumn. 75 cts.

Snowball (*Viburnum Plicatum*). A great improvement on the old-fashioned sort, with dark green foliage, and superb trusses of white flowers in midsummer. 50 and 75 cts. June.

Spiræa Aurea. Frequent pinching produces a deep golden-yellow color. 35 and 50 cts.

—**Anthony Waterer**. One foot high. Crimson. 50 cts. June–Oct.

—**Thunbergii**. Dwarf, flowers early, very pretty. 35 and 50 cts. April–May.

—**Van Houttei**. The most profuse flowering of the Spiræas, the bush being a mass of white bloom. 35 and 50 cts. June.

Syringa or Mock Orange (*Philadelphus*). Of compact habit, with creamy-white flowers, deliciously fragrant. 35 and 50 cts. June.

—**Aurea** (*Golden-leaved Syringa*). A very showy plant of medium size, with golden-yellow foliage. 25 and 50 cts. June.

Viburnum Opulus (*High Bush Cranberry*). Very ornamental, having clusters of red berries which remain on the branches until winter. 50 cts.

Weigelia Rosea. Well known, very free flowering. 35 and 50 cts. May–June.

—**Variegata**. Fine variegated foliage, rosy-pink flowers. 50 cts. June.

—**Eva Rathke**. An erect grower with dark carmine-red flowers. 35 and 50 cts. June.

EVERGREENS.

Arbor Vitæ (*Thuja Occidentalis*). Common American form. 2 ft. 25 cts.; 3 ft. 50 cts.

Fir Balsam (*Abies Balsamea*). Erect, regular pyramidal tree, rapid grower, very hardy. 50 cts. to \$1.00.

—**Concolor**. The foliage varies from blue to green. 3 ft. \$3.50; 4 ft. \$5.00 each.

Juniper Virginiana (*Red Cedar*). Native variety. 3 ft. 50 cts.; 5 ft. \$1.00.

—**Hibernica** (*Irish Juniper*). Of erect, tapering growth, beautiful and hardy. 75 cts. and \$1.00.

—**Sabina**. Trailing habit, fine for massing. 50 and 75 cts.

See Special Offers on third page of cover.

Spiræa Van Houttei.

EVERGREENS—Continued.

- Pine, Austrian.** Stout growth, long needles, perfectly hardy in bleakest exposure. 2 ft. 50 cts., 3 ft. 75 cts. each.
— White (*P. Strobus*). The most ornamental of all our native pines. 3 ft. 50 cts., 4 to 5 ft. \$1.00 each.
Retinospora Plumosa. Very hardy, with plume-like foliage. 2 ft. 50 cts., 3 to 4 ft. \$1.00, 4 to 5 ft. \$3.00
— var. Aurea. Of bright golden color. 2 ft. \$1.00, 4 ft. \$2.50, 5 ft. \$3.00.
— Squarrosa. Graceful, drooping, plume-like, glaucous green foliage. \$1.00 and \$2.00.
Spruce, White (*Picea Alba*). Very hardy native tree. 2½ ft. 50 cts., 4 ft. \$1.00.
— Colorado, Blue (*P. Pungens*). Perfectly hardy, pyramidal, foliage dark steel-blue. 2 ft. \$2.50, 3 ft. \$5.00.
— Norway (*Abies Excelsa*). An elegant tree, hardy, lofty, rapid growth, and pyramidal form. 2 ft. 50 cts., 4 ft. \$1.00.
— Hemlock (*Abies Canadensis*). Of good shape and habit. 2 ft. 75 cts., 3 ft. \$1.00.

SHADE AND ORNAMENTAL TREES.

- Apple, Bechtel's Double Flowering Crab** (*Malus Halleana*). Large double flowers resembling pink roses; very fragrant. 50 cts. and \$1.00.
— Floribunda. Single, carmine in bud, white when open. 50 and 75 cts.
Ash, American White (*Fraxinus Alba*). A large, noble tree. 9 ft. 75 cts., 10 ft. \$1.00.
— Mountain (*Sorbus Aucuparia Pendula*). Very ornamental, bearing large clusters of shining red berries. 6 to 7 ft. 75 cts., 9 ft. \$1.00.
Beech, American (*Fagus Ferruginea*). Compact form, rich, glossy, attractive foliage. 3 to 4 ft. 50 cts., 5 to 7 ft. \$1.50.
— Rivers Purple (*F. Atropurpurea*). Finest of all purple-leaved trees, beautiful as single specimens. 4 to 5 ft. \$1.50.
— Cut-Leaved (*F. Incisa*). Distinct and fine. 3 ft. \$1.00.
— Weeping (*F. Pendula*). A remarkable picturesque tree of curious growth. 4 ft. \$2.00.
Birch, European White (*Betula Alba*). A graceful tree with silvery bark, slender branches, elegant drooping habit. 5 to 7 ft. 50 cts., 7 to 8 ft. 75 cts.
— Canoe (*B. Papyracea*). A native variety which attains great size. 6 to 8 ft. 75 cts., 8 to 10 ft. \$1.00.
— Cut-Leaved, Weeping (*B. Pendula Laciniata*). One of the most popular weeping trees, most beautiful as specimens on the lawn. 6 to 8 ft. \$1.00, 8 to 10 ft. specimens \$2.00.
Catalpa Speciosa. A Western type, very desirable, being more hardy and finer in bloom than the common variety. 6 to 7 ft. 75 cts., 8 to 10 ft. \$1.00.
— Bungei, Chinese. Grafted on high stems, head round in form. \$1.50 each.
Chestnut, American (*Castanea Americana*). A tree of stately growth. 4 to 5 ft. 50 cts., 8 ft. \$1.00.
— Horse (*Aesculus Hippocastrium*). Strong habit, magnificent foliage, and fine spikes of flowers in May and June. 5 to 6 ft. \$1.00, 8 ft. \$1.50.
Elm, American (*Ulmus Americana*). The noble spreading and drooping tree of our own forests. 10 ft. \$1.25, 12 ft. \$1.75.
— English (*U. Campestris*). An erect, lofty tree of rapid, compact growth. 8 to 10 ft. \$1.00.
Gymnocladus Canadensis (*Kentucky Coffee Tree*). Large pinnate leaves, green flowers in June, followed by large pods. Does well in wet places. \$1.00 and \$1.50.
Hawthorn, Double White (*Crataegus Alba, fl. pl.*). Ornamental flowers and foliage. 5 ft. \$1.00.
— Paul's Scarlet (*C. Coccinea fl. pl. Paulii*). Flowers bright carmine red, makes a striking contrast when planted with the white. 5 ft. \$1.00.
Laburnum, Golden (*Cytisus*). A small tree producing freely long clusters of the brightest golden-yellow blossoms of sweet-pea size and shape. 4 ft. 50 cts., 5 to 6 ft. \$1.00.
Larch, European (*Larix Europaea*). An elegant rapid-growing pyramidal tree. 4 to 6 ft. 75 cts.
Linden, American, or Basswood (*Tilia Americana*). A beautiful, rapid growing native tree with large leaves and fragrant flowers. 8 ft. 75 cts., 10 ft. \$1.00.
— European (*T. Europaea*). Pyramidal tree of larger size. 7 to 8 ft. 75 cts., 8 to 10 ft. \$1.00.
Maple, Cut-Leaved Weeping (*Acer Wierii laciniatum*). A weeping silver-leaved variety with deeply cut foliage. 8 ft. \$1.00.
— Japan (*Atrosanguineum purpureum*). This is the richest crimson and the most brilliant, vigorous, and the best type of the Japanese varieties. \$2.00 each.
— Japonicum aureum (*Golden-leaved Japan Maple*). \$1.50.
— White or Silver-Leaved (*A. Dasycarpum*). A native variety of rapid growth, very beautiful. 8 to 10 ft. 75 cts., 10 to 12 ft. \$1.00.
— Norway (*A. Plantanoides*). Of sprawling habit, foliage dark green. 7 to 8 ft. 75 cts., 10 to 12 ft. \$1.00.
— Sugar (*Acer saccharinum*). One of the best street trees. 6 to 8 ft. 75 cts., 10 to 12 ft. \$1.50.
- Magnolia Acuminata** (*Cucumber M.*). Of pyramidal growth, flowers yellow, tinted with bluish purple. Fine specimens. 5 ft. 75 cts.
— Conspicua (*Chinese White*). A variety of great beauty; the flowers are large, pure white, and appear before the leaves. 2 to 3 ft. \$1.75, 3 to 4 ft. \$2.50.
— Soulangeana. Flowers white and purple, cup shaped; foliage large and glossy. Fine specimens. 2 to 3 ft. \$2.00, 3 to 4 ft. \$2.50, 5 to 6 ft. \$5.00.
Mulberry, Downing's Everbearing (*Morus*). A rapid growing tree which bears nice fruit. 4 to 5 ft. 50 cts.
— Teas, Weeping. Absolutely hardy and free from disease, very vigorous in growth. 2 years old \$1.50.
Oak, Palustus or Pin. The best and most popular species for general planting. 8 to 9 ft. \$1.00.
— Red (*Q. rubra*). Native species of rapid growth. 6 to 8 ft. 90 cts., 8 to 10 ft. \$1.25.
Poplar Bolleana (*Populus*). Pyramidal growth. 8 to 10 ft. \$1.00, 10 to 12 ft. \$1.50 each.
— Carolina. Pyramidal form, rapid grower, suitable for park or street planting. 8 to 10 ft. 50 cts., 10 to 12 ft. 75 cts. each.
— Lombard (*P. fastigiata*). Well known and remarkable for its erect rapid growth. 8 to 10 ft. 50 cts., 10 to 12 ft. 75 cts.
Prunus Pissardi. One of the best novelties of late years. The wood and leaves are dark purple throughout the entire season. 4 to 5 ft. 75 cts.
Syringa Japonica (*Giant tree lilac*). It makes a stout tree with large rich foliage, and throws up well above the leaves large clusters of white flowers about a foot long. 3 to 4 ft. 75 cts., 4 to 5 ft. \$1.00.
Tulip Tree (*Liriodendron tulipifera*). Fiddle-shaped leaves and tulip-like flowers. 8 to 10 ft. \$1.00.
Willow, Kilmarnock (*Salix Caprea Pendula*). An exceedingly graceful tree with glossy foliage and perfect umbrella head. \$1.00.
— Golden Barked (*S. aurea*). Rapid grower. Golden bark in winter. Valuable for sea shore. 4 to 5 ft. 50 cts., 6 to 8 ft. 75 cts.
— Laurel Leaf (*S. Pentandra*). Leaves large, dark, glossy green, highly ornamental; excellent for sea-shore planting. 5 to 6 ft. 50 cts., 6 to 8 ft. 75 cts. each.

See Special Offers on Third Page of Cover

FRUIT TREES—Apples.**Summer.**

Astrachan. Large, crimson, very early.
Early Harvest. Pale yellow, excellent, early.
Golden Sweet. Large, pale yellow, sweet.
Williams. Dark red, mild flavor.

Autumn.

Walter Pease. Larger, better flavored, more productive and longer keeper than the *Gravenstein*. Highest quality. \$1.00 each.
Gravenstein. Large, yellow, striped red.
Fameuse (Snow Apple). Crimson, flesh white, excellent.
Porter. Medium, bright yellow, good.

Prices, 6 to 7 feet 75 cents each; \$7.50 per dozen; \$50.00 per 100. 5 to 6 feet 50 cents each; \$5.00 per dozen; \$40.00 per 100.

Grab-Apples.

Hyslop. October to January; deep crimson.
Transcendent. September, October; useful alike for preserving, pies, sauces and cider.

Pippin. Fall, yellowish green, very fine.
Sops of Wine. Medium, red, flesh white, mild.

Winter.

Baldwin. Large, dark red, productive, medium.
Golden Russet. Late yellow, good flavor.
Hubbardston. Large, yellow, splashed red, early.
King. Large, striped red, excellent.
Northern Spy. Large, striped red, good keeper.
Rhode Island Greening. Large, yellowish green, medium.

Lombard. September; medium, violet, red, juicy.

Yellow Egg. August; large, yellow.

Japanese.

Abundance. Early; fruit amber turning to cherry, flesh yellow, juicy, tender and sweet.

Burbank. September; bright red, flesh yellow and sweet.

Wickson. Late, large, carmine, delicious, small stone.

Satsuma. September; purplish red, flesh dark red, juicy and of fine quality.

Price: 5 to 7 ft., 50 cts. each; \$5.00 per doz.

Black Hamburg Grapes.

HOT-HOUSE GRAPES.

We list here a very fine stock of hot-house grapes with strong canes, 4 to 5 ft. long.

Alicante. Black. An excellent late variety. Large and showy, hangs well. Bunches and berries large, jet black, with blue bloom.

Black Hamburg. Black. This variety has long been considered the first of the black grapes for the vinery. Its very large size and most luscious flavor render it universally esteemed.

Gros Colman. Black. A late keeping variety, now grown largely for commercial purposes in England and sent to this side to supply our wants in this line. The berries frequently measure $4\frac{1}{4}$ inches around, and therefore requires early and severe thinning.

Gros Maroc. Purple. An excellent variety, ripening after Black Hamburg. A great bearer, well suited to a cold vinery. Bunches large, long, shouldered. Berries large, deep reddish purple, sweet and rich.

Muscat of Alexander. White. A well-known grape which furnishes the Muscatel raisins from Spain. It requires a high temperature to ripen it thoroughly. Bunches very large, long, loose shouldered. Skin pale amber, with thin white bloom. Sweet and rich with fine Muscat flavor.

WHITE FRONTIGNAN. White, a very favorite grape of hardy habit and uniform productiveness. Bunches of medium size, rather long without shoulders. Skin thin, dull white or yellow, covered with a thin bloom. Flesh tender, with a rich, perfumed, musky flavor.

\$1.50 each; \$8.00 per half doz.; \$12.00 per doz.

HARDY GRAPES.

Concord. A large, handsome, popular grape. Sept.

Eaton. Large in berry and bunch, sweet and juicy. Sept.

Moore's Early. Large, reliable. August.

Wilder. (Roger's No. 4.) Sweet and solid. September.

Agawam. (Roger's No. 15.) Dark red, tender, juicy. Sept.

Green Mountain. Desirable in every way, very early. 50 cents.

Moore's Diamond. As early as Concord, large, fine flavored.

Niagara. As good as any, early and hardy.

Brighton. Flesh rich, sweet and best quality. Sept.

Delaware. Small in berry and bunch, flesh very juicy. September.

Salem. (Roger's No. 22.) Very rich flavor, large. Sept.

Campbell's Early. Large, black and very sweet. 50 cts.

**2-year plants, 30 cts. each; \$3.00
doz. 3-year plants, 50 cts. each;
\$5.00 doz., except as noted.**

See Special Offers on Third Page of Cover

Blackberries.

Agawam. The earliest; flavor like the wild berry.
Rathbun. Extra large, productive, new. \$1.50 per doz.
Snyder. Best quality, very sweet. \$1.00 per doz.; \$6.00 100.
Eldorado. Hardy, good size and quality.

Wachuset Thornless. Fruit medium, hardy and very productive.
Wilson's Early. Large and sweet.
Taylor's Prolific. Extremely hardy, large, prolific.

\$1.00 per doz.; \$5.00 per 100, except as noted.

Currants.

Black Naples. Fine for wine and jelly. \$1.50 per doz.; \$9.00 per 100.
Cherry. Large, red, juicy and acid. \$1.50 per doz.; \$10.00 per 100.
Fay. Like Cherry, but more prolific. 25 cts. ea., \$2.50 doz.

La Versailles. Very large, red. \$1.50 per doz.; \$9.00 per 100.
Perfection. The largest red currant in existence; a prize winner. 30 cts. each; \$3.00 per doz.

I wish to express to you my satisfaction over the currant bushes you sent me; they were in fine condition on arrival, and being carefully set, every one of the 102 is now alive.

Most truly,
 F. H. BUFFAM, Winchester, N. H.

Gooseberries.

Crown Bob. Very large, red. 25 cts. each; \$2.50 doz.
Red Jacket. The best red, free from mildew. 30 cts. each; \$3.00 per doz.
Pearl. The most prolific, free from mildew, green. 25 cts. each; \$2.25 per doz.
Smith's Improved. Large, light green. 20 cts. each; \$2.00 per doz.
Industry. Very large, dark cherry red. 25 cts. each; \$2.50 per doz.
Downing. 20 cts. each; \$2.00 per doz.

Raspberries.

Cuthbert. Red, firm and superior quality.
Columbian. Very large, a fine keeper. \$2.00 per doz.; \$10.00 per 100.
Golden Queen. Productive and of superior quality, golden yellow.
Cumberland. One of the finest, large and productive.
Gregg. Good size, productive and hardy.
Marlboro. Large, red, very productive.
 \$1.00 per doz.; \$5.00 per 100, except as noted.

Strawberries.

For Garden Culture, set plants one foot apart in the row, and the rows two feet apart, keep the runners cut off. The varieties marked "P" are pistillate and must have a row of staminate, or perfect-flowered varieties, planted say every ten feet among them.

The Autumn (P). Of vigorous growth, very productive and mild flavor, dark red, late. Autumn is a pistillate and must have a few Pan-Americans to fertilize them. Price, 1/2 doz. \$1.00; 1 doz. \$2.00; 100, \$10.00.

Pan-American. New everbearing variety of good quality, large clear red, free from rust and of fine flavor. A persistent bloomer from May to November. Price, 1 plant 30 cts.; 1/2 doz. \$1.25; 1 doz. \$2.50; 100 \$20.00.

Abington. Large fruit, solid, and excellent flavor. P. F.
Belmont. Late; crimson berry; very productive. P. F.
Breck's Abundance. Large, excellent berry; very heavy cropper; flavor tart; medium early. Highly recommended. P. F.

Brandywine. Hardy, good quality. Medium.
Commonwealth. Late; very large; deep crimson; excellent flavor. P. F.

Excelsior. The best of all early strawberries. Is medium small; crimson; tart, and the earliest of all. Splendid variety. P. F.

"Gandy." Large berries; late and an excellent cropper. Splendid keeper. P. F.

Glen Mary. Large; crimson berry; good quality; very productive; late. P. F.

Marshall. Requires no recommendation; is medium late. The fruit is very large, deep crimson color, and extra quality. P. F.

Minute Man. (P.) Medium early; vigorous grower, free from rust; berries light red and a great cropper.

\$1.00 per 100, except as noted.
 Pot Grown Plants ready in August, \$3.00 per 100

IMPLEMENTS AND SUNDRIES FOR 1911.

We take this opportunity to announce that April 1st, 1908, we issued the Fifth Edition of our Catalogue of Agricultural Hardware, Implements, Machines and Woodenware. This catalogue was carefully revised and is up-to-date in every respect.

It will afford us much pleasure to send you a copy if you have not received one, postpaid, on application.

Breck's "Colonial" Lawn Mower.

Breck's Colonial Lawn Mower is made with 10-inch wheels, 4-bladed wiper, and parallel self-oiling bearings. Every valuable improvement used in the latest pattern mowers of other manufacturers, and many new features are embodied in the Colonial, making it the most desirable and up-to-date machine made. Our long experience in handling lawn mowers entitles our judgment to consideration; therefore, we positively guarantee satisfaction to every purchaser. **Latest and Best.**

Sizes	14-inch.	16-inch.	18-inch.	20-inch.
Our net prices	\$6.75	\$7.25	\$7.75	\$8.25

Breck's "Colonial" Horse Lawn Mower.

We offer the Colonial Horse Lawn Mower as the best machine for use on Public Parks, Golf Grounds, Private Estates, etc. It has several new and valuable features, such as

CUTTING ADJUSTMENT.—The wheel at right of the driver's seat regulates the height of cut from $\frac{3}{8}$ inches to $2\frac{3}{4}$ inches.

CYLINDER ADJUSTMENT.—All wear of either revolving or stationary knives is taken up by a pair of set screws on the top of the cylinder journal boxes.

SELF SHARPENING STATIONARY KNIFE.—This blade is made of Crucible Tool Steel, hardened and tempered, and is the raised lip or upturned edge style.

	Mfrs. Price	Our Net Price
30-inch 4 knife complete	\$120.00	\$ 90.00
38 " 4 " "	150.00	110.00
With 6 knives, additional	12.50	10.00

Every mower thoroughly guaranteed.

Improved Utica Lawn Trimmer.

Does what no other machine can do and what lawn mowers leave undone. It trims and edges your lawn with remarkable speed and perfection; the shield over the blades protects the flowers. A trial will convince you, as it has thousands of others, that the days of shears and hand clippers have passed.

Our net price, each \$4.00

The Cricket Lawn Mowers.

Our net prices	\$2.75	\$3.00	\$3.25	\$3.50	\$5.50	\$6.00	\$6.50

Penn. Lawn Cleaner and Rake.

This machine will remove from the lawn not only the cut grass, but all sorts of litter, leaves and trash, leaving the grass standing upright and free from foreign matter that prevents the sunlight and dew from getting to the roots.

24-inch, one size only. Manufacturer's price, \$20.00; our net price, \$18.00.

Descriptive circular mailed on application.

The "E-Z" Grass Catcher.

The "E-Z" Grass Catcher has a galvanized iron bottom. The sides and back are made of very strong canvas, attached to the bottom. The frame is made of $\frac{1}{4}$ -inch galvanized iron wire, with side supports of the same stock. A universal attachment made of malleable iron is so arranged that it is possible to attach it to any mower no matter what the diameter of the drive wheel. The side frame can be lengthened or shortened so that the pan will travel directly behind the roller. It is guaranteed to fit perfectly all styles and makes of lawn mowers. This catcher can be removed to put away or empty in an instant.

No. 1, for 12, 14 and 16 in. mowers.	Our net price, each, \$1.25
" 2, " 16, 17 and 18 in. "	" " " " 1.35
" 3, " 18, 19, 20 and 21 in. "	" " " " 1.50

English Water Ballast Rollers.

For keeping golf greens, lawns, and tennis courts in perfect order these Rollers are invaluable, and have been adopted by the English clubs in preference to all others. When the ground is soft they may be used empty and in dry weather, when all others are useless, they can be filled with water and worked effectually.

The advantage of having in one Roller either a heavy or light implement at pleasure must be obvious to every one.

	Weight empty.	Weight filled.	Mfrs. price.	Our net price.

Horse Lawn Boots.

For Lawn or Golf work, Horse Boots are indispensable for use in connection with mower or roller. They prevent the horse sinking in damp or soft places and do not cut or tear up the turf. The following patterns are the ones in general use; each having been adopted for some particular merit of its own.

OUR NET PRICES.

Breck's Golf Pattern, per set of four . . .	\$8.00
Phillips', per set of four	8.00

Please send diagram showing size of horse's hoof when ordering.

We sharpen and repair all kinds of Hand and Horse Lawn Mowers at reasonable prices. Send us your machines early and avoid the rush when the season opens.

See Special Offers on third page of cover.

"Boss" Field, Garden, Golf and Lawn Rollers.

The benefits derived from the use of a Roller on the lawn, especially in the spring, is not fully understood. The action of freezing and thawing causes the ground to heave, and if the sod is not firmly pressed back with a Roller before the hot weather begins, the grass is apt to be killed or injured, leaving the lawn full of bare spots.

The "Boss" Roller is a strictly high grade Roller at a moderate cost. This Roller is turned perfectly smooth on the outer surface, has bevelled edges, turned steel axles, and is in fact far superior to any other we have seen.

Garden and Lawn Rollers.

The "New Comet" Lawn Sprinkler.

Positively guaranteed to be the best sprinkler made.

Has struck the earth and convinces all who see it that it combines the greatest possible capacity in a Lawn Sprinkler with the utmost adjustability and simplicity.

The two sprays shown in cut can be set upright, or at any angle and by means of a simple device inside the case, they are made to revolve slowly, throwing a fine spray over a space from 5 to 25 feet in diameter as desired.

By removing one of the sprays, a large stream is thrown far beyond the possibility of the spray, covering a space from 60 to 75 feet in diameter according to the water pressure. As most of the weight (4½ lbs.) is at the base, it can be moved about by the hose or cord without shutting off the water with no possibility of tipping over.

"New Comet" Lawn Sprinkler	Net price, each	\$3.50

BLUE LINE COTTON HOSE.

[illegible]

Please remember that we offer no cheap grade of Garden Hose; every foot is warranted and is sure to give satisfaction.

Hudson's Garden Hose Mender.

So Simple a Child can Use it.

Made in three sizes, for 1/4-inch, 3/4-inch and 1-inch hose. *Put up in boxes for consumers' use.* Each box contains one pair pliers, twenty bands, six tubes. A box will be sent prepaid by mail to any address on receipt of 75 cents.

Give inside diameter of hose when ordering.

Sent otherwise than by mail 50 cents per box.

All Iron Park Hose Reels.

To meet the demand for Hose Reels having a larger capacity than the ordinary reels which carry from 50 to 100 feet, we have selected the Park Reels as being the most suitable.

Complete Catalogue of Spraying Pumps, Spraying Materials, etc., mailed on application.

The Brandt Sprayers.

In offering the "Brandt" Sprayers to our customers, we do so with the knowledge that we are offering the finest and best Sprayers on the market. They are very simple and will not get out of order, and are guaranteed to give satisfaction. These Sprayers have been tested and highly endorsed by all the leading Experiment Stations in the United States, and are now used by the U. S. Government.

No. 19.

The largest size has a patented device for maintaining an even and high pressure which is absolutely necessary to obtain a satisfactory spray. One stroke will spray 20 hills of potatoes or same number of similar plants, therefore its labor-saving powers cannot be surpassed. Will spray a row of vegetables one mile long with one filling, and are especially adapted for fast work.

Uses.—Sprays Paris Green, Bordeaux Mixture, Sulphate of Iron for killing weeds, White Arsenic, Tobacco Infusion, Stock Dip, and all other liquid applications, also for whitewashing and disinfecting poultry houses, barns, cellars, etc.

The "Brandt Easy" Sprayer is made with either Brass or Galvanized tank, and is designed for those wanting a small Sprayer. It works on the same principle as above sprayers and has shut-off nozzle. Capacity, 1 gal.

Breck's Dry Powder Blowers.

In some sections potato growers, stock and poultry raisers prefer to use Paris Green and disinfectants in powder form mixed with dry plaster. To meet such a demand the Dry Powder Blowers are recommended. It is unnecessary to give the details of the construction of the Blower, as we give a positive guarantee with each that it is impossible to draw powder back into the cylinder pump, and if the powder is sifted through a screen and kept absolutely dry it will be impossible for the same to clog. The powder can hold one quart.

Our net price each, 75 cts.

Brass Cylinder House Force and Lift Pumps.

No. 220.

The Brass Cylinder Pumps are novel in design and different from all other makes. Very nicely finished and durable. Reversible handles and non-freezing. They are fitted with special pipe couplings which take lead or iron pipe. Lead pipe can be attached direct without solder. This device is used on no other pumps. Glass Valve Seats.

No. 245 **House Lift Pump** fitted with 3-in. Brass Cylinder. Our net price \$4.50

No. 251 **Double Acting Force Pump** fitted with upper Brass Cylinder and 3-in. Brass lower Cylinder, Glass Valve Seat and Drop Valve. Our net price 6.00

No. 220 **Brass Cylinder Pitcher Pump** fitted with 3-in. Brass Cylinder. Our net price 4.25

No. 251.

Rex Pumice Hand Soap.

Rex Pumice Hand Soap is a *paste* soap compounded from the purest of soap stock, vegetable oils and specially prepared Italian pumice, and is the finest *paste* soap ever offered to the public. It is free from injurious alkalis and will not dry, chap or injure the skin, but leaves a pleasant feeling of softness and smoothness. This Soap will quickly and thoroughly remove all kinds of dirt, grease, paint, ink, blacking, fruit stains, etc., from the skin, and is unequalled in the household for cleaning woodwork, floors, tubs, sinks and kitchen utensils. Our net price, 10 cts. per can.

Aeromotor Gasoline Pumps.

The Aeromotor Gasoline outfits are designed to take the place of the "Man at the Pump." After seeing one of these pump water for fifteen minutes no one will want to work the pump handle again. They are simple, durable and air-cooled. No water-jacket to freeze and burst. Can be furnished complete as shown in cut or with jack, using the pump you already have in well. Will deliver from 225 to 1600 gallons per hour. Prices range from \$40.00 to \$75.00 for complete outfits.

The No. 2 outfit as shown sells for \$50.00. Pipe and working cylinder additional. Descriptive circulars mailed on application.

**No. 2 Outfit.****Aeromotor Gasoline Engine.**

We believe we offer for \$80.00 the best 2 H.-P. Engine made. Built throughout with most painstaking care for those not expert. Its Hopper Cooler gives large radiating surface in the best possible shape, affording thorough circulation of water and air without blowing or pump. Write for circular.

Price, complete ready to run.....\$80.00

**No. 15.**

No. 20. Lightest running and fastest grinding mill for small engines ever built. Grinds ear corn and all small grains. Speed, 2 H. P., 250 to 300 revolutions per minute. Weight, 250 pounds.

Descriptive catalogues mailed on application.

No. 15. 4 to 6 H. P. Gasoline Engine, 12 to 30 bushels\$42.00

For two or three horses. Latest improvements. Built expressly for New England.

Descriptive circulars and prices mailed on application.

**Acme Pulverizing Harrow.**

Is not a special tool, as some have supposed, but, as its name implies, a general purpose harrow that will do the whole business, viz.: it will crush, cut, lift, turn, smooth and level, all in one operation.

The Coulters all slope backwards, thus presenting the least possible resistance, and as they are ground to an edge, the draft is reduced to a minimum.

Large illustrated catalogue of Acme Harrows mailed on application.

Double Disc Harrow.

The Double Disc Harrow is just what its name indicates—two harrows combined in one, for the purpose of saving time and labor in tilling the soil. Its capacity is twice that of any other form of Disc Harrow, for it works the ground twice at one operation. Moreover the work is more thoroughly done, for the second harrowing follows immediately after the first, before the freshly cut ground has had time to dry out or become hard.

No. 4. 16 x 16 Discs . on application.
Descriptive circulars mailed on application.

**Monarch Steel Stump Puller.**

The most complete and most successful, most powerful and thoroughly up-to-date line of Steel Stump Pullers ever offered to the public. More Monarch Steel and Iron Stump Pullers are now at work and sold every year than all the rest combined.

Descriptive circulars, prices, etc.,
on application.

All Steel Disc Harrow.

The most practical disc harrow made. The bearings are of chilled iron and are fitted with steel balls running against chilled surface to take end thrust of disc gang. Box is cast solid in one piece, and chilled on inside, and is provided with dirt proof oil cups leading into an oil chamber, which effectually lubricates the bearings at all times.

No. 1. Twelve 16-inch discs, cut 6 feet, complete, with whiffletrees, evener, neck yoke and scrapers.

Mfrs. price, each, \$30.00. Our net price, \$26.00

Also a full line of Spike and Spring Tooth Harrows.

Circulars and prices mailed on application.

Gem Seed Potato Cutter.

The Gem Seed Potato Cutter will cut any size potato in pieces uniform in size. The operator, to get the best results, will pick up the tuber, look for the seed or blossom end, passing it over the knife on upper side of pressure lever, thus removing the cause of so many empty potato hills in your potato patch. Then, according to size of potato, place it on knives so that when lever is pushed down it will be cut into either two, four or six; or, if a very large one, split it and cut each half into as many pieces as its size will require. From six to eight bushels can be cut with it in an hour. The saving in time alone will more than pay for this cutter the first season it is used.

Our net price, each \$2.50

Closed.

Standard Automatic Earth Auger.

One man with this Auger will bore more holes in a day than two men with two augers or diggers of any other make, as it is self-feeding and self-discharging, and the blades are so formed that they easily enter the hardest ground without forcing. It draws itself into the ground as readily as a wood auger enters wood. One blade being permanent and the other held in position by a simple locking device, can be swung wide open at will of operator, permitting the auger to quickly unload.

WILL BORE IN ANY KIND OF SOIL

and in all conditions of soil—hard, soft or sticky, dry or wet, hard pan, sand or gravel, small stones, etc. The lower side cutting edges bore the hole larger in diameter than the body of the auger, which reduces the friction and prevents binding in the hole.

Standard Automatic Earth Auger each \$3.50

Open.

Truss and Cable Wire Fence.

There are no short, sharp twists or bends to break down the fibre of the wire, and the strength of the fabric is equal to the combined tensile strength of all the wires.

Galvanized after weaving, which covers the entire fabric with a heavy coating of pure zinc, making the best possible protection against rust.

2 inches wide for Fence (2 1/4 lbs. per rod) at 25 cents per rod.

I. X. L. Galvanized Steel Chain Pump.

There has never been a better device for raising water from the well than the old-fashioned chain pump with rubber buckets. The galvanized tubing does not make the water taste, it cannot rust, and will not rot or accumulate filth. This pump is anti-freezing and can be used in wells that are fifty feet deep or under successfully, giving sixteen gallons of water per minute.

No. 2 Stanchion Basin with Valve, our net price, each, \$1.50. Not included in our special offers.

Breck's Improved Swing Stanchion.

This Stanchion gives as perfect freedom to cattle as it is possible to have and have them fastened at all. The cattle when standing can lap themselves as when loose, and when lying down they can rest the head upon the body as when in pasture.

There is no friction on the neck, as the Stanchion turns with the head. It keeps them as clean as the firm Stanchion and there is no possible way they can get hurt; neither can they get to the right or left to gore each other.

The cattle cannot waste their feed and do much better than when tied with any other Stanchion. No getting choked or getting unfastened.

Thousands are in use. Every dairyman who has used them approves them and adopts them exclusively.

Superior Sanitary Churn.

The Superior Sanitary Churn is made with the idea of furnishing the butter maker with a churn that will not absorb any moisture whatever, making it absolutely sanitary. It is very easy to wash and dry, there being no reason for placing it out in the sun to dry, or in the basement to keep it from leaking. It costs more than the ordinary churn and is worth more. The difference in price is nothing when you consider the difference in quality. The labor saved each year, the satisfaction of knowing there is nothing about your churn that will taint the butter, and that your churn will be just as sweet after use as when new.

Bruce's 20th Century Milk Pail.

Endorsed by Milk Inspectors and Boards of Health wherever shown. The latest, most sanitary and handiest milk pail manufactured. No stool required, is simple in construction, easy to keep clean. No dust, dirt or odors of any kind can reach the interior of this pail.

Advantages Over All Other Pails.

1. It is perfectly hygienic. 2. Eliminates holding pail between the knees. 3. Cow cannot kick over pail. 4. No stool is required. 5. Large receptacle to milk into. 6. No wood of any kind in its entire construction. 7. And greatest advantage: it is the only milk pail made so constructed as to afford new strainer cloths each day at a cost of five cents per month, eliminating the danger arising from improper care of strainer cloths when used for weeks.

CLOTHES WASHERS.**Horton Water Motor Washer.**

The most simple, most powerful, lightest, strongest and most durable WATER MOTOR WASHER on the market. It will work with less water pressure than any other motor and just as well with high pressure. It is self-lubricating and requires no oiling. Absolutely nothing to get out of order. Four feet of special water motor hose for inlet and four feet for outlet, with all the necessary attachments, furnished with each motor. The dasher makes a longer stroke than on other makes, requiring less time to do the same amount of work.

Our Horton No. 12 Rotary Washer and the Spinner Washers are guaranteed to be perfect in every respect. The No. 5 is the best of Lever Washers. Tubs have a large capacity and are made of the best grade Red Louisiana Cypress, handsomely finished in natural wood. If they do not prove all we claim for them, they can be returned and the money paid refunded.

Ruddy Harvester Oil.

Ruddy Harvester Oil is made especially for mowing machines, reapers and other kinds of farm machinery and has never failed to give satisfaction. The oil is pure, free from grit, and is warranted not to gum or injure the finest machinery. Beware of the so-called mowing machine oils usually offered by agents. By using them you will damage your machinery.

Ruddy Harvester Oil is put up in convenient cans ready for use, as follows:
